An English Translation of Nahw Meer for the student of Arabic Grammar by Meer Syed Shareef Abul Hasan Bin Mohammed Al-Jurjani (RA). Ilim un Nahw is that science which teaches us how to join Nouns, Verbs and Particles to form a complete sentence and what the vowel of the last letter of each word should be. This science started from the time of Omar bin Al-Khattab (RA) when one of the Bedouins read part of the Ayah 3 of Surah At-Tauba with a Kasrah at the very end as rasulih instead of Dammah as in rasuluhu. This changed the meaning from "that Allah and His prophet are free from obligations to the polytheists" to "that Allah is free from obligations to the polytheists and His prophet". The Bedouin said if Allah dissolves his obligations to His prophet, so do I. After this incidence, Omar (RA) ordered that rules of Nahw be created. Why this book? First Meer Ali ibn Mohammed Al-Jurjani, the Author of Nahw Meer, does not need any introduction. His masterful book has been in use for centuries mostly in its original language of Persian and its Arabic and Urdu translations and it is taught in many schools in Indian subcontinent and other parts of the world. I felt, that there is a need for a literal translation in today's English for those of us who are more comfortable with it.

This book is the first comprehensive account of the phonology and morphology of Arabic. It is a pioneering work of scholarship, based on the author's research in the region. Arabic is a Semitic language spoken by some 250 million people in an area stretching from Morocco in the West to parts of Iran in the East. Apart from its great intrinsic interest, the importance of the language for phonological and morphological theory lies, as the author shows, in its rich root-and-pattern morphology and its large set of guttural consonants. Dr Watson focuses on two eastern dialects, Cairene and San'ani. Cairene is typical of an advanced urban Mediterranean dialect and has a cultural importance throughout the Arab world; it is also the variety learned by most foreign speakers of Arabic. San'ani, spoken in Yemen, is representative of a conservative peninsula dialect. In addition the book makes extensive reference to other dialects as well as to classical and Modern Standard Arabic. The volume opens with an overview of the history and varieties of Arabic, and of the study of phonology within the Arab linguistic tradition. Successive chapters then cover dialectal differences and similarities, and the position of Arabic within Semitic; the phoneme system and the representation of phonological features; the syllable and syllabification; word stress; derivational morphology; inflectional morphology; lexical phonology; and post-lexical phonology. The Phonology and Morphology of Arabic will be of great interest to Arabists and comparative Semiticists, as well as to phonologists, morphologists, and linguists more generally.

This concise and well-organised grammar of classical Arabic, here translated from its original German into English for the first time, provides students of Arabic with a highly useful reference tool. While brief enough to be used with efficiency, the book is also rich in content and thorough in its coverage. Beginning- or advanced-level students working on classical texts and styles will find this grammar quick to use, reliable, and up-to-date. More than just a translation into English, this edition of Woldietrich Fischer's Grammar of Classical Arabic includes many revisions and additions provided by Rodgers. In particular, the chapter on syntax offers numerous new text examples and other improvements. The bibliography has been updated to include significant recent contributions to the field of classical Arabic grammar and linguistics. Translated by Jonathan Rodgers with attention to both accuracy and readability, this book is an accessible reference tool that every student of classical Arabic will want to have on hand.
