NASA research of Earth-Moon mechanics by astrophysicist Robert Newton leads mathematicians of MSU to a breakthrough in the chronology of Russia and world history. The Issue With Czar's Helmet from the e-series History: Fiction or Science? asks why the armour of Russian warlords of 14-16th centuries was all covered with Arabic inscriptions from Quran they could not possibly read. Or could they? Russian Czars Alexander Nevsky and Ivan the Terrible wore helmets with Arabic inscriptions. Were the thousands of helmets, swords, sabres, shields, armours with Arabic inscriptions kept in Armoury of Kremlin the rich spoils of war with Arabs, Turks, or presents of their ambassadors to Russian Czars? No, they are neither the spoils of war of victorious Russian Horde troops nor the presents from subjugated kingdoms and princes. They all were made in Russia by Russian craftsmen of 14th-17th centuries.

NASA research of Earth-Moon mechanics by astrophysicist Robert Newton leads mathematicians of MSU to a breakthrough in the chronology of world history and Central Asia. The Issue With Tamerlane reports to the sceptic reader that oversized Tamerlane character reflects actually deeds and traits of two distinct persons. Moreover, not a drop of alleged Genghis blood in neither of them. Tamerlane the Ultimate Warrior was fallacious German collation of Timur Aksak the Iron Cripple of the end of 14th century and Mehmet (Mohammed) II who took Constantinople in 1453 A.D. Timur have allegedly crushed into smithereens Central Asia and Mehmet Byzantine. Too bad, Dr. Fomenko et al. found that the "Tamerlane" myth was injected into Russian history by German historians imported to Russia by Czar Peter I. This book contains enough solid evidence to silence any historian by the sheer power of facts and argumentation. Both Tamerlane ale and cocktail have red hues.

of MSU to a breakthrough in the consensual chronology and history of Eurasia. The Issue With Mongols is that this small nomad tribe did not know until 20th century how great a power they once were. Nor did Mongols know who Great Genghis Khan was and how he had conquered Eurasia, Russia, China. The "Mongolian Horde" was merely the Russian army. According to the official version of history, Russia remained under the political and military yoke of the Mongols for many centuries on end. The term "Mongol" is usually assumed to have always meant the same thing; however this turns out to be incorrect ?? the modern interpretation is of a relatively recent origin. Mongolia didn't exist as an independent state until the early 20th century! The word "Mongol" simply meant "the great one," and its association with nomadic tribes hailing from the steppes north of China is a later invention.

NASA research of Earth-Moon mechanics by astrophysicist Robert Newton leads mathematicians of MSU to a breakthrough in the chronology of the world history and Eurasia. The Great or Russian Tartary was, according to Encyclopaedia Britannica's 1771 edition, the biggest state in the world! Dr Fomenko et al. found that: a) there was no such thing as the Tartar and Mongol invasion followed by three centuries of Tartar yoke: b) the so-called "Tartars and Mongols" were the actual ancestors of modern Russians, living in a bilingual state with

Arabic spoken as freely as Russian; c) the ancient Russian state was governed by a double structure of civil and military authorities; d) the Horde in old Russian ("Ordre" in French, "Order" in English, "Orden" in German) meant "military state"; e) "invasions" were punitive operations against the regions that attempted tax evasion. This enormous state has disappeared without a trace from all subsequent editions of Britannica. USSR follows suite.

US research of Earth-Moon mechanics by NASA astrophysicist Robert Newton leads mathematicians of MSU from MSU to a breakthrough in the chronology of civilization and Russia. The Issue With Baptism of Russia reports to the readers that there were four baptisms of Russia according to canonical Russian Orthodox Church literature and not just one of 989 A.D. ordered by Prince Vladimir as it is told by schoolbooks for the last 400 years! The Issue With Baptism of Russia consists of chapters that complement and develop the reconstruction of the Russian history from the point of view of the New Chronology as related in the previous books of the History: Fiction or Science? series. The sequence of individual topics is usually of little importance, and the sections can be read in a random order. Every individual issue mentioned below is of interest per se, and can serve as basis for further research. NASA research of Earth-Moon mechanics by late

astrophysicist Robert Newton leads MSU mathematicians to a breakthrough in the chronology and history of ancient Greece. The Issue With Troy shows the amazed reader that the whole Troy story was a swindle exercised by German "archeologist" adventurer Schliemann. Indeed, the consensual localization for Homer's Troy is Hisarlik near the Hellespont straits. Herr Heinrich "Indiana" Schliemann used this hypothesis for solemnly baptizing as "Troy" the 100 by 100 meter excavation (with dynamite) site of a minuscule ancient settlement. Soon he announced the finding of gold of Priam artifacts that he himself designed and manufactured by Italian jewelers Bulgari. True name of Troy is Schliemannstadt?

