

A Guide To The Mrcp Part 2 Written Paper Hodder Arnold Publication

MRCP PACES is widely regarded as the most challenging hurdle to obtaining membership to the Royal College of Physicians. Passing the exam requires more than knowledge alone and many incredibly talented doctors fail every year due to various factors. The most common failure point is scoring poorly on the 'physical signs' strand of the exam. This book is designed to be a complete yet concise guide to the MRCP PACES examination and will guide you through the stations in a systematic way to help you score top marks in the exam. This book does not replace examining patients to elicit signs, and omitting this step in your preparation is a sure way to fail! This book will also be useful for medical students doing their OSCE's who are keen to get an edge over their peers, though the level of detail will be greater than required. This book will cover the key aspects of the exam including: (1) The exam format (2) Examination routines (3) Common and important cases represented in the PACES exam (4) Key physical findings (5) Presentation techniques for the different stations (6) Useful skills to narrow the differential diagnosis from the end of the bed. It is the book we wish we had when we sat the MRCP PACES exam!

A book of six exam papers structured in a similar format and at the same level of the MRCP (Paediatric) exam. Each paper consists of 10 data interpretation questions, 5 grey cases and 20 picture tests.

This new book is written by authors experienced in training candidates to pass MRCP PACES from across the UK. They have put together Pass PACES based on their own teaching experiences to fill the gap in preparation aids for this high-stakes examination. As well as covering the curriculum, this

Get Free A Guide To The Mrcp Part 2 Written Paper Hodder Arnold Publication

book is designed to help candidates marshal their knowledge most effectively in order to maximize candidate's performance. The book provides a pragmatic guide to the presentation of cases and gives great tips for how to achieve full marks at each station in the exam. Gives the candidate a stepwise approach in how to present the clinical cases that appear in the exam, with the aim of achieving full marks in the clinical stations. Highlights the extra knowledge and information sought by examiners in order to award full marks at the discussion phase of each station. Gives advice on time management and organization before and during the exam. Uses smart memory techniques in order to create brain images for candidates to be able to recruit knowledge under the stress of the exam. Presents unique hidden curriculum knowledge and non-technical skills tips, customised for this exam. Accompanying videos that walk candidates through key examinations for each station, and podcasts giving instructional tips and guidance.

Designed to help medical students through their exams. Built around the successful 'Essential Revision Notes for MRCP', this title focuses on what is essential learning for medical undergraduates and gives readers an 'all round' knowledge of medicine at this level.

This book serves as a concise revision aid for the case histories section of the written paper for Part 2 of the MRCP examination. The book assists candidates in developing the necessary speed, thoroughness and accuracy in applying clinical examination and diagnosis in the exam setting. This book should be of interest to MRCP candidates, and postgraduate physicians.

"This book provides an essential guide to the examination of children in the context of the postgraduate clinical examination - MRCP Part II or DCH. The system-by-system approach and notation style are designed to aid revision, and

Get Free A Guide To The Mrcp Part 2 Written Paper Hodder Arnold Publication

throughout there is advice on how best to impress the examiners as well as make progress with the uncooperative child."--BOOK JACKET.Title Summary field provided by Blackwell North America, Inc. All Rights Reserved

Written for candidates sitting their MRCP Part 1 examination, this revision focuses on the recurring themes which come up in the questions. The book also includes a chapter on clinical pharmacology (which alone accounts for up to 30% of the questions), looking at aspects of drug-induced disease and drug interactions. Finally there is a chapter on statistics and epidemiology which is rarely covered in other texts, but is often included in the exam. Helps MRCP Part 1 candidates prepare for and pass their exam. Addresses an increasingly important topic in the exam. Addresses a topic that is vital to passing the exam, but which most candidates are poorly prepared for. Covers all the relevant basic science subjects plus includes clinical pharmacology. Is of use to candidates studying for other postgraduate exams such as PLAB, USMLE and MRCPCH. Is the first book of its kind in the membership market and is now regarded as essential for exam preparation.

