TRB's National Cooperative Highway Research Program (NCHRP) Report 716: Travel Demand Forecasting: Parameters and Techniques provides guidelines on travel demand forecasting procedures and their application for helping to solve common transportation problems.

There has been much attention paid to the idea of Smart Cities as researchers have sought to define and characterize the main aspects of the concept, including the role of creative industries in urban growth, the importance of social capital in urban development, and the role of urban sustainability. This book develops a critical view of the Smart City concept, the incentives and role of governments in promoting the development of Smart Cities and the analysis of experiences of e-government projects addressed to enhance Smart Cities. This book further analyzes the perceptions of stakeholders, such as public managers or politicians, regarding the incentives and role of governments in Smart Cities and the critical analysis of e-government projects to promote Smart Cities' development, making the book valuable to academics, researchers, policy-makers, public managers, international organizations and technical experts in understanding the role of government to enhance Smart Cities' projects.

William Edward Burghardt Du Bois was a black civil rights activist, leader, Pan-Africanist, sociologist, educator, historian, writer, editor, poet, and scholar. He became a naturalized citizen of Ghana in 1963 at the age of 95. "The time has not yet come for a complete history of the Negro peoples. Archaeological research in Africa has just begun, and many sources of information in Arabian, Portuguese, and other tongues are not fully at our command; and, too, it must frankly be confessed, racial prejudice against darker peoples is still too strong in so-called civilized centers for judicial appraisal of the peoples of Africa. Much intensive monographic work in history and science is needed to clear mooted points and quiet the controversialist who mistakes present personal desire for scientific proof. Nevertheless, I have not been able to withstand the temptation to essay such short general statement of the main known facts and their fair interpretation as shall enable the general reader to know as men a sixth or more of the human race. Manifestly so short a story must be mainly conclusions and generalizations with but meager indication of authorities and underlying arguments." - W. E. B. Du Bois

Scientists from management and strategy, information systems, engineering and telecommunications have discussed a novel concept: Smart Business Networks. They see the future as a developing web of people and organizations, bound together in a dynamic and unpredictable way, creating smart outcomes from quickly (re-)configuring links between actors. The question is: What should be done to make the outcomes of such a network 'smart', that is, just a little better than that of your competitor? More agile, with less pain, with more return to all the members of the network, now and over time? The technical answer is to create a 'business operating system' that should run business processes on different organisational platforms. Business processes would become portable: The end-to-end management of processes running across many different organizations in many different forms would become possible. This book presents you the outcomes of an energizing and new direction in management science.

This book also discusses methods used to fight antibiotic-resistant infection based on a deep understanding of the mechanisms involved in the development of the resistance. Discusses methods used to fight antibiotic-resistant infection based on a deep understanding of mechanisms involved in the development of the resistance Provides information on modern methods used to fight antibiotic resistance Covers a wide range of alternative methods to fight bacterial resistance, offering the most complete information available Discusses both newly emerging trends and traditionally applied methods to fight antibiotic resistant infections in light of recent scientific developments Offers the most up-to-date information in fighting antibiotic resistance Includes involvement of contributors all across the world, presenting questions of interest to readers of both developed and developing countries

The emotions and mental states that dictate success or failure in Stock /Commodity and Forex Markets. Trading psychology refers to the aspects of an individual's mental makeup that help determine whether he or she will be successful in buying and selling securities for a profit. Trading psychology is as important as other attributes such as knowledge, experience and skill in determining trading success. Discipline and risk-taking are two of the most critical aspects of trading psychology, since a trader's implementation of these aspects is critical to the success of his or her trading plan. While fear and greed are the two most commonly known emotions associated with trading psychology, other emotions that drive trading behaviour are hope and regret. In this book on trading psychology, you will learn:

- The importance of controlling your emotions when making trading decisions
- How to master self-discipline and stick to a trading plan
- How to learn from mistakes so you do not repeat them
- How to refine your skills through simulated paper trading without risking money
- How to have a confident mindset while maintaining a flexible and open mind when trading

The best traders are always looking for an edge. Sometimes, the largest obstacle between you and trading successfully is yourself. Success can be more about your mindset and less about the markets. From managing and evaluating your own performance to setting rules and sticking to them, these titles will help you create and stick to a trading plan, manage stress, address risk, and not be derailed by emotions or preconceptions.

