The idea of the gap year has taken hold in America. Since its development in Britain nearly fifty years ago, taking time off between secondary school and college has allowed students the opportunity to travel, develop crucial life skills, and grow up, all while doing volunteer work in much-needed parts of the developing world.

The issues raised by the role of language in education are some of the most important and contentious faced by education systems across the globe. Language is embedded in the concepts of nationhood and identity, and is therefore directly linked to the very social and political fabric of a country. In a climate of increasing globalisation, development and mobility of populations, nations around the world are concerned with the tension between cultivating a

sense of cultural and linguistic cohesion and making use of the linguistic diversity that exists in every country and region. This book examines the implications and impacts, the dilemmas and potential for language education in relation to education systems and wider society. Split into three key parts, it considers: *current issues in language education, including the role of language in maintaining power and inequalities, in encouraging participation and inclusion and in challenging the status quo; *different approaches to language education around the world; *the potential for language to provide opportunities for the disadvantaged, illustrated by case studies of three cities. This recent volume of the internationally respected World Yearbook of Education continues the tradition of offering a wide range of international perspectives from leading commentators on a universal concern. The material amassed here will be essential reading for teacher educators, education researchers and school leaders across the world. The past ten years in South Africa has seen many changes in education - the creation of a single department of education; common examinations for all learners in public schools in the country, a new outcomes based education curriculum which was introduced to learners in the general education and training phase since 1998 and will be introduced to the further education and training phase from 2006. To evaluate the success of these changes South African researchers still use the indicator of student achievement. The matriculation examination is the visible, high profile and public performance indicator. Every year parents, learners, teachers, researchers, government officials, policymakers, and the general public get involved in the debate around the matric examination with the most frequently asked questions being - Did the pass rate go up? Are standards dropping? Are the results real or have they been manipulated? How is our education system doing? Are we meeting the development goals? What should the matriculation examination of the future look like? participants from government (national and provincial),

This selection of papers presented at the 20th Comparative Germanic Syntax Workshop brings together contributions that address issues in syntactic predication and studies in the nominal system, as well as papers on data from the history of English and German. Showing a strong comparative commitment, the contributions include studies on previously neglected data on case and predicative structures in Icelandic and other Germanic languages, on the (non-)syntactic distinction of predicative vs. argument NP/DPs, on quirky V2 in Afrikaans, the pronominal system, resumptive pronouns with relative clauses in Zurich German, as well as historical papers on word-formation processes, on auxiliary selection in relation to counter factuality, and on the development of VO-OV orders in the history of English. This volume presents a wide range of studies that enrich both the theoretical understanding and the empirical foundation of comparative research on the Germanic languages.