Taking a patient's medical history is a vital skill often overlooked by junior doctors and medical students, leading to a worryingly high failure rate in the PACES and OSCE exams. Don't be caught out! This book has been specifically designed to give you invaluable guidance and practice for taking medical histories. It features 50 complete case studies, including referral letters, medical histories, suggested data gathering methods, points to consider, warning signs, management of uncomfortable topics and differential diagnosis. With a focus on the importance and benefits of role-play in revision, this concise and easy to read format provides the study aid for Membership of the Royal College of Physicians (MRCP) candidates sitting their Objective

Get Free A Guide To The Mrcp Part 2 Written Paper Hodder Arnold Publication

Structured Clinical Examination (OSCE) and Practical Assessment of Clinical Examination Skills (PACES) examinations. It is also of great benefit to undergraduates approaching their final year examinations.

Trainees in preparation for the MRCP examination will welcome the much-anticipated new edition of this 'gold standard' revision book. Revised and updated throughout to encompass new developments in medical diagnostics and therapeutics, and restructured to reflect the recent changes in the format of the Part 2 written examination, the book continues to offer a more detailed and examination-orientated approach than other revision guides on the market. The appeal of the book lies not only in the careful adherence to the examination format, but also in the invaluable hints it provides on exam technique, with suggestions of information that will be helpful when tackling the exam presented in a 'revision-friendly' boxed format.

MRCP PACES is a challenging examination requiring in-depth clinical knowledge, excellent clinical skills and the ability to present each case concisely and coherently. This revision guide helps candidates achieve these aims; it is compact enough for bedside use and sufficiently comprehensive for self-study. The new edition follows the structure of the current PACES exam and has an expanded section on Station 5. As well as a wealth of up-to-date questions for practice, it includes extensive new clinical information on new therapies and details of the latest investigations and management options. Each chapter has been reviewed by senior clinicians within the specialty. • Presents all seven stations in one book • Provides practical hints and tips for success at each station • Presents much more comprehensive information in a compact and accessible format than other books • Provides evidence-based information, guidelines and questions mapping onto the latest

Get Free A Guide To The Mrcp Part 2 Written Paper Hodder Arnold Publication

examination format. This book teaches the candidate not only how to pass the PACES exam, leading the reader through each case and exactly what is expected of them, but also provides a succinct yet detailed clinical handbook for support on medical wards.

MRCP SCE in Respiratory Medicine: 300 SBAs is the ideal revision guide for candidates preparing for the MRCP SCE in respiratory medicine. The book offers a wealth of practice questions that test candidates' knowledge and understanding of the clinical sciences relevant to specialist medical practice. Chapters follow the JRCPTB specialty training curriculum for respiratory medicine, while detailed answers and explanations reinforce understanding. This book provides essential revision to maximise chances of exam success. Key points 300 SBA questions with correct answers and thorough explanations, and rational clarification of incorrect options Number of questions for each part of the syllabus follows MRCP(UK) blueprint, ensuring effective targeted revision Gives practical advice on how to approach revision and useful tips to improve exam technique

Have you ever wondered why some candidates effortlessly clear MRCP PACES on their first attempt whilst others struggle? How can you harness the power of Parkinson's Law and many other practical concepts to pass MRCP PACES in just eight weeks? And what is the PACES Triangle?The answers to all these questions and more are in How to Pass MRCP PACES in 8 Weeks.In this concise guide, Dr Rory Chan takes you through all the non-clinical aspects you need to consider when tackling MRCP PACES. Although numerous great books exist to help you learn clinical information, this is the very first book to our knowledge that provides PACES-specific strategy and is a must-read prior to one of the most important exams of your medical career.We estimate that after reading this guide, you'll certainly increase your chances

Get Free A Guide To The Mrcp Part 2 Written Paper Hodder Arnold Publication

of passing MRCP PACES by at least 30%.