NASA research of Earth-Moon mechanics by astrophysicist Robert Newton leads mathematicians of MSU to a breakthrough in the chronology of civilization and its history. Maps and Coins Vs. History shows you that scores of maps and hoards of coins contradict consensual world history and chronology. Maps and Coins Vs. History questions the numismatics per se. Dr. Fomenko et al. take a close look at maps of 14-18th centuries that confirm the theory of the New Chronology and point to existence of an Empire present nearly over all of Eurasia. They analyze the spread all over Europe of hoards of coins, they note numerous peculiarities like coins of kings and princes minted with Arab and Turkic inscriptions. Why neither the coins, nor maps prior to the 15th century match the consensual history and

chronology?

NASA research of Earth-Moon mechanics by astrophysicist Robert Newton leads mathematicians of Moscow State University to a breakthrough in the chronology of civilization and China. The Issue With Chinese Astronomy is that it just cannot serve anymore as solid foundation of "ancient" Chinese history. It looks like "ancient" China is a misunderstanding at best. There are many preconceptions concerning the history of China. It is presumed to be exceptionally ancient, a lot more so than European history, and its datings are said to be perfectly reliable. The basics of Chinese chronology are believed to be so firm that it serves as a classical example of an indubitably ancient and reliable chronology. The authors give a brief description of the real situation with Chinese history and chronology as opposed to whatever is advertised. The authors are far from claiming that their reconstruction is complete. The work on the reconstruction of Chinese history has only just begun.

NASA research of Earth-Moon mechanics by astrophysicist Robert Newton leads mathematicians of MSU to a breakthrough in the chronology of world history and Russia. The oversize ominous figure of Ivan the Terrible, with his 7 wives and 4 sons, allegedly ruling from 1530 to 1584, was a collation of 4 different real persons. The official history hides the struggle of dynasties and civil wars of the Great Strife. The first Ivan IV accessed the throne in 1547, when he was barely 16, conquered Kazan in 1552, fell mentally ill and died in 1553. The second Ivan IV (Dimitry, the elder son of the first) inherited the throne, and Russia was ruled by a custodian council of boyars until he died in 1563. The third Ivan IV (second son of the first) inherited the throne, and Russia again was ruled by a custodian council of boyars until his death in 1572. The fourth Ivan IV (Simeon Ivan III) ruled until 1584. The figmental figure of Ivan the Terrible was fed into Russian history by German historians. Guess why?

NASA research of Earth-Moon mechanics by astrophysicist Robert Newton leads mathematicians of MSU to a breakthrough in the chronology of Apocalypse. The astronomical aspect of the Apocalypse stayed hidden for centuries. The Apocalypse as Seen by Astronomy has resurrected the astrological, i.e. astronomical ideas contained in the Apocalypse and extracted from it the precise date of its composition on the Isle of Patmos! St. Augustin was quite right saying, "Beware of mathematicians, especially when they speak the truth!" The only moment on the time axis when the constellations of the night sky visible from the Isle of Patmos correspond to the verbal Zodiac contained in the Revelation date to October 1486 A.D. and not to 56 A.D.! The Apocalypse text was provided to Erasmus by Johannes Reuchlin, his predecessor, founder of hebraism and master astrologist.

NASA research of Earth-Moon mechanics by astrophysicist Robert Newton leads mathematicians of MSU to a breakthrough in the chronology of world history and Europe. It is common knowledge that the Classical Age was followed by many centuries of utter stagnation and decline with virtually nothing happening but wars and famine and the destruction of the priceless ancient monuments. Then, during the Renaissance, the Classical authors reappear from oblivion, Latin and Greek become resurrected as the intelligentsia Esperanto of the Middle Ages, numerous manuscripts reappear from oblivion to be copied, enter wide circulation, and vanish again, never to be found. How preposterous would it be to suggest that there were no

Dark Ages to separate the antiquity from the Renaissance and that the "Re-Naissance" was in fact the Naissance of the Western European culture as we know it?

