While writing his celebrated Frugal Traveler column for the New York Times, Matt Gross began to feel hemmed in by its focus on what he thought of as “traveling on the cheap at all costs.” When his editor offered him the opportunity to do something less structured, the Getting Lost series was born, and Gross began a more immersive form of travel that allowed him to “lose his way all over the globe”—from developing-world megalopolises to venerable European capitals, from American sprawl to Asian archipelagos. And that's what the never-before-published material in The Turk Who Loved Apples is all about: breaking free of the constraints of modern travel and letting the place itself guide you. It's a variety of travel you'll love to experience vicariously through Matt Gross—and maybe even be inspired to try for yourself.

The world’s second-wealthiest country, Japan once seemed poised to overtake America. But its failure to recover from the economic collapse of the early 1990s was unprecedented, and today it confronts an array of disturbing social trends. Japan has the highest suicide rate and lowest birthrate of all industrialized countries, and a rising incidence of untreated cases of depression. Equally as troubling are the more than one million young men who shut themselves in their rooms, withdrawing from society, and the growing numbers of “parasite singles,” the name given to single women who refuse to leave home, marry, or bear children. In Shutting Out the Sun, Michael Zielenziger argues that Japan’s rigid, tradition-steeped society, its aversion to change, and its distrust of individuality and the expression of self are stifling economic revival, political reform, and social evolution. Giving a human face to the country’s malaise, Zielenziger explains how these constraints have driven intelligent, creative young men to become modern-day hermits. At the same time, young women, better educated than their mothers and earning high salaries, are rejecting the traditional path to marriage and motherhood, preferring to spend their money on luxury goods and travel. Smart, unconventional, and politically controversial, Shutting Out the Sun is a bold explanation of Japan’s stagnation and its implications for the rest of the world.

Logan Sellers's parole officer has issued three commandments: stay sober, stay employed, and stay out of trouble. At first Logan thought those three simple rules would be easy to follow. But that was before he accepted a side job assisting his boss's housebound agoraphobic nephew, Caleb. Caleb is deceptively normal for a guy who hasn't left his apartment in three years, and his friendly, caring personality tugs on heartstrings Logan didn't know he had. But hitting on his boss's nephew is asking to be unemployed. Logan has enough problems with booze on every corner and a supervisor trying to jump into his bed. He doesn't need to work out how to free Caleb from the anxiety that keeps him in his apartment; he needs to keep his nose clean, attend his AA meetings, and make a fresh start "alone." If only his heart would get with the program.

In *Cosmopolitan Anxieties*, Ruth Mandel explores Germany's relation to the more than two million Turkish immigrants and their descendants living within its borders. Based on her two decades of ethnographic research in Berlin, she argues that Germany's reactions to the postwar Turkish diaspora have been charged, inconsistent, and resonant of past problematic encounters with a Jewish "other." Mandel examines the tensions in Germany between race-based ideologies of blood and belonging on the one hand and ambitions of multicultural tolerance and cosmopolitanism on the other. She does so by juxtaposing the experiences of Turkish immigrants, Jews, and "ethnic Germans" in relation to issues including Islam, Germany's Nazi past, and its radically altered position as a unified country in the post-Cold War era. Mandel explains that within Germany the popular understanding of what it means to be German is often conflated with citizenship, so that a German citizen of Turkish background can never be a "real German." This conflation of blood and citizenship was dramatically illustrated when, during the 1990s, nearly two million "ethnic Germans" from Eastern Europe and the former Soviet Union arrived in Germany with a legal and social status far superior to that of "Turks" who had lived in the country for decades. Mandel analyzes how representations of Turkish difference are appropriated or rejected by Turks living in Germany; how subsequent generations of Turkish immigrants are exploring new configurations of identity and citizenship through literature, film, hip-hop, and fashion; and how migrants returning to Turkey find themselves fundamentally changed by their experiences in Germany. She maintains that until difference is accepted as unproblematic, there will continue to be serious tension regarding resident foreigners, despite recurrent attempts to realize a more inclusive and "demotic" cosmopolitan vision of Germany.

The essays collected here deal with modernist writers who, on the whole, felt 'reluctant' about their modernist status because they believed that it was just as important to look backward as it was to look forward. Indeed, for most of them looking backward was more important because it was only through the past that one could understand one's proper place in the present and in the future. That is why in Huxley's *Brave New World* it is the rejection of the past in the future - and by implication in the present - that makes its satire so penetrating. Modernism, in other words, means for these writers not a radical break with the past but a continuing search for what still connects them (and us) vitally with it. Peter Firchow, Professor of English at the University of Minnesota, is the author of several books on modern and modernist literary subjects, including books on Huxley, Conrad, and Auden. The publication of some of his hitherto uncollected essays in this volume is intended to honor