Nowadays, MRCP is the pre-requisite qualification every doctor needs to attain to be considered for a higher specialist training post in medicine. MRCP Part I and II does not detail the medical knowledge required to pass these two exams as there is limited benefit in repeating the excellent and readily available texts already out there. Instead its aim is to arm you with the necessary study techniques specific to succeeding in these two initial exams. We will discuss how the exam format should dictate your time allocation. Additionally, the best available resources will be compared and contrasted. 25% of profits from this guide will go directly to Medicines Sans Frontiers (MSF), a charity that specialises in improving sanitation and healthcare in less fortunate parts of our world. The other 75% will go towards maintaining www.ukdoctoronfire.com where you will find plenty of free MRCP tips, financial information for physicians, and advice for working as a locum physician.

Medical curricula change continually to reflect the evolving roles of doctors, changes in treatments and advances in technology. Medicine moves at pace and it takes a practitioner committed to continuing professional development to keep up. This new edition of 250 Cases in Clinical Medicine has been thoroughly updated to reflect the changing form of the Royal College of Physicians' curriculum. Some chapters from the previous edition have been dropped to allow new, more clinically relevant topics to be included. Chapters of symptom-based cases have also been added, as well as a section on acute medical problems and their management. Essential reading for MBBS, PLAB, MRCP (UK), MRCPI, MD (New Zealand, Malaysia, Singapore, India, Pakistan, Sri Lanka and Bangladesh), FRACP, FCCP and postgraduate medical examinations in the USA including USMLE and ABIM. New author team Cases

alphabetised by system Procedures for the core medical curriculum added Symptoms-based cases added Emergency presentations added Self-assessment by system added Accompanying e-book on StudentConsult Now in full colour This title is written for MRCP candidates preparing for PACES exam in UK and rest of world. Clinical examinations in the OSCE style of marked stations are daunting for all students, whether undergraduates or MRCP candidates. The recent introduction of the 5-station PACES (Progressive Assessment of Clinical Examination Skills) exam inspired a great deal of apprehension, so the appearance of the first edition of Hall's PACES for MRCP was greatly welcomed by candidates and became an immediate success. This new edition builds on the book's reputation. It provides, in one colourful and attractive volume, complete coverage of all the most common medical cases that will be covered in PACES and similar exams. A one-volume text giving candidates complete preparation for the PACES exam within one portable volume 250 cases organised into the 5 stations of the PACES exam - respiratory and abdominal system, history taking, cardiovascular and nervous system, communication and ethics and skin, locomotion, eyes and endocrine systems Engaging question-and-answer approach at the end of each case - excellent preparation for the exam Boxed tips highlight vital information - helps identify what is most important to remember Produced in full colour throughout Colour coding for each station Many more illustrations added - now over 300 clinical photographs and line drawings in colour Many more cases added,

Get Free A Guide To The Mrcp Part 2 Written Paper Hodder Arnold Publication

bringing the number up to 250 - 50 per station History-taking and communication skills stations now revised so that they exactly mimic the requirements of the exam History taking and examination skills are vitally important in everyday practice. They are examined at all levels of the undergraduate curriculum and are constantly monitored at a postgraduate level. To become proficient in history taking, key questions should be asked to quickly understand the exact nature of the illness. This invaluable guide spec

This book is an invaluable resource with 400 self-assessment cases and data interpretation questions covering all aspects of internal medicine. It has great breadth of coverage, superb illustration, lively presentation, precise answers and detailed discussion. Following the super-success of their MRCP Part 2 volume, the authors adapt their special teaching skills to the needs of MRCP Part 1 and similar exams in internal medicine. The book consists of 360 Best of 5' multiple choice questions (1,800 clinical decision) reflecting the latest exam format. It covers all areas of clinical medicine needed by ex