Presents the beliefs, cults, gods, and ritual practices that developed in Mediterranean region countries such as Egypt, Anatolia, Mesopotamia, Iran, Greece, and Rome from the the third millenium B.C. up to the fourth century A.D.

Tepe, who built it, and how it gave rise to legends regarding the foundations of civilization • Details the layout, architecture, and exquisite carvings at Göbekli Tepe • Explores how it was built as a reaction to a global cataclysm • Explains that it was the Watchers of the Book of Enoch and the Anunnaki gods of Sumerian tradition who created it • Reveals the location of the remains of the Garden of Eden in the same region Built at the end of the last ice age, the mysterious stone temple complex of Göbekli Tepe in Turkey is one of the greatest challenges to 21st century archaeology. As much as 7,000 years older than the Great Pyramid and Stonehenge, its strange buildings and rings of T-shaped monoliths--built with stones weighing from 10 to 15 tons--show a level of sophistication and artistic achievement unmatched until the rise of the great civilizations of the ancient world, Sumer, Egypt, and Babylon. Chronicling his travels to Göbekli Tepe and surrounding sites, Andrew Collins details the layout, architecture, and exquisite relief carvings of ice age animals and human forms found at this 12,000-year-old megalithic complex, now recognized as the oldest stone architecture in the world. He explores how it was built as a reaction to a global cataclysm--the Great Flood in the Bible--and explains how it served as a gateway and map to the sky-world, the place of first creation, reached via a bright star in the constellation of Cygnus. He reveals those behind its construction as the Watchers of the Book of Enoch and the Anunnaki gods of Sumerian tradition. Unveiling Göbekli Tepe's foundational role in the rise of civilization, Collins shows how it is connected

to humanity's creation in the Garden of Eden and the secrets Adam passed to his son Seth, the founder of an angelic race called the Sethites. In his search for Adam's legendary Cave of Treasures, the author discovers the Garden of Eden and the remains of the Tree of Life--in the same sacred region where Göbekli Tepe is being uncovered today.

Did a highly advanced civilization exist in prehistory? Is the Giza Pyramid a remnant of their technology? Then, what was the power source that fueled such a civilization? The technology of harmonic resonance, claims renowned master craftsman and engineer Christopher Dunn. In a brilliant piece of reverse engineering based on twenty years of research, Dunn reveals that the Great Pyramid of Giza was actually a large acoustical device! By its size and dimensions, this crystal edifice created a harmonic resonance with the Earth and converted Earth's vibrational energies to microwave radiation. The author shows how the pyramid's numerous chambers and passageways were positioned with the deliberate precision to maximize its acoustical qualities. This may be the same technology discovered by Nikola Tesla and the solution to our own clean energy needs.

The Yacoubian Building holds all that Egypt was and has become over the 75 years since its namesake was built on one of downtown Cairo's main boulevards. From the pious

son of the building's doorkeeper and the raucous, impoverished squatters on its roof, via the tattered aristocrat and the gay intellectual in its apartments, to the ruthless businessman whose stores occupy its ground floor, each sharply etched character embodies a facet of modern Egypt -- where political corruption, ill-gotten wealth, and religious hypocrisy are natural allies, where the arrogance and defensiveness of the powerful find expression in the exploitation of the weak, where youthful idealism can turn quickly to extremism, and where an older, less violent vision of society may yet prevail. Alaa Al Aswany's novel caused an unprecedented stir when it was first published in 2002 and has remained the world's best selling novel in the Arabic language since.

Bestselling author Peters brings back 19th-century Egyptologist Amelia Peabody and her entourage in a delicious caper that digs up mystery in the shadow of the pyramids.

Charlemagne had a formula of governance written on his mantle in Russian (sic!). What a pity he could not read it, therefore his big empire was divided between his three small grandchildren. History dissects every historical age and analyses the data from every source imaginable ??" Greek and Egyptian chronology take a good beating, and it goes rapidly downhill from there. Almagest that is supposed to have been written in the 2nd century A.D. by Ptolemy dates to 16th century; Tycho Brahe, Ptolemy and Copernicus take the blame for taking part in creation of the legend of a mythical Classical Age that never was and misdating medieval events as very ancient ones. In Astronomy Vs. History we are reminded of the crucial role of eclipses in verifying the dating of major historical events, of stone Zodiacs containing the true dates of such events. Our perception of history begins to change dramatically even before we're through with Astronomy Vs. History.

