That man is a social being is almost axiomatic. Our interpersonal relations can be sources of the most rewarding or the most painful of human experiences. To a large measure our accomplishments in life depend on the facility with which we interact with others-our social skill. The acquisition of social skills is, of course, a natural part of the overall socialization process. However, in many instances it becomes necessary or desirable to develop further an individual's social facilities. Such skill development is the topic of this book. Two major goals were kept in mind in the writing of this book. The first was to provide a conceptual framework within which to view social skills. Such a framework allows one to understand why it is important to develop social skills, and the effects that such skill development should have. If the reader has a thorough understanding of the concept of social skills and their development, it becomes possible to make appropriate innovations and adaptations to his or her own circumstances. Without such a framework, social-skills training becomes little more than a collection of disjointed techniques. Also, without a conceptual understanding, procedural innovations are difficult to incorporate into training.

In everyday life, we often suppose ourselves to be free to choose between

several courses of action. But if we examine further, we find that this view seems to rest on metaphysical and meta-ethical presuppositions almost all of which look problematic. How can we be free if everything is determined by factors beyond our control, stretching back in time to the Big Bang and the laws of nature operating then? The only alternative to determinism is indeterminism, but is not indeterminism just there being a certain amount of randomness in the world? Does not randomness hinder you from being the author of your actions? *Free Will: A Guide for the Perplexed* looks at how much of the structure of our everyday judgments can survive the arguments behind such questions and thoughts. In doing so, it explores the alternative arguments that have been advanced concerning free will and related notions, including an up-to-date overview of the contemporary debates. In essence, the book seeks to understand and answer the age-old question, 'What is free will and do we have it?'

Building Histories offers innovative accounts of five medieval monuments in Delhi—the Red Fort, Rasul Numa Dargah, Jama Masjid, Purana Qila, and the Qutb complex—tracing their modern lives from the nineteenth century into the twentieth. Mrinalini Rajagopalan argues that the modern construction of the history of these monuments entailed the careful selection, manipulation, and regulation of the past by both the colonial and later postcolonial states. Although framed as objective “archival” truths, these histories were meant to erase or marginalize the powerful and persistent affective appropriations of the monuments by groups who often existed outside the center of power. By analyzing these archival and affective histories together, Rajagopalan works to redefine the historic monument—far from a symbol of a specific past, the monument is shown in Building Histories to be a culturally mutable object with multiple stories to tell.

Empathy and social smarts help you earn free book publicity by connecting you with key people, media, schools, and the publications of nonprofit agencies. As a writer, you can promote your own book and earn free book publicity by connecting key people, media, and nonprofits' newsletters with schools. Social intelligence used in book promotion is like a three-ring circus. Use empathy, that is people smarts, as a catalyst to bring together schools, nonprofit agencies, and authors. Observe, simplify, and offer commitment as charisma. Query editors of nonprofit publications. These nonprofit agencies often publish high-circulation newsletters and sometimes also publish sizable, glossy magazines. Some produce videos or documentaries. To connect with the nonprofit agencies' editors, use your social intelligence skills to make connections in the nonprofit agencies' public relations and communications departments. Join public relations societies, national associations, and help out the nonprofit agencies or organizations of your choice focusing on what gets published in their magazines or newsletters. If you want to earn free publicity for your book, supply these editors with facts, findings, and trends. Bring the nonprofits in contact with schools. When you talk to school assemblies or classrooms, relate your book topic to any specific work or project done by a nonprofit association for whom you could write an article for that association's newsletter or glossy magazine. Use social intelligence to connect to people. What you need to earn free publicity is self-awareness and an understanding of how the main topic of your book influences your own behavior and how others perceive your behavior.