A poetic and nuanced exploration of the human experience of flight that reminds us of the full imaginative weight of our most ordinary journeys—and reawakens our capacity to be amazed. The twenty-first century has relegated airplane flight—a once remarkable feat of human ingenuity—to the realm of the mundane. Mark Vanhoenacker, a 747 pilot who left academia and a career in the business world to pursue his childhood dream of flight, asks us to reimagine what we—both as pilots and as passengers—are actually doing when we enter the world between departure and discovery. In a seamless fusion of history, politics, geography, meteorology, ecology, family, and physics, Vanhoenacker vaults across geographical and cultural boundaries; above mountains, oceans, and deserts; through snow, wind, and rain, renewing a simultaneously humbling and almost superhuman activity that affords us unparalleled perspectives on

the planet we inhabit and the communities we form.

"TRB's National Cooperative Highway Research Program (NCHRP) Report 770: Estimating Bicycling and Walking for Planning and Project Development: A Guidebook contains methods and tools for practitioners to estimate bicycling and walking demand as part of regional-, corridor-, or project-level analyses. The products of the research include a guidebook for practitioners on a range of methods for estimating bicycling and walking activity and a CD-ROM containing a GIS Walk Accessibility Model, spreadsheets, and the contractor's final report, which documents the research and tools that operationalize the methods described in the guidebook."--Publisher description.

Growth has returned after years of stagnation. The reform-oriented government is tackling structural issues, with notable achievements in the fiscal area. The financial sector is sound and resilient to current stability threats, but credit remains scarce. The offshore sector faces heightened international scrutiny and the government is taking steps to strengthen compliance with AML/CFT and tax transparency standards. Tourism and related foreign investments will support growth in the near-term, while low competitiveness and diversification dampen medium-term prospects. Growth would suffer from a slowdown in the U.S. or higher oil prices, and hurricane vulnerability persists. Reform momentum could stall, undermining fiscal consolidation efforts.

Secret Gardens of Somerset offers a personal tour of 20 of the UK's most beguiling gardens in this much-loved area of southern England, defined by its distinctive horticulture, rolling hills, picturesque villages and the most traditional English landscape. Abigail Willis and Clive Bournnell give you privileged access to 20 gardens, from a highly productive working flower farm to very personal private retreats, revealing their history, design and plant collections, in the company of their devoted owners and head gardeners. In the footsteps of artists and trend-setters from Victorian designers such as Harold Peto to planting visionary, Gertrude Jekyll as well as contemporary pioneer Piet Oudolf, we find a series of beguiling country gardens of different sizes and atmospheres, which have shaped the English identity, and in different ways

express the ideals of English life. The gardens: The American Museum and Gardens, Barley Wood Walled Garden, Batcombe House, The Bishop's Palace, Common Farm, Cothay Manor, East Lambrook Manor, Elworthy Cottage, Forest Lodge, Greencombe Gardens, Hauser & Wirth Somerset, Hestercombe, Iford Manor, Kilver Court, Midney Gardens, Milton Lodge gardens, The Newt in Somerset, Stoberry House, Westbrook House, and Yeo Valley Organic Garden. Most of the gardens included here are privately owned and usually open to the public. Meanwhile, all of these landscapes can now be enjoyed through the eyes of the owners themselves. Tour even more magnificent English gardens with Secret Gardens of the Cotswolds and Secret Gardens of East Anglia.

This paper reviews economic developments in Indonesia during 1996–97. The Indonesian economy continued to perform well in 1996, with real GDP growth of 7.8 percent. The rate of inflation fell to 5 percent in 1996/97, assisted by improved food supplies and generally subdued import prices. A budgetary surplus of 1 percent of GDP was estimated for 1996/97, reflecting higher-than-projected oil revenue and firm expenditure control. However, broad money and private sector credit growth were 27 percent and 24 percent, respectively, in the face of strong private capital inflows.