A solid knowledge base and good clinical skills don't necessarily guarantee examination success in the long case OSCE. This book is the ultimate guide for medical students needing to combine their knowledge and skills with an ability to interpret the clinical findings, the proficiency to present them clearly and the confidence to deal with the examiners questions. Adopting a proven, highly effective approach, this revision aid uses role play with simulated patients to hone clinical examination and

Get Free A Guide To The Mrcp Part 2 Written Paper Hodder Arnold Publication

presentation skills. The fifty cases are divided into six areas: cardiology, respiratory, abdomen, neurology, musculoskeletal and surgery. Written by successful candidates and examiners, the guide poses a number of important and commonly asked examination questions for each case to assist in preparation and confidence, and model answers are provided to ensure an understanding of exactly what is required. Working in groups or independently, students will welcome the large, colourful format, the breakdown of marking schemes, an overview of examiners expectations, a guide to presenting clinical findings and innumerable 'insider' tips throughout. See accompanying video here: <https://www.youtube.com/watch?v=Cvr4y-NykUU>

"The first book written for parents with the primary goal of equipping them with the knowledge and skills to support their children through medical challenges on a day-to-day basis, and specifically with medical trauma-experiences in healthcare that can profoundly affect a child's response and willingness to even go to the doctor"--

1000+ high yield facts for the MRCP & Acute Medicine SCE "Finally a resource that takes into consideration the time-pressures of long shifts & the sheer volume of knowledge that is required for these post-graduate exams" - Dr. Isabel Walters (Cheshire, UK) "Your work really helped me with the MRCP Part 2 written exam & I'm happy to let you know that I managed to pass it on my first attempt" - Dr. Joel George (Belgaum, India) The purpose of this book is crystal clear: to help you pass your exams through productive and efficient learning. It

Get Free A Guide To The Mrcp Part 2 Written Paper Hodder Arnold Publication

breaks up your revision into manageable chunks so that it does not feel daunting, tedious or impractical. In fact, if you spend just 1 minute immersed in its text, you will learn a thing or two. You don't even have to start at the beginning, you can start anywhere you like! Now although these exams are separate entities, they build upon each other with increasing relevance to clinical practice. For example you need MRCP Part 1 knowledge to pass MRCP Part 2. You need MRCP Part 2 knowledge to pass PACES & the Acute Medicine SCE. This book provides such scope and addresses an array of topics across the many syllabi. It functions as a hybrid between an MCQ book and a textbook, presenting these topics as high yield facts. Each fact is in the form of a question to mirror the exams. However, unlike MCQ books, you don't have to annoyingly jump to the back to read the answer. The answer is right under the question. There are many benefits to this approach: By touching on a variety of different topics, it helps identify your deficiencies and builds upon your strengths It focuses on boosting your memory through strategies like spaced repetition and active recall e.g. you will quickly find that it brings to light information that you previously learnt but may have forgotten The facts are presented like a random generator to train your brain to quickly transition from one specialty to another. Many of them have clinical context to aid with learning through association e.g. it is easier to remember the management of a condition when you have seen or treated someone with it, rather than cramming the NICE guidelines Finally it's worth mentioning that this book is not just for those doing

Get Free A Guide To The Mrcp Part 2 Written Paper Hodder Arnold Publication

exams. It facilitates lifelong learning. If you dip into it every so often, you'll find yourself developing as a better physician and providing a higher standard of care for your patients. Unlike the vast majority of doctors who forget everything that was once learnt, you will be an exception by keeping your knowledge alive with this book. About the author Dr. Muzzammil Ali is the founder of the Instagram page @mrcpfacts. He is currently a registrar in the United Kingdom and is training in 2 different specialties: Acute Medicine & Intensive Care Medicine. This career choice means that he has had to do many exams. So far, he has completed the MRCP Part 1, Part 2, PACES and the Acute Medicine SCE, all in his first sitting. He is currently in the process of preparing for the FFICM exams in the near future. His passion for education has translated in him being the Education Lead for the Intensive Care Unit at the Queen Elizabeth Hospital Birmingham, one of the largest tertiary hospitals in the UK. Through his revision, he faced 3 main challenges: Having little time and energy to revise Having to remember lots of information and quickly transition from one specialty to another The lack of dedicated resources to revise for the Acute Medicine SCE He wrote this book with the hope that it will help to address these challenges, and make revision manageable, enjoyable and ultimately successful! He wishes you all the best of luck in your exams!

