Fresh off their vows of lifelong commitment and fidelity, Graham and Trish Wales threw themselves into the unknown venture of what was destined to be a classical African overland safari. Almost immediately, things began to go wrong. Without any prior organization, knowledge, research, or planning (and being guided only by a vague and somewhat arbitrary goal and end destination), the chaos set in before even leaving their arrival city of Cape Town, South Africa. It only got worse from there, as they made their way through a nearly infinite series of unexpected and only sometimes controllable calamities brought on by their hasty choice of car, Mother Nature, police, and their own poor decisions. Sustained by the bonds of matrimony, God Almighty, and Africa's unrivaled natural splendor, Graham and Trish pushed on through each trial and made it to the end, either limping across the finish line or triumphantly conquering the journey. They're not quite sure which. Either way, with all its African-sized twists and turns, highs and lows, and predictable unpredictability, it was a honeymoon never to be forgotten. For better or for worse. Author information Graham and Trish Wales are born world travelers of their own breed, currently living a quiet suburban life in North Carolina with their two kids, biding their time until they can head off on adventure again with their expanded family. The pioneering figures presented here have forged new paths for women in fields ranging from nursing, pharmacy, public health, and dentistry to general and hospital practice, hospice care, virology, surgery, and psychiatry. Their stories reveal the special obstacles they faced and overcame as women practicing in a demanding, traditionally all-male field. They also chronicle the history of medicine in the state generally since, although there was discrimination and resistance to accepting them, their accomplishments paralleled and in some instances led the development of medical practice and specialization. Using vignettes and biographical details garnered from sparse available literature, newspaper archives, typescripts found in various libraries around the state, and interviews, Elizabeth Silverthorne and Geneva Fulgham have created profiles of women ranging from traditional roles such as native herbalists and midwives through contemporary pioneers in fields like genetics and nuclear medicine. Drawing on subjects across the centuries throughout Texas' geographical regions and from diverse ethnic groups, they have painted rounded portraits of the women, showing their educational achievements, personalities, commitments, family lives, and hobbies. The stories of these pioneering women, told in clear and compelling prose, are fascinating and even inspiring. The accomplishments of the women heighten our understanding of the ways in which women have defied stereotype. Through personal persistence and dedication to their chosen fields, often against great odds, the women profiled here contributed to an elevated status for all women in the state.

The United States is one of history's great Christian nations, but our unique history, success, and global impact have seduced us into believing we are something more--God's New Israel, the new order of the ages, the last best hope of mankind, a redeemer nation. Using the subtle categories that arise from biblical narrative, *Between Babel and Beast* analyzes how the heresy of Americanism inspired America's rise to hegemony while blinding American Christians to our failures and abuses of power. The book demonstrates that the church best serves the genuine good of the United States by training witnesses--martyr-citizens of God's Abrahamic empire.

Here, in plain language, is the definitive guide for taking control of your life and imbuing it with greater meaning and productivity. Constructive Living is an action-based way of looking at the world that combines good, old-fashioned straight talk and the celebrated Japanese psychotherapies Morita and Naikan. David Reynolds, the father of this brilliantly simple and effective therapy, shows us how to live thoughtfully and economically, to regard our actions as if they were divine rituals, and to perform them with the utmost care. He contends that contentment is

achieved, not bestowed--attaining peace and satisfaction takes daily practice and learning. With user-friendly anecdotes, practical exercises, and a sense of humor, he refreshes the experienced student and takes the novice to the beginning, laying out the essence of Constructive Living.

Advances in forensic odontology have led to improvements in dental identification for individual cases as well as in disaster victim identification (DVI). New and updated technologies mean advances in bitemark analysis and age estimation. Growth in the field has strengthened missing persons' networks leading to more and faster identifications of unidentified individuals. A product of the American Society of Forensic Odontology, the Manual of Forensic Odontology, Fifth Edition provides comprehensive and up-to-date information involving all facets of forensic dentistry and explores critical issues relating to the scientific principles supporting the field's evaluations and conclusions. New information in the Fifth Edition includes Scientific principles and the need for more and better research in the field Oral and maxillofacial radiographic features of forensic interest Forensic pathology and its ties to forensic odontology New techniques and improved technologies for age estimation Advances in bitemark evidence management Animal bitemarks National and international forensic dental organizations Tips for becoming involved in forensic odontology The manual has been an important source of forensic dentistry information for more than 20 years. This new edition is edited by a past president of the American Board of Forensic Odontology and a past Chair of the Odontology Section of the American Academy of Forensic Sciences. Expanded and enhanced with extensive color illustrations, this volume is designed to provide essential information based on sound scientific principles for experienced forensic odontologists and for those new to the discipline.

Over the past decade, conservative Christian public law firms have been some of the most active and aggressive litigators in the nation. Their efforts have impacted important policy areas including religion in the Public Square, school prayer, gay rights, 'family values' and abortion policy. But the Fundamentalist Christian/Evangelical social movement is not monolithic. In this probing and judicious work, Hacker explores and clarifies the influence of ideology on the goals and behavior of three leading conservative Christian law firms and how they differ in agendas and approach. He provides rich interview narratives that shed light on interest group behavior and how it is influenced by internal group characteristics.

An application of differential forms for the study of some local and global aspects of the differential geometry of surfaces. Differential forms are introduced in a simple way that will make them attractive to "users" of mathematics. A brief and elementary introduction to differentiable manifolds is given so that the main theorem, namely Stokes' theorem, can be presented in its natural setting. The applications consist in developing the method of moving frames expounded by E. Cartan to study the local differential geometry of immersed surfaces in  $R^3$  as well as the intrinsic geometry of surfaces. This is then collated in the last chapter to present Chern's proof of the Gauss-Bonnet theorem for compact surfaces.

This unique reference source brings together a listing of more than 325 works for clavichord, harpsichord, and organ that are intended for two or more players.
