Thinking tasks, quick questions and checklists help students track their progress.

A revision guide tailored to the AS and A Level Chemistry syllabus (9701) for first examination in 2016.

Specifically tailored for the new 2016 AQA GCSE Science (91) specifications, this third edition supports your students on their journey from Key Stage 3 and through to success in the new linear GCSE qualifications. These revision guides will help students revise key concepts, and provide plenty of differentiated practice questions and support.

Chemistry by Example is the second book in a GCSE revision guide series. Along with Physics by Example it is a proven successful way of consolidating and reaffirming scientific facts and concepts for students who are studying GCSE

Chemistry. My books are aimed at the AQA courses in particular, but the areas covered cover all other exam boards as well. My guides are unique in that they are based upon using example questions of which each book has over 200 questions, and they are broken down into specific topic areas. Students will find around 10 example questions for every topic, with the questions being varied in style. Importantly the answers are included and broken down, step by step so they can be easily followed and understood. At the end of each chapter there is a self-testing section with space provided for workings and then followed by the answers.

Get your best grades with this exam-focused text that will guide you through the content and skills you need to prepare for the big day. Manage your own revision with step-by-step support from experienced examiner and author David Bevan. This guide also includes a Questions and Answers section with exam-style questions, student's answers for each question, and examiner comments to ensure you're exam-ready.

- Plan and pace your revision with the revision planner
- Use the expert tips to clarify key points
- Avoid making