Medicine for MRCP provides a comprehensive review of the material that you need to pass the MRCP Parts 1 and 2 written papers. The twenty-seven chapters mapped out to the RCP syllabus,

Get Free A Guide To The Mrcp Part 2 Written Paper Hodder Arnold Publication

cover all areas from molecular medicine and genetics, through to medical law and ethics. Written by specialist contributors and educational experts, the content is carefully crafted to build your understanding for both papers. Each chapter begins with the basic science required for Part 1, before covering clinical medicine for Part 1, Part 2 and the PACES examinations. To ensure effective revision, material is presented in short sections with bullet lists, tables, and boxes. Over 150 drawings and photos illustrate key principles and clinical topics making them easier to retain. References to evidence-based protocols and directions to further reading allow for deeper understanding. Candidates can review their progress via the 180 end-of chapter self-assessment questions. Drawing on the authors' expertise, *Medicine for MRCP* is the ideal companion for the MRCP as well as a useful reference guide for practicing medical doctors. *The Hands-on Guide to Clinical Reasoning in Medicine* is the perfect companion to your time on clinical placements, providing an easy-to-read, highly visual guide to help develop your clinical decision making skills, and transfer your knowledge into practice. Packed full of useful tips, key boxes, exercises and summaries that are designed to help you apply the knowledge gained in clinical practice. Divided into the common clinical placements that you would find yourself in: Respiratory,

Get Free A Guide To The Mrcp Part 2 Written Paper Hodder Arnold Publication

Cardiovascular, Neurology, Geriatrics, Gastroenterology, Nephrology, Endocrinology and Rheumatology, each chapter covers the diagnosis of common clinical conditions, as well as decision-making in their investigation and management. Written for medical students in their clinical years, as well as new doctors and advanced nurse practitioners, *The Hands-on Guide to Clinical Reasoning in Medicine* provides students with an accessible resource for honing their clinical reasoning skills. Take the stress out of clinical decision making with *The Hands-on Guide!*

The first edition of *An Aid to the MRCP Short Cases* rapidly established itself as a classic and has sold over 25,000 copies. The aims of this revised and extended second edition are the same as those of the first: to provide a comprehensive guide for those preparing for the short cases section of the Membership of the Royal College of Physicians examination. The MRCP examination is a major hurdle for all trainee hospital physicians and has a failure rate of over 70%. The largest part of the book consists of 200 short cases that are presented in order of frequency of their occurrence in the examination (based on an extensive survey of successful candidates). The clinical features of each case are fully covered and supported by illustrations and photographs. The emphasis throughout the book is on examination technique and how to

Get Free A Guide To The Mrcp Part 2 Written Paper Hodder Arnold Publication

present the clinical information in the style that the examiners expect. In short, it is an indispensable guide for anyone preparing for this critical examination.