It is in

such a wise that memory plays its pranks for good or ill; for pleasure or pain; for weal or woe. It is thus that life is bittersweet, and that which has been done becomes eternal. Again, the light skiff, ceasing to shoot through the lazy water as when the oars flashed and dripped, glided out of the fierce July sunlight into the cool shade of the great drooping willow branches - I standing up in the swaying boat, she sitting still and with deft fingers guarding herself from stray twigs or the freedom of the resilience of moving boughs. Again, the water looked golden-brown under the canopy of translucent green; and the grassy bank was of emerald hue. Again, we sat in the cool shade, with the myriad noises of nature both without and within our bower merging into that drowsy hum in whose sufficing environment the great world with its disturbing trouble, and its more disturbing joys, can be effectually forgotten. Again, in that blissful solitude the young girl lost the convention of her prim, narrow upbringing, and told me in a natural, dreamy way of the loneliness of her new life. With an undertone of sadness she made me feel how in that spacious home each one of the household was isolated by the personal magnificence of her father and herself; that there confidence had no altar, and sympathy no shrine; and that there even her father's face was as distant as the old country life seemed now. Once more, the wisdom of my manhood and the experience of my years laid themselves at the girl's feet. The word "horde" meant "armed people" in old Russian (cf. "order" in English, "ordre" in French, "Orden" in German). The protostate of "Horde from Pacific to Atlantic," or Great Tartary, was a true imbroglio of colonizations, wars, religions covering most of Eurasia in 12-16th centuries. The cathedrals,

monuments, fortresses, relics, armours, swords, bibles, saints, warlords, artifacts, chronicles, maps and coins of the "Horde" abound but stay mostly misinterpreted. The European part of the Great Horde fell apart into English, French, German kingdoms in 14-16th centuries.

The first time Melanie Ross meets April Hall, she's not sure they have anything in common. But she soon discovers that they both love anything to do with ancient Egypt. When they stumble upon a deserted storage yard, Melanie and April decide it's the perfect spot for the Egypt Game. Before long there are six Egyptians, and they all meet to wear costumes, hold ceremonies, and work on their secret code. Everyone thinks it's just a game until strange things start happening. Has the Egypt Game gone too far?

A young Egyptian woman recounts her personal and political coming of age in this brilliant debut novel. Cairo, 1984. A blisteringly hot summer. A young girl in a sprawling family house. Her days pass quietly: listening to a mother's phone conversations, looking at the Nile from a bedroom window, watching the three state-sanctioned TV stations with the volume off, daydreaming about other lives. Underlying this claustrophobic routine is mystery and loss. Relatives mutter darkly about the newly-appointed President Mubarak. Everyone talks with melancholy about the past. People disappear overnight. Her own father has left, too—why, or to where, no one will say. We meet her across three decades, from youth to adulthood: As a six-year old absorbing the world around her, filled with questions she can't ask; as a college student and aspiring filmmaker pre-occupied with love, language, and the repression that surrounds her; and then later, in the turbulent aftermath of Mubarak's overthrow, as a writer exploring her own past. Reunited with her father, she wonders about the silences that have marked and shaped her life. At once a mapping of a city in transformation

and a story about the shifting realities and fates of a single Egyptian family, Yasmine El Rashidi's *Chronicle of a Last Summer* traces the fine line between survival and complicity, exploring the conscience of a generation raised in silence. NASA research of Earth-Moon mechanics by astrophysicist Robert Newton leads mathematicians of MSU to a breakthrough in the chronology of the civilization. *Crusades and Exoduses* disentangles the imbroglio of empires, kingdoms, religious wars, dynasties, battles in Eurasia from the point of view of New Chronology theory. Parallels with events in Europe and Middle East are quite abundant. We are being told that after some 1000 years of sound sleep Europeans suddenly woke up as Christians to the hilt, armed themselves, and started touring-crusading Middle East during 200 years to punish at last tormentors of Jesus, searching for the Saint Sepulcher, Grails, spears, and finished their tour with a bang by sacking Constantinople allegedly in 1204 A.D. Local populations became Muslims, crusaded back and built a Caliphate that span from Arabia to Morocco and North Africa. Was it really so?
