In Bringing the Prophets to Life, Rabbi Neil Winkler offers us a masterful source of inspiration and insight into the early prophets. He shows us that in order to understand the vital messages of the stories, we must go beyond a simple translation of the text and identify the themes of the stories, as well as the struggles and challenges that faced the outstanding personalities of each era: the warriors and the women, the prophets and the kings.

Due to the rise in petroleum prices as well as increasing environmental concerns, there is a need to develop biochemicals and bioproducts that offer realistic alternatives to their traditional counterparts; this book will address the lack of a centralized resource of information on lubricants and greases from renewable sources, and will be useful to a wide audience in industry and academia. It is based on 20 years of research and development at the UNI-NABL Center, and discusses the various types of vegetable oils available, comparing their characteristics, properties and benefits against those of typical petroleum oils as well as discussing common evaluation tests and giving examples and case studies of successful applications of biobased lubricants and greases. Whilst scientific and engineering research data is included, the book is written in an accessible manner and is illustrated throughout. Focuses on an industrial application of lubrication technology undergoing current explosive growth in the global market. Includes a detailed review of the material benefits of plant-based lubricants that include a better viscosity index and lubricity even at extreme temperatures, lower flammability due to higher flash points and lower pour points. Covers the basic chemistry of vegetable oils as well as their profiles for use in lubricants and greases and environmental benefits. Includes examples and case studies of where vegetable-based lubricants have been successfully employed in industry applications.

Anyone who relies upon a word processor to produce documentation relating to healthcare must have a dependable medical spellchecker. This audience, while incredibly broad in its potential, primarily includes medical transcriptionists, medical records departments, medical editors and writers, academics,

physicians, researchers, and healthcare professionals. In most of these fields, accuracy of the written word is mandatory: an inaccurate representation of medical terminology in medical documentation can lead to legal action, errors in medical practice, and errors in coding and reimbursement. In addition, no other discipline has such a dynamic, expanding language base, as new terms are rapidly introduced and constantly evolving. With this knowledge, it is easy to understand why Stedman's Plus Medical/Pharmaceutical Spellchecker is LWW's highest-revenue generating software product, and MLR's highest-generating annual product. In 2006, Stedman's Plus sold over $2.5 million (which does not include revenue booked through Rights, Licensing and Permissions group). In 2007, Stedman's Plus 2006 has sold $900K million (04.07 YTD) which does not include revenue booked through Rights, Licensing and Permissions group. Terry Eagleton explains that freedom, for Marx, entailed release from commerciallabour, "a kind of creative superabundance over what is materially essential". Eagleton outlines the relationship between production, labour and ownership which lie at the core of Marx's thinking. Marx's utopia was a place in which labour is increasingly automated, emancipating the wealth of sensuous individualdevelopment so that "savouring a peach [is an aspect] of our self-actualisation as much as building dams".

First published in 1962, this book provides a systematic account of the development of Plato's theory of knowledge. Beginning with a consideration of the Socratic and other influences which determined the form in which the problem of knowledge first presented itself to Plato, the author then works through the dialogues from the Meno to the Laws and examines in detail Plato's progressive attempts to solve the problem.

A light canoe of bark, containing a single human figure, moved swiftly up one of the twin streams that form the Ohio. The water, clear and deep, coming through rocky soil, babbled gently at the edges, where it lapped the land, but in the center

the full current flowed steadily and without noise. The thin shadows of early dusk were falling, casting a pallid tint over the world, a tint touched here and there with living fire from the sun, which was gone, though leaving burning embers behind. One glowing shaft, piercing straight through the heavy forest that clothed either bank, fell directly upon the figure in the boat, as a hidden light illuminates a great picture, while the rest is left in shadow. It was no common forest runner who sat in the middle of the red beam. Yet a boy, in nothing but years, he swung the great paddle with an ease and vigor that the strongest man in the West might have envied. His rifle, with the stock carved beautifully, and the long, slender blue barrel of the border, lay by his side. He could bring the paddle into the boat, grasp the rifle, and carry it to his shoulder with a single, continuous movement. His most remarkable aspect, one that the casual observer even would have noticed, was an extraordinary vitality. He created in the minds of those who saw him a feeling that he lived intensely every moment of his life. Born and-bred in the forest, he was essentially its child, a perfect physical being, trained by the utmost hardship and danger, and with every faculty, mental and physical, in complete coordination. It is only by a singular combination of time and place, and only once in millions of chances, that Nature produces such a being.

Your hard work is paying off. You are doing well in your field. But there is something standing between you and the next level of achievement. That something may just be one of your own annoying habits. Perhaps one small flaw - a behaviour you barely even recognise - is the only thing that's keeping you from where you want to be. It may be that the very characteristic that you believe got you where you are - like the drive to win at all costs - is what's holding you back. As this book explains, people often do well in spite of certain habits rather than because of them - and need a "to stop" list rather than one listing what "to do". Marshall Goldsmith's expertise is in helping global leaders overcome their unconscious annoying habits and become more successful. His one-on-one coaching comes with a six-figure price tag - but in this book you get his great advice for much less. Recently named as one of the world's five most-respected executive coaches by Forbes, he has worked with over 100 major CEOs and their management teams at the world's top businesses. His clients include corporations such as Goldman Sachs, Glaxo SmithKline, Johnson and Johnson and GE.
