Highlights the state of affairs in nine districts of the erstwhile Central Provinces and Berar, alongwith the interpretation of unknown facts, enlarging it from objective empiricism to historicism on the basis of sociological and historical perspectives. Salient Features (i) It identifies the changeability of the educational pattern from indigenous nature to modern perspectives at all levels. (ii) It highlights the emergence of leadership, new values, nationalism and freedom struggle and also shows how education works as condition, instrument and as an effect of social change in the region. (iii) It explains the extent of adoption and non-adoption of educational facilities at all levels in the context of socio-cultural conditions. (iv) It reveals how English models were initiated too slavishly, students were being crammed with undigested knowledge and teachers obsessed with results. (v) It highlights the Hitavada's relentless crusade for a separate university, forecast of Jabalpur and Amravati Universities and demand for more autonomy in the province. (vi) It shows how the period of four decades in question transformed a society. (vii) It refers over-all educational backwardness of females, low-castes and aboriginal tribes with a growing assertion of claims to social and political recognition. (viii) It reveals how minorities' interest in education became manifest through conferences and C.P. Legislative Council. (ix) It highlights positional and structural changes occurred due to education. In short, this book shows how poor

Interest in the science, technology and medicine of India under British rule has grown in recent years and has played an ever-increasing part in the reinterpretation of modern South Asian history. Spanning the period from the establishment of East India Company rule through to Independence, David Arnold's wide-ranging and analytical survey demonstrates the importance of examining the role of science, technology and medicine in conjunction with the development of the British engagement in India and in the formation of Indian responses to western intervention. One of the first works to analyse the colonial era as a whole from the perspective of science, the book investigates the relationship between Indian and western science, the nature of science, technology and medicine under the Company, the creation of state-scientific

India has a strong and ancient tradition of astronomy, which seamlessly merges with the current activities in Astronomy and Astrophysics in the country. While the younger generation of astronomers and students are reasonably familiar with the current facilities and the astronomical research, they might not have an equally good knowledge of the rich history of Indian astronomy. This particular volume, brought out as a part of the Platinum Jubilee Celebrations of Indian National Science Academy, concentrates on selected aspects of historical development of Indian astronomy in the form of six invited chapters. Two of the chapters – by Balachandra Rao and M.S. Sriram – cover ancient astronomy and the development of calculus in the ancient Kerala text Yuktibhasa. The other four chapters by B.V. Sreekantan, Siraj Hasan, Govind Swarup and Jayant Narlikar deal with the contemporary history of Indian astronomy covering space astronomy, optical astronomy, radio astronomy and developments in relativistic astrophysics. These chapters, written by experts in the field, provide an in-depth study of the subject and make this volume quite unique.

you do not have to be a genius to get a first at university. He sets out to de-mystify first-class degrees in the arts, humanities and social sciences, clearly articulating the difference between the excellent and the merely competent in undergraduate work. This concise, no-nonsense guidebook will give prospective and current students advice on teaching and learning styles that prevail in university and on how to manage their two most important resources - their time and their lecturers. In an accessible and entertaining style, the author looks at subjects such as: making the transition from school to university developing transferable skills making use of lectures and seminars using libraries and the Internet note-taking, essays, seminars and presentations common mistakes to avoid writing with clarity and style revision and examinations.

Illustrated with many examples from a range of academic disciplines, *How to Get a First* is an all-purpose guide to success in academic life. Visit the companion website www.getafirst.com