In response to popular demand, Emmanuel Goldstein (aka, Eric Corley) presents a spectacular collection of the hacker culture, known as 2600: The Hacker Quarterly, from a firsthand perspective. Offering a behind-the-scenes vantage point, this book provides devoted fans of 2600 a compilation of fascinating—and controversial—articles. Cult author and hacker Emmanuel Goldstein has collected some of the strongest, most interesting, and often provocative articles that chronicle milestone events and technology changes that have occurred over the last 24 years. He divulges author names who were formerly only known as “anonymous” but have agreed to have their identity revealed. The accompanying CD-ROM features the best episodes of Goldstein’s “Off the Hook” radio shows. Note: CD-ROM/DVD and other supplementary materials are not included as part of eBook file.

Cooperative Evolution offers a fresh account of evolution consistent with Charles Darwin’s own account of a cooperative, inter-connected, buzzing and ever-changing world. Told in accessible language, treating evolutionary change as a cooperative enterprise brings some surprising shifts from the traditional emphasis on the dominance of competition. The book covers many evolutionary changes reconsidered as cooperation. These include the cooperative origins of life, evolution as a spiral rather than a ladder or tree, humans as a part of natural systems rather than the purpose, relationships between natural and social change, and the role of the individual in adaptive radiation onto new ground. The story concludes with a projection of human evolution from the past into the future. ‘Environmental studies courses have needed a book like Cooperative Evolution for a long time. It is a boon for those teaching the complexity of the evolutionary story.’ — Dr John A. Harris, BSc(Hons) MSc PhD, School of Environmental Science, University of Canberra ‘As a regenerative, holistic-thinking farmer I daily witness the results of cooperative evolution as the seasons unfold. A

pleasure to read, Cooperative Evolution gives entry to recent thinking on evolutionary processes.’ — David Marsh, MSA, ‘Allendale’, Boorowa, New South Wales, 2018 National Individual Landcarer Award recipient ‘This book is an engaging new look at ideas about evolution as we know it today. In the hands of two eminent biologists, it presents an approachable yet challenging argument. I heartily recommend it.’ — Emeritus Professor Sue Stocklmayer AO, BSc MSc PhD, Centre for the Public Awareness of Science, The Australian National University

Journeying back in time to the year 1320, twenty-first century Oxford woman Kivrin arrives during the outbreak of a deadly epidemic

There are over 1300 active volcanoes worldwide and many more dormant or extinct. Some are developed as tourist destinations; others are not, but have great potential. Mount Fuji in Japan attracts over 100 million visitors per year and has immense cultural and spiritual significance, while a number of volcanic areas in national parks, for example Teide in Spain, Yellowstone in the US, Vesuvius in Italy and Tongariro in New Zealand, attract between one to four million tourists each year. In the last decade the designation of nearly 50 geoparks around the world has highlighted their potential for tourism development. This book provides the first global review and assessment of the sustainable use of active and dormant volcanic and geothermal environments for geotourism. The volcano-based tourism sector is further augmented through a closely linked range of geothermal resources and attractions, such as geysers and hot springs, which are discussed in detail throughout individual chapters covering all key volcanic and geothermal regions around the world. It is shown that volcano and geothermal tourism is a subsection of nature-based geotourism and incorporates a variety of other tourism categories such as adventure tourism, extreme tourism, ecotourism, green tourism, educational tourism, and hot spring tourism. This comprehensive book covers the most important issues of this growing tourism sector whilst incorporating relevant global research, making it an essential resource for all in the field. Includes colour plates.

This paper aims to lay a wide-ranging base for untangling the digital economy, in order to facilitate and moderate the high-speed evolution and create an awareness of the new economic coherence. It attempts to show the differences between industrial and digital economics. It finds that old models based on methods of traditional industrial economics still provide a stable framework for analysis of the new age economy whilst also highlighting the need for future refocusing.

The Anarchist Cookbook will shock, it will disturb, it will provoke. It places in historical perspective an era when "Turn on, Burn down, Blow up" are

revolutionary slogans of the day. Says the author "This book... is not written for the members of fringe political groups, such as the Weatherman, or The Minutemen. Those radical groups don't need this book. They already know everything that's in here. If the real people of America, the silent majority, are going to survive, they must educate themselves. That is the purpose of this book." In what the author considers a survival guide, there is explicit information on the uses and effects of drugs, ranging from pot to heroin to peanuts. There is detailed advice concerning electronics, sabotage, and surveillance, with data on everything from bugs to scramblers. There is a comprehensive chapter on natural, non-lethal, and lethal weapons, running the gamut from cattle prods to sub-machine guns to bows and arrows.

