Now that you have been able to buy the latest Apple watch series in the market, do you know that it can do a whole lot of things than the former smart-watches? Aside from the other normal functions of making calls, sending messages, giving notifications or running apps which other smart-watches can do, do you know that this newly released watch can monitor

your blood oxygen level, give you your accurate altitude and charge faster than former versions. That is not all as you also get to activate Siri just by lifting your arm. This recently released product uses the watchOS 7.0 which is the more improved version of the operating system for the Apple watch series. The watch OS 7.0 is very compatible with Apple iPhones using iOS 14.0. Aside from this, the Apple watch series 6 has been redesigned for better performance. The processor is an A13 bionic (S6) which makes the watch about 20 % better in its speed and performance. The Apple watch series 6 can ultimately be connected to Bluetooth, Wi-Fi and ultra wideband. It also comes with a storage capacity of about 32 GB while its RAM is 1 GB. If you are concerned about knowing the details of how to operate this latest smart-watch manufactured by Apple, then, relax because this book gives you the all specifics you need to know about your device ranging from fresh features like automatic detection of hand washing and face sharing to tracking of sleep time. You will surely be a pro user of that smart-watch.

In July 2019, Apple updated the MacBook Air that was originally redesigned in October 2018. Even though there were no major updates to the MacBook Air, the enhancement led to a new butterfly keyboard which utilizes the same updated materials like the 2019 MacBook Pro, some small SSD changes, an improved display with True Tone, and a lower price tag. The MacBook Air has a T2 chip as well as fingerprint sensor for the Touch ID that can be used instead of entering password. This T2 chip is built for enhanced security on the MacBook Air by ensuring a secure boot process through Secure Enclave, and fast data encryption with an SSD controller. The macOS Catalina which was launched in October 2019, is the latest operating system for the Apple Mac family. The new software brought with it several new exciting features that may seem overwhelming even to existing users. Some of these features include the Screen Time, division of iTunes into 3

separate apps, using the iPad as a second screen, otherwise known as Sidecar and lots more. This user guide contains detailed steps on how to explore all the new features on your computer along with screenshots to make it easy for you to familiarize yourself with the workings of the macOS Catalina.
