"Human beings have forgotten their instructions" That is how many of the Native elders responded to Manitonquat when he traveled the continent over forty years ago seeking answers to the questions "What is wrong with people? Why is there war, violence, oppression, greed, injustice, poverty, indifference and destruction of the environment?" Sitting with and listening to many elders of First Nations from all parts of North America, he began to form a clearer idea of what they often called "the Original Instructions". All of Creation is formed by them – what some refer to as Natural Law, Dharma, or Tao. Those instructions for successful and happy relationships with families and communities and with all life, the Earth and the Cosmos, were passed down through the generations by elders of the indigenous peoples, who lived successfully and happily by them until they were invaded by newer cultures of domination, oppression and greed. These elders are becoming more rare as fewer and fewer young people have access to their

wisdom and more and more follow the destructive ways of the dominant culture in materialism and self-centeredness. Manitonquat, a Wampanoag elder now in his 80th year, is a direct link to the old ways of the people. In a culture of domination there is more violence, more fear, more isolation, and less love and happiness than in the old ways of all people at one time, ways of cooperation and equality, of respect and relatedness and thanksgiving. Manitonquat was told by the elders that since he had been taught the skills of communication in the university he was meant to bring their teachings to the world (as they said they were not Indian but Human Being teachings), to any who sought and wished for that knowledge. Doing that in books and talks all over the world, he has acquired added insight into the problems of society today and a unique perspective in bringing circles to many prisons weekly for the past 25 years.

Technologies and Approaches to Reducing the Fuel Consumption of Medium- and Heavy-Duty Vehicles evaluates various technologies and methods that could improve the fuel economy of medium- and heavy-duty vehicles, such as tractor-trailers, transit buses, and work trucks. The book also recommends approaches that federal agencies could use to regulate these vehicles' fuel consumption. Currently there are no fuel consumption standards for such vehicles, which account for about 26 percent of the transportation fuel used in the U.S. The miles-

per-gallon measure used to regulate the fuel economy of passenger cars. is not appropriate for medium- and heavy-duty vehicles, which are designed above all to carry loads efficiently. Instead, any regulation of medium- and heavy-duty vehicles should use a metric that reflects the efficiency with which a vehicle moves goods or passengers, such as gallons per ton-mile, a unit that reflects the amount of fuel a vehicle would use to carry a ton of goods one mile. This is called load-specific fuel consumption (LSFC). The book estimates the improvements that various technologies could achieve over the next decade in seven vehicle types. For example, using advanced diesel engines in tractor-trailers could lower their fuel consumption by up to 20 percent by 2020, and improved aerodynamics could yield an 11 percent reduction. Hybrid powertrains could lower the fuel consumption of vehicles that stop frequently, such as garbage trucks and transit buses, by as much 35 percent in the same time frame.

This comprehensive resource covers a broad array of research strategies available to massage therapists to give them the tools they need to be knowledgeable readers of research literature, as well as active researchers. The primary focus of the book is on the quantitative aspect of research that encompasses the principal types of studies most extensively used in the various health care professions, specifically massage therapy. Extensive coverage is also given to the qualitative and integrative research categories that are progressively gaining recognition among researchers in various health science

disciplines and professions. Accommodates the March 2003 mandate from the Commission on Massage Therapy Accreditation (COMTA) that massage therapy schools incorporate into their curricula provisions to ensure a research literate profession. Examples and techniques for interpreting research guide practitioners and students to be knowledgeable readers of massage therapy research, allowing application to practice. Relies heavily on concept maps, flowcharts, tables, and illustrations and excerpts of published studies to augment the book's narrative development of topics by providing pictorial displays and summaries of the material. Literature-based and hypothetical research examples/illustrations from several manual therapy professions employing therapeutic massage make the material pertinent to real-life settings An introductory section at the beginning of each chapter reviews the material covered in the previous chapter and how it relates to the new material. Chapter coverage spans the quantitative, qualitative, and integrative research categories and affiliated research strategies and methods are considered in detail. Review/summary tables give an overview of the narrative development of topics. Boxes provide the essential features of a given topic. Relies on multiple examples of possible research scenarios and illustrative excerpts from the published research literature. Content is cross-referenced for use with the Massage Therapy Foundation's Massage Therapy

Soils and sediments influence current processes, preserve evidence of past processes, indicate evolutionary phases in landscapes and provide a basis for relative and absolute chronologies. They provide an important key to the integration of short-term process studies and investigation of longer-term landform evolution. This book, first published in 1985, has been arranged to provide wide temporal and spatial coverage, with studies ranging from historic to geologic time scales and micro- to macro-spatial scales. The interdisciplinary nature of the subject is reflected in contributions from soil scientists, engineering geologists, hydrologists and geomorphologists.

Get the real guidance you need to create and build your first startup company from founders who have been there many times before. The first run printing of *The Startup Playbook* SOLD OUT! So, we revised, expanded, and improved this second edition, including a new foreword by Brad Feld, author of *Venture Deals*. We still give our personal, how-to guide for building your startup from the ground up. You'll find a collection of the major lessons and shortcuts we've learned that will shift the odds in your favor. We're sharing our tips, secrets, and advice in a frank, founder-to-founder discussion with you. We make no bones about our bias. We're on your side, the founder's side. While venture capitalists, investors, and accelerators/incubators can add great value in the startup ecosystem, this book isn't about their points of view. We'll tell you where our interests as founders diverge from those on the other side of the table—investors, bankers, advisors, board members, and others—and what to do when that happens. *The Startup Playbook* is not a recipe, it's not a template, it's not a list of tasks to do. It's our insider's guide to starting a company and running it successfully in those critical early months. Between us, we've started over a dozen high-tech software companies and raised over \$500 million in investment capital. We've acquired over thirty-five companies, had three of our startups go public, sold six of them, and we made billions of dollars for shareholders. We've also invested in over eighty startups, advised and mentored over two hundred companies and actively worked with venture capitalists (VCs), incubators, and accelerators to help launch many other new startups. We've had plenty of failures, too. And we've probably learned more from those than from the successes. We share those lessons as well. *The Startup Playbook* is full of our advice, guidance, do's, and don'ts from our years of experience as founders many times. We want to share our hard-earned knowledge with you to