Medical curricula change continually to reflect the evolving roles of doctors, changes in treatments and advances in technology. Medicine moves at pace and it takes a practitioner committed to continuing professional development to keep up. This new edition of 250 Cases in Clinical Medicine has been thoroughly updated to reflect the changing form of the Royal College of Physicians' curriculum. Some chapters from the previous edition have been dropped to allow new, more clinically relevant topics to be included. Chapters of symptom-based cases have also been added, as well as a section on acute medical problems and their management. Essential reading for MBBS, PLAB, MRCP (UK), MRCPI, MD (New Zealand, Malaysia, Singapore, India, Pakistan, Sri Lanka and Bangladesh), FRACP, FCCP and postgraduate medical examinations in the USA including USMLE and ABIM. This book provides a bank of multiple-choice questions for candidates preparing for Part 2 of the

Get Free A Guide To The Mrcp Part 2 Written Paper Hodder Arnold Publication

Membership examination of the Royal Colleges of Physicians, the MRCP. The questions are arranged by subject area to enable structured revision and allow candidates to focus on particular areas where they feel less confident. The book has been written with a close focus on recent examinations, with the coverage of topics weighted to reflect the frequency with which they have appeared. The book is structured more as a manual than as a mock exam, and includes explanations for both correct and incorrect answers, focusing comprehensively on the fundamental principles of medical practice. As well as candidates for the MRCP, this book will also be of interest to medical students and students of related health sciences.

A new, fully updated edition of Baliga's very popular collection of short cases arranged by clinical area, emphasising the key diagnostic features of clinical conditions as commonly presented in the short-case part of the Final MB and MRCP examinations. Also included are likely instructions or commands expected from the examiner for each condition, and the key points which the candidate must tell the examiner. A must-have for the final-year undergraduate and trainee doctor. From customer reviews of the previous edition: 'This book is the most useful guide that money can buy for the final exams in the current MBChB undergraduate course. It covers important areas of clinical medicine in a

Get Free A Guide To The Mrcp Part 2 Written Paper Hodder Arnold Publication

question based format and highlights classical scenarios. The questions raised are classical of examiners in the long and short case examinations. This is a must buy for any undergraduate medical student!!! 'The book is a must during the period that the young doctor or student is on the wards. It allows one to focus on the important physical findings and the relevant clinical pearls associated with the different medical conditions met... It discusses important physical findings and their diagnostic importance. I have found it useful in preparing for attending ward rounds and also for sharpening my clinical skills. The discussion section is well organised such that undergraduates as well as postgraduates can benefit and the material is up to date with good references for further reading.'

'Excellent preparation for finals as well the MRCP ...MUST HAVE before MRCP PACES.' Features Ideal for use in the ward. Each of the 250 cases presents a disease or topic which is covered consistently to address: ? salient features ? history ? examination ? diagnosis ? questions covering investigations and differentiations ? advanced-level questions ? management. New to this edition: Over 350 new images Enhanced advanced-level questions Many more tables

This book is the essential revision guide for neurology in the Membership of the Royal College of Physicians (MRCP). Neurology has been rated as

Get Free A Guide To The Mrcp Part 2 Written Paper Hodder Arnold Publication

the most difficult subject in MRCP examinations and there has been no concise and easy-to-use revision guide to help candidates through the exams until now. Neurology for MRCP is written by two experienced neurologists who have taught both the written (Part 1 and Part 2) and clinical (PACES) sections of the exam. This pioneering new book will also be useful for medical students sitting for their final examinations and for doctors who are preparing for the PLAB examination.

A well prepared student takes the initiative to create learning opportunities and propel themselves towards qualification; we find that the better prepared you are, the luckier you become. From the Preface The key to passing clinical finals is not a secret; adequate preparation and the ability to think logically and speak clearly are all hallmarks of a successful candidate. This unique guide gives final year students the knowledge and confidence required to pass their examinations with insiders' tips on particular information and skills required to be a top candidate. It is ideal as both a revision aid in the weeks leading up to the examination, and as an aide-memoire the night before.

