This area is especially challenging, because bits and pieces of applicable information must be gathered from a maze of Revenue Procedures, IRS Tables and IRS Regulations. These sources are frequently old and include some materials which may be non-applicable. CCH's U.S. Master Depreciation Guide pulls the pieces together, so practitioners can make sense of all the corresponding information and put the information into practice.

Shortlisted for the 2017 Kobo Emerging Writer Prize, Nonfiction Category Longlisted for the 2018 Frank Hegyi Award for Emerging Authors Tim Bosma was a happy young father with a promising future when he listed his pickup truck for sale online, went for a test drive with two strangers, and never returned. The story of the Hamilton man’s strange disappearance in May 2013 captured headlines across the country and took over social media, resonating with everyone who had ever taken a test drive or bought and sold goods online. When Dellen Millard and Mark Smich were eventually arrested and charged with Bosma’s murder, the mystery only deepened. Millard was the wealthy heir to an aviation business. Smich was his ne’er-do-well best friend from a middle-class family. There was no obvious reason why the pair had made it their deadly mission to steal a truck, murder its owner, and incinerate the body. Tim Bosma was their randomly chosen “thrill kill” target. Veteran journalist and private investigator Ann Brocklehurst had a front-row seat at Millard’s and Smich’s 2016 trial, where many of the questions about their shocking crime were finally answered. Others still linger, waiting to be further explained at two more murder trials set for 2017. Both Millard and Smich have been charged with the first-degree murder of Laura Babcock, who disappeared in summer 2012. And Millard alone faces murder charges in the death of his father, which previously has been ruled a suicide. Compelling and suspenseful, *Dark Ambition* chronicles an unfathomable crime and its chilling perpetrators.

In this collection of short stories, water, in all its many shapes and forms, becomes a catalyst in the lives of the people it touches. From the Chrysler Six of 1924 to the front-wheel-drive vehicles of the 70s and 80s to the minivan, Chrysler boasts an impressive list of technological "firsts." But even though the company has catered well to a variety of consumers, it has come to the brink of financial ruin more than once in its seventy-five-year history. How Chrysler has achieved monumental success and then managed colossal failure and sharp recovery is explained in *Riding the Roller Coaster*, a lively, unprecedented look at a major force in the American automobile industry since 1925. Charles Hyde tells the intriguing story behind Chrysler-its products, people, and performance over time-with particular focus on the company's management. He offers a lens through which the reader can view the U.S. auto industry from the perspective of the smallest of the automakers who, along with Ford and General Motors, make up the "Big Three." The book covers Walter P. Chrysler's life and automotive career before 1925, when he founded the Chrysler Corporation, to 1998, when it merged with Daimler-Benz. Chrysler made a late entrance into the industry in 1925 when it emerged from Chalmers and Maxwell, and further grew when it absorbed Dodge Brothers and American Motors Corporation. The author traces this journey, explaining the company's leadership in automotive engineering, its styling successes and failures, its changing management, and its activities from auto racing to defense production to real estate. Throughout, the colorful personalities of its leaders-including Chrysler himself and Lee Iacocca-emerge as strong forces in the company's development, imparting a risk-taking mentality that gave the company its verve.

As U.S. and Canadian automakers and dealers face bankruptcy and Toyota battles unprecedented quality-control problems, *Lemon-Aid* guides steer the confused and anxious buyer through the economic meltdown unlike any other car-and-truck books on the market. Phil Edmonston, Canada's automotive "Dr. Phil" for more than 40 years, pulls no punches. In this all-new guide he says: Chrysler's days are numbered with the dubious help of Fiat. Electric cars and ethanol power are PR gimmicks. Diesel and natural gas are the future. Be wary of "zombie" vehicles: Jaguar, Land Rover, Saab, and Volvo. Mercedes-Benz -- rich cars, poor quality. There's only one Saturn you should buy. Toyota -- enough apologies: "when you mess up, 'fess up."