"Connie Willis deploys the apparatus of science fiction to illuminate character and relationships, and her writing is fresh, subtle, and deeply moving."—The New York Times Book Review Findridy and Carson are two explorers sent to Boohte to survey the ridges and scrub-covered hills of the planet. Back home, their adventures are followed by countless breathless fans, but the reality is far less romantic as they deal with dust, nitpicking regulations, and uncooperative aliens. Teamed with a young intern whose specialty is mating customs, and a native guide of indeterminate gender, the group sets out for a previously unexplored sector of the planet. As they survey canyons and cataracts, battle dangers, and discover alien treasures, they will soon find themselves in alien territory of another kind: exploring the paths and precipices of sex. And love.

When seventeen-year-old Toby McGonigal finds himself lost in space, separated from his family, he expects his next drift into cold sleep to be his last. After all, the planet he's orbiting is frozen and sunless, and the cities are dead. But when Toby

wakes again, he's surprised to discover a thriving planet, a strange and prosperous galaxy, and something stranger still—that he's been asleep for 14,000 years. Welcome to the Lockstep Empire, where civilization is kept alive by careful hibernation. Here cold sleeps can last decades and waking moments mere weeks. Its citizens survive for millennia, traveling asleep on long voyages between worlds. Not only is Lockstep the new center of the galaxy, but Toby is shocked to learn that the Empire is still ruled by its founding family: his own. Toby's brother Peter has become a terrible tyrant. Suspicious of the return of his long-lost brother, whose rightful inheritance also controls the lockstep hibernation cycles, Peter sees Toby as a threat to his regime. Now, with the help of a lockstep girl named Corva, Toby must survive the forces of this new Empire, outwit his siblings, and save human civilization. Karl Schroeder's Lockstep is a grand innovation in hard Science Fiction space opera. At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.

Contrary to popular opinion, not every business needs a Web presence, says Kent, author of 40 computer and business books. He shows readers how to evaluate their need for a Web site and offers easy steps to prepare, create and promote an electronic page. The intricacies of pages, servers and design are covered in a way that non-IT professionals can understand.

Electronic commerce has the potential to radically alter some economic activities and the surrounding social environment. It changes the business environment, accelerates changes under way, increases interactivity, encourages openness, and alters the notion of time. This book examines such issues as the potential for growth of electronic commerce, its impact on the efficiency of the economy, its effects on how business is organized, and on markets, on jobs, and on society. It points out that countries will dismantle barriers to global electronic commerce at different rates, and that this may raise competitive concerns. It also discusses the electronic commerce's impacts on the costs of owning a "store," carrying inventory, conducting sales, placing and processing orders, customer support, and product distribution.

In *An Epidemic of Rumors*, Jon D. Lee examines the human response to epidemics through the lens of the 2003 SARS epidemic. Societies usually respond to the eruption of disease by constructing stories, jokes, conspiracy theories, legends, and rumors, but these narratives are often more damaging than the diseases they reference. The information disseminated through them is often inaccurate, incorporating xenophobic explanations of the disease's origins and questionable medical information about potential cures and treatment. Folklore studies brings important and useful perspectives to understanding cultural responses to the outbreak of disease. Through this etiological study Lee shows the similarities between the narratives of the SARS outbreak and the narratives of other contemporary disease outbreaks like AIDS and the H1N1 virus. His analysis suggests that these disease narratives do not spring up with new outbreaks or diseases but are in continuous circulation and are recycled opportunistically. Lee also explores whether this predictability of vernacular disease narratives presents the opportunity to create counter-narratives released systematically from the government or medical science to stymie the negative effects of the fearful rumors that so often inflame humanity. With potential for

practical application to public health and health policy, An Epidemic of Rumors will be of interest to students and scholars of health, medicine, and folklore.