The 3rd edition of PACES for the MRCP has been fully revised and updated throughout to retain its pole position as the textbook to accompany core medical training (CMT) and prepare candidates for success in the Practical Assessment of Clinical

Get Free A Guide To The Mrcp Part 2 Written Paper Hodder Arnold Publication

Examination Skills and a future specialty career. Features Fully revised for the new Station 5 and completely updated throughout. Promotes understanding and deeper learning of modern medicine applicable to PACES and the specialist registrar. Emphasis on clinical assessment – history-taking, examination and communication skills – equipping candidates with appropriate differential diagnoses from which to develop the right diagnosis. Encourages candidates to question why a diagnosis has arisen and consider its consequences. For example, ‘Heart failure’ is not a diagnosis until a candidate has considered the differential diagnoses of breathlessness and decided why heart failure is most likely, and then considered its cause (not always ischaemic heart disease), its presentation (acute, chronic, left or right ventricular or both) and, most importantly, the effects of it and its treatments on a patient’s life. This 3rd edition of PACES for the MRCP continues to provide fully revised, up-to-date, evidence-based coverage of investigations and treatments. Whilst the emphasis of PACES is on clinical skills, candidates who understand when, for example, a patient with rheumatoid arthritis might benefit from a biologic agent and how this will influence inflammatory disease, is better equipped for success. A one-volume text giving candidates complete preparation for the PACES exam within one portable volume 250 cases organised into the 5

Get Free A Guide To The Mrcp Part 2 Written Paper Hodder Arnold Publication

stations of the PACES exam – respiratory and abdominal system, history taking, cardiovascular and nervous system, communication and ethics and skin, locomotion, eyes and endocrine systems Engaging question-and-answer approach at the end of each case – excellent preparation for the exam Boxed tips highlight vital information – helps identify what is most important to remember Produced in full colour throughout Colour coding for each station Many more illustrations added - now over 300 clinical photographs and line drawings in colour Many more cases added, bringing the number up to 250 - 50 per station History-taking and communication skills stations now revised so that they exactly mimic the requirements of the exam

This book, based on the experience of a single large referral center, presents the characteristic findings obtained when using MR imaging and MR cholangiopancreatography (MRCP) to image the biliary tree and pancreatic ducts in a variety of disease settings. An introductory chapter is devoted to technical considerations, anatomy, and developmental anomalies. Subsequent chapters then present in detail the MR imaging and MRCP findings observed in choledocholithiasis, inflammatory and neoplastic disorders of the bile ducts, acute and chronic pancreatitis (according to etiology), and different pancreatic neoplasms. Dynamic MRCP with secretin stimulation is also

Get Free A Guide To The Mrcp Part 2 Written Paper Hodder Arnold Publication

illustrated, documenting both normal and abnormal responses of the pancreatic duct system to secretin. Readers will find this book to be an excellent aid to the interpretation of MR imaging and MRCP findings in patients with biliary and pancreatic disease. ? This book provides rapid revision for MRCP candidates preparing for the commonly overlooked 'Ethics and Communication Skills' section of the Practical Assessment of Clinical Examination Skills (PACES) exam. It assists you in developing an understanding of ethical issues and enhances your ability to communicate effectively with patients, their relatives and your colleagues. MRCP PACES Ethics and Communication Skills is concise and well presented for easy study and reference - perfect for breezing through revision.

This pack offers a comprehensive and trustworthy solution to anybody wishing to sit, pass, and excel at the Membership of the Royal College of Physicians Part 2 examination.

Finding the time to revise effectively is one of the greatest challenges that modern MRCP candidates face. This unique book by a recent successful candidate provides precisely what many have needed but been unable to find until now: the distilled essential knowledge required to pass the MRCP Part 2 exam. This book provides candidates with a concise and well-directed approach to fast and efficient revision, supplying comprehensive

Get Free A Guide To The Mrcp Part 2 Written Paper Hodder Arnold Publication

coverage of the MRCP syllabus and the key points of each topic. It stands apart from other MRCP revision resources in supplying both concise text and the essential lists needed to pass the Part 2 exam. To overcome the problem of approaching an examination with no syllabus, this book teaches candidates a logical exam technique, and predicts the kind of exam conditions they will encounter. Sample questions with specimen answers are provided which can be attempted under exam conditions.
