Laura Kasinof studied Arabic in college and moved to Yemen a few years later—after a friend at a late-night party in Washington, DC, recommended the country as a good place to work as a freelance journalist. When she first moved to the capital city of Sanaa in 2009, she was the only American reporter based in the country. She quickly fell in love with Yemen's people and culture, and even found herself the star of a local TV soap opera. When antigovernment protests broke out in Yemen in 2011, part of the revolts sweeping the Arab world at the time, she contacted the New York Times to see if she could cover the rapidly unfolding events for the newspaper. Laura never planned to be a war correspondent, but found herself in the middle of brutal government attacks on peaceful protesters. As foreign reporters were rounded up and shipped out of the country, Laura managed to elude the authorities but found herself increasingly isolated—and even more determined to report on what she saw. With a new foreword by the author about what has happened in Yemen since the book's initial publication, *Don't Be Afraid of the Bullets* is a fascinating and important debut by a talented young journalist.

This is the perfect book for anyone interested in classic Japanese motorcycles, as well as prepping a bike to build a cafe racer, street tracker, or other custom build.

Content covers two- and four-stroke scooters and is relevant for machines from all markets. /div

This book presents a step-by-step guide to building a West Coast Chopper's C.F.L. kit. Kit choppers are hot commodities. While few people can afford to buy a custom-built chopper from one of the high-end builders like Jesse James-bikes that often sell for \$100,000 or more-many can afford to buy such bikes in kit form. Because of this, all the

high-end builders sell their creations in kit form. For example, while Jesse James might build perhaps a dozen custom bikes per year, he sells hundreds of chopper kits. The same is true of any number of other builders like Matt Hotch, Cyril Huze, and Paul Yaffe. Authored by Mike Seate and featuring the photography of Joe Appel, this book is a step-by-step how-to guide for anyone building a kit chopper.

In 1963, Dr. Martin Luther King Jr. articulated his dream, JFK was assassinated, and zip codes were first introduced to the US. The world was monumentally changing and changing fast. But in the eyes of future fantasy author Peter Beagle and his best friend Phil, it wasn't changing fast enough. For these two twenty-something beatnik Jews from the Bronx, change was something you chased after night and day across the country on the trembling seat of a motor scooter.
