In the year 2003, Lady Luck reached out to a hard-living, hard-working family in a small town in Orange County, New York. That was when a team from the Discovery Channel began filming the custom chopper shop of Paul "Senior" Teutul, his son Paulie, and the rest of their highly dysfunctional, totally authentic crew as they did what they do best: make great custom-crafted bikes from the ground up. Within a few episodes, the Teutuls were famous: for their hilarious head-butting, their outrageous yelling, their amazing designs, and, most of all, for being real every step of the way. With their hit show American Chopper turning into the Discovery Channel's top-rated program, the Teutuls became unlikely national icons. Now the Teutuls tell their story as it has never been told before. Senior chronicles his harrowing journey from a hell-raising teen to a star-crossed businessman desperately trying to keep his demons at bay. And Paulie remembers working by his father's side in their ironworks shop-and the bond that developed between them when they first built an EVO-powered custom chopper from scratch. From youngest son Mikey's entrance into the shop to all the other members of the extended OCC family, this is a chronicle of Panheads and Softails turned into gleaming works of art, of Old School design versus Paulie's amazing theme bikes that took custom biking by storm-and earned the Teutuls some of the most famous clients in the world. With over 60 family archive photos that capture this true rags-to-riches saga, ORANGE COUNTY CHOPPERS is the raw, honest story of a family that was born to be wild, how they came together around a shared passion and skill-and how they captured the heart of America.

Before choppers, there was the bobber. When American-brand motorcycle owners needed to change their rear tires decades ago, the rear fender featured a hinge near its center that would flip up to make room for the tire to be removed. At some point, an enterprising rider decided to permanently remove the hinged rear portion of the fender - shortening the fender like the "bobbed" hair cuts popular during those days - or so the theory goes. The tradition of stripping down to a bike's bare essence and celebrating its simpler forms - making a bobber - was begun. As these lean, mean machines come roaring back onto the scene in a big way, this book offers a look at where the bobber came from, where it's going, and what it's about. With over 200 exclusive photographs of the most cutting-edge bobbers, biographies of the men and women who build them, and inside stories on top shops like Indian Larry, Von Dutch Kustoms, Orange County Choppers, Arlen Ness, Mitch Bergeron, and more. This book captures the rebel spirit of the ultimate custom bike as never before. Publisher's Note: This edition includes a poster on the reverse of the book's jacket.

"If you ask men if they spend any time hiding, they usually look at you as if you're nuts. 'What, me hide?' But if you ask women whether men hide, they immediately know what you mean."—from *Where Men Hide* *Where Men Hide* is a spirited tour of the dark and often dirty places men go to find comfort, camaraderie, relaxation, and escape. Ken Ross's striking photographs and James Twitchell's lively analysis trace the evolution of these virtual caves, and question why they are rapidly disappearing. Ross documents both traditional and contemporary male haunts, such as bars, barbershops, lodges, pool halls, strip clubs, garages, deer camps, megachurches, the basement Barcalounger, and Twitchell examines their provenance, purpose, and appeal. He finds that for centuries men have met with each other in underground lairs and clubhouses to conduct business or, in the case of strip clubs and the modern rec room, to bond and indulge in shady entertainments. In these secret dens, certain rules are abandoned while others are obeyed. However, Twitchell sees this less as exclusionary behavior and more as the result of social anxiety: when women want to get together, they just do it; when men get together, it's a production. Drawing on literary, historical, and pop cultural sources, Twitchell connects the places men hide with figures like Hemingway and Huck Finn, Frederick Jackson Turner's theory of the American frontier, and the mythological interpretations of Joseph Campbell and Robert Bly. Instead of blaming the disappearance of the man-cave solely on feminism, simple fair play, or the demands of Title IX, Twitchell believes this evaporation is due as well to the rise of solitary pursuits such as driving, watching television, and playing videogames. By blending together anecdote, research, and keen observation, Ross and Twitchell bring this little-discussed and controversial phenomenon to light.
