Public and private investors want timely, accurate financial information about institutions before investing. This requires adherence to internationally accepted financial disclosure standards. However, implementing these standards is a particular challenge for economies in transition from the Soviet-era central planning approach toward a market economy. The Asian Development Bank provided a technical assistance grant (TA 6505- REG) to build capacity to enhance financial disclosure standards in Armenia, Azerbaijan, and Georgia. The book is a compendium of the project's findings, activities, results, and recommendations. It discusses the rationale for the adoption of International Financial Reporting Standards and the enforcement of International Standards on Auditing by legal entities, and explores their use by small and medium-sized enterprises in the three countries. The book is a valuable guide to accountants, auditors, financial institutions, regulators, investors, governments, researchers, and others interested in financial disclosure practices and progress of these transitional nations.

This new edition is written with two major objectives: (1) to help readers understand audit decision making and evidence accumulation, and (2) reflect changes in the profession by integrating assurance and attestation service as well as risk issues. This 6th edition introduces two new tools that practitioners use to assess risk and to identify assurance service opportunities: Client Strategy Templates and Balanced Scorecards.

As auditors, we are trained to investigate beyond appearances to determine the underlying facts—in other words, to look beneath the surface. From the Enron and WorldCom scandals of the early 2000s to the financial crisis of 2007–2008 to present-day issues and challenges related to significant estimation uncertainty, understanding the auditor's responsibility related to fraud, maintaining a clear perspective, probing for details, and understanding the big picture are indispensable to effective auditing. With the availability of greater levels of qualitative and quantitative information ("big data"), the need for technical skills and challenges facing today's auditor is greater than ever. The author team of Louwers, Blay, Sinason, Strawser, and Thibodeau has dedicated years of experience in the auditing field to this new edition of Auditing & Assurance Services, supplying the necessary investigative tools for future auditors.

Auditing: An International Approach (formerly titled Auditing and Other Assurance Engagements) presents a comprehensive, balanced, and current introduction to the auditing field.
