"A breakthrough method-grounded in almost 100 years of scientific research-to master all types of diabetes by reversing insulin resistance"--

For fans of the New York Times bestseller *I Quit Sugar* or Katie Couric's controversial food industry documentary *Fed Up*, *A Year of No Sugar* is a "delightfully readable account of how [one family] survived a yearlong sugar-free diet and lived to tell the tale...A funny, intelligent, and informative memoir." —Kirkus It's dinnertime. Do you know where your sugar is coming from? Most likely everywhere. Sure, it's in ice cream and cookies, but what scared Eve O. Schaub was the secret world of sugar—hidden in bacon, crackers, salad dressing, pasta sauce, chicken broth, and baby food. With her eyes opened by the work of obesity expert Dr. Robert Lustig and others, Eve challenged her husband and two school-age daughters to join her on a quest to quit sugar for an entire year. Along the way, Eve uncovered the real costs of our sugar-heavy American diet—including diabetes, obesity, and increased incidences of health problems such as heart disease and cancer. The stories, tips, and recipes she shares throw fresh light on questionable nutritional advice we've been following for years and show that it is possible to eat at restaurants and go grocery shopping—with less and even no added sugar. *Year of No Sugar* is what the conversation about "kicking the sugar addiction" looks like for a real American family—a roller coaster of unexpected discoveries and challenges. "As an outspoken advocate for healthy eating, I found Schaub's book to shine a much-needed spotlight on an aspect of American culture that is making us sick, fat, and unhappy, and it does so with wit and warmth."—Suvir Sara, author of *Indian Home Cooking* "Delicious and compelling, her book is just about the best sugar substitute I've ever encountered."—Pulitzer Prize-winning author Ron Powers "As women approach the age at which they stop having their monthly period, many start to experience the physical and emotional indignities of hormonal fluctuation and an ensuing "metabolic stall." The result: hot flashes, night sweats, insomnia, weight gain, memory loss or brain fog, irritability, and discomfort during sex. Many women are resigned to accept these changes now and for years to come; some even agree to be unnecessarily medicated for their symptoms. But Dr. Anna Cabeca's research and experience with thousands of her patients shows that there is a unique diet combination and non-pharmaceutical lifestyle interventions that can dramatically alleviate these symptoms--forever! Pairing the hallmarks of ketogenic eating (very low carb, high fat) with foods and lifestyle changes that bring the body's pH to an alkaline level (and lower cortisol production), *The Hormone Fix* offers women everywhere an easy-to-follow, easy-on-the-body program to help thrive through menopause and beyond. It includes recipes, meal plans, stress-reduction advice, testimonials from real women, and a 10-day quick start guide to help women trim down, get off of meds, get fit, tap into unexpected energy levels, enhance intimacy levels, and completely revitalize their lives"--
