Nations need identities. These are created from perceptions of how societies have evolved. In this, history plays a central role. Insisting on reliable history is therefore crucial to more than just a pedagogic cause. Delicate relationships between the past and present or an exacting understanding of the past, call for careful analyses. Understanding India's past is of vital importance to the present. Many popularly held views about the past need to be critically enquired into before they can be taken as historical. Why is it important for Indian society to be secular? When did communalism as

an ideology gain a foothold in the country? How and when did the patriarchal system begin to support a culture of violence against women? Historian Romila Thapar has investigated, analyzed, and interpreted the history that underlies such questions throughout her career. Through the incisive essays in *The Past as Present*, she argues that it is of critical importance for the Indian past to be carefully and rigorously explained if the legitimacy of the present, wherever it derives from the past, is to be portrayed as accurately as possible. This is particularly crucial given the attempts by unscrupulous politicians, religious fundamentalists, and their ilk to wilfully misrepresent and manipulate the past in order to serve their present-day agendas. *The Past as Present* is an essential and necessary book at a time when sectarianism, false nationalism, and the muddying of historical facts are increasingly becoming a feature of our public, private, and intellectual lives.

This edited collection examines the various influences, relationships, and developments beer has had from distinctly spatial perspectives. The chapters explore the functions of beer and brewing from unique and sometimes overlapping historical, economic, cultural, environmental and physical viewpoints. Topics from authors – both geographers and non-geographers alike – have examined the influence of beer throughout history, the migration of beer on local to global scales, the dichotomous nature of global production and craft brewing, the neolocalism of craft beers, and the influence local geography has had on beer's most essential ingredients: water, starch (malt), hops, and yeast. At the core of each chapter remains the integration of spatial perspectives to effectively map the identity, changes, challenges, patterns and locales of the geographies of beer.

Slowly, silently, now the moon  
Walks the night in her silver  
shoon;  
This way, and that, she peers,  
and sees  
Silver fruit  
upon silver trees;  
One spring evening,  
the fairies gather in the  
woods.  
Two sleepy children join  
in the parade  
to a wonderful,  
dream-like  
fairy party.

The great French zoologist Lamarck (1744-1829) was best known for his theory of evolution, called 'soft inheritance', whereby organisms pass down acquired characteristics to their offspring. Originally a soldier, Lamarck later studied medicine and biology. His distinguished career included admission to the French Academy of Sciences (1779), and appointments as Royal Botanist (1781) and as professor of zoology at the Musée Nationale d'Histoire Naturelle in 1793. Acknowledged as the premier authority on invertebrate zoology, he is credited with coining the term 'invertebrates'. In this 1809 work, translated into English in 1914, he outlines his theory that under the pressure of different external circumstances, species can develop variations, and that new species and genera can eventually evolve as a result. Darwin paid tribute to Lamarck as the man who 'first did the eminent service of arousing attention to the probability of all change ... being the result of law'.
