It is the third and final year of Fimbulvetr, the long and cold winter that precedes the end of the Nine Worlds. Midgard lies asleep under a thick layer of ice and snow. The city of men have fallen prey to ravenous wolf packs and bloodthirsty marauders. Gods, trolls and giants ready their weapons and magics for the last battle between Order and Chaos. All prepare for Ragnarok, the ultimate clash of the gods. All except Valhalla, whose tall walls are beset by deafening silence ... No singing or clash of swords can be heard. Sitting on his crumbling throne, Odin sleeps a long and dreamless sleep, waiting for the return of his memory from the inscrutable ocean of the universe and with it his strength to stand up to the Nine World and foster the flourishing of a new beginning. The book includes an essay on Norse mythology.

This book provides a comprehensive understanding of the various dimensions of India's international positioning and foreign relations. Already a dominant player in South Asian politics, India has gained a strong footing in the international pecking order with the signing of the Indo-US nuclear agreement and significant support for its claim for a permanent seat in the Security Council. The chapters presented here look at myriad aspects — India's relations with its neighbours and global powers farther afield including the US, the European Union, Russia and China; India's policies, influences and strengths; developments in economy, knowledge and innovation amid evolving global realities as well as geostrategic equations and alliances; its present and future plans vis-à-vis its standing in the world; and how international politics is likely to emerge in the coming years. The volume will be useful to academics, researchers and students of politics and international relations as also to policy practitioners and those in media interested in Indian affairs, foreign policy and international relations.

"Why is the name of Cleopatra still resonant after two thousand years? As lover of both Mark Antony and Caesar, and mother of four children by them, her name speaks of pleasure and of intimate relationship. But when Cleopatra was rendered a figure of contempt, first by Augustus, and then later by the Vatican, the desire for love became officially suspect in Christian Europe." "In the face of this contradiction, artists down the centuries responded by returning to the original Cleopatra, retelling her story and re-fashioning images of her. Mary Hamer selects a number of key examples, contextualizing them in time and place within European history. Exploring what these images meant to contemporaries, she opens up new and unexpected readings." "This updated second edition incorporates a new concluding essay examining the recent debate over the surprisingly contentious issue of Cleopatra's race."--BOOK JACKET.

The growing concern about where energy rich chemicals for the future will come from has stimulated a resurgence of interest in the potentialities of microbial fermentations to assist in meeting anticipated demands for fuels and chemicals. While much attention has been given recently to the early deployment of alcohol production plants and similar currently available technologies, the potential future developments have received much less attention. One of the intentions of the present symposium was to look ahead and try to perceive some of the prospects for future fermentation technology. In order to accomplish this, a symposium program of sizable diversity was developed with workers giving a representative cross section of their particular specialty as an indicator of the status of basic information in their area. In addition, an attempt was made to elicit from the various participants the types of fundamental information which should be generated in the coming years to enable new fermentation technology to proceed expeditiously. In organizing the symposium particular effort was made to involve workers from the academic, industrial and governmental scientific communities.

Allyn Young (1876-1929) was a deep thinker and achieved fame during his lifetime. His fame owes more to his style and influence as a teacher than his published work. His greatest fame as an author rests on a single economic paper on increasing returns and economic progress but he contributed much more as a mentor to his graduate students such as Frank Knight, Edward Chamberlin, and Lauchlin Currie at Harvard and to the undergraduate Nicholas Kaldor at the London School of Economics. He shot into international fame for his role as a member of the American delegation led by President Woodrow Wilson to negotiate peace at Paris after WWI. However, recent interest in Young is more due to his thought than to his contribution to the economics profession or public service. At the time of his death, he was working on two treatises, one on Money and the other on Economics. The one on Money was at a fairly advanced stage but no trace of either was found in his family's hasty departure from London after his untimely death. There is a general dearth of published material about Young, his thought and his life. His economic thought, apart from his views on growth theory and monetary economics, is relatively unknown. This volume offers a thematic approach to his contributions and biography.

Balls and Bulldust explores life and work among the cattlemen of the Northern Territory in Australia. This is not another cowboy story, but rather one about men and women working intensely hard while seeking some kind of solitude and sense of space in the midst of harsh conditions. For some, life in Australia's outback is a life-long routine. The young are attracted by its romanticism, but are often shattered by its hardships: days are blistering hot, nights are cold; people sleep on swags on the ground for weeks; the food is drab; red dust is ever-present; and the men are bound to saddles twelve hours a day, mustering herds of cattle, branding and castrating young bulls. Ludwigson spent three months with these fearless cattlemen early in his career, and returned to his native Sweden with a comprehensive body of work that in time became Balls and Bulldust.

Thermophilic microorganisms thrive in a variety of marine and terrestrial habitats. These organisms have evolved several biochemical and molecular strategies to counteract the deleterious effects of the high temperatures in their environments. Given that temperature is considered to be one of the most important physical factors controlling the adaptation and evolution of organisms, the remarkable ability of thermophilic microorganisms to thrive at high temperatures makes them an ideal model to study this phenomenon. Over the decades these organisms and their enzyme systems have found applications in a variety of industrial and biotechnological applications, for example the heat-stable DNA polymerases used in PCR. In this book leading scientists highlight the current progress in the most topical areas of research providing a timely overview of the field. The book reviews the ecology, enzymology and genetics of thermophiles and includes topics on the diversity and ecological roles of thermophiles, biochemical properties of thermostable biocatalysts and their applications, polyamines and the impact of viruses on thermophiles, DNA replication and metabolic engineering of thermophiles, and much more. An important feature of the book is the extensive focus on the industrial application of thermostable catalysts including alcohol dehydrogenase, glycoside hydrolase, protease and lipases. In addition the authors discuss current technical challenges and future development trends. The book is of major importance to academic microbiologists as well as those interested in industrial applications and is a recommended guide for scientists in the fields of microbiology, enzymology, molecular biology and ecology.

Learn the art of Japanese gardening with this classic, fascinating text. The Sakuteiki, or "Records of Garden Making," was written nearly one thousand years ago. It is the oldest existing text on Japanese gardening—or any kind of gardening—in the world. In this edition of the Sakuteiki the authors provide an English-language translation of this classic work and an introduction to the cultural and historical context that led to the development of Japanese gardening. Central to this explanation is an understanding of the sacred importance of stones in Japanese culture and Japanese garden design. Written by a Japanese court noble during the Heian period (794-1184), the Sakuteiki includes both technical advice on gardening—much of which is still followed in today's Japanese gardens—and an examination of the four central threads of allegorical meaning, which were integral features of Heian-era garden design. For those seeking inspiration to build a rock garden or just better understand the Japanese stone garden, the Sakuteiki is an enduring classic.

An enchanting and fascinating insight into Japanese landscape, culture, history and future. Originally written in Japanese, this passionate, vividly personal book draws on the author's experiences in Japan over thirty years. Alex Kerr brings to life the ritualized world of Kabuki, retraces his initiation into Tokyo's boardrooms during the heady Bubble Years, and tells the story of the hidden valley that became his home. But the book is not just a love letter. Haunted throughout by nostalgia for the Japan of old, Kerr's book is part paeon to that great country and culture, part epitaph in the face of contemporary Japan's environmental and cultural destruction. Winner of Japan's 1994 Shincho Gakugei Literature Prize. Alex Kerr is an American writer, antiques collector and Japanologist. Lost Japan is his most famous work. He was the first foreigner to be awarded the Shincho Gakugei Literature Prize for the best work of non-fiction published in Japan.

A Well-Worn Tallis for a New Ceremony is a study of contemporary ultra-Orthodox religiosity in Israel. This book analyzes the ongoing reconstruction of Haredi culture in Israel, a process which has been spurred on by the challenges of modernity, the worldwide resurgence of religion, and the strong sway of Israeliness. Despite its founders' and the present leadership's long-standing efforts to establish and buttress a community enclave, various modern trends and state institutions, such as secularization, consumerism, feminism, and the military, are having a profound impact on the yeshiva world. In other words, modernity is making inroads into the Jewish state's Haredi "ghetto" and transforming many aspects of everyday life. Over the course of her extended research on this community, Stadler has discerned changes in several key areas, including religious life; the family structure; and the community's interface with government authorities and the rest of the populace. Her book sheds light on all of these developments.
