The instant New York Times bestseller. A groundbreaking method to master all types of diabetes by reversing insulin resistance. Current medical wisdom advises that anyone suffering from diabetes or prediabetes should eat a low-carbohydrate, high-fat diet. But in this revolutionary book, Cyrus Khambatta, PhD, and Robby Barbaro, MPH, rely on a century of research to show that advice is misguided. While it may improve short-term blood glucose control, such a diet also increases the long-term risk for chronic diseases like cancer, high blood pressure, high cholesterol, chronic kidney disease, and fatty liver disease. The revolutionary solution is to eat a low-fat plant-based whole-food diet, the most powerful way to reverse insulin resistance in all types of diabetes: type 1, type 1.5, type 2, prediabetes,

and gestational diabetes. As the creators of the extraordinary and effective Mastering Diabetes Method, Khambatta and Barbaro lay out a step-by-step plan proven to reverse insulin resistance-the root cause of blood glucose variability- while improving overall health and maximizing life expectancy. Armed with more than 800 scientific references and drawing on more than 36 years of personal experience living with type 1 diabetes themselves, the authors show how to eat large quantities of carbohydrate-rich whole foods like bananas, potatoes, and quinoa while decreasing blood glucose, oral medication, and insulin requirements. They also provide life-changing advice on intermittent fasting and daily exercise and offer tips on eating in tricky situations, such as restaurant meals and family dinners. Perhaps best of all: On the Mastering Diabetes Method, you will never go hungry. With more than 30 delicious, filling, and nutrient-dense recipes and backed by cutting-edge nutritional science, Mastering Diabetes will help you maximize your insulin sensitivity, attain your ideal body weight, improve your digestive health, gain energy, live an active life, and feel the best you've felt in years.

Brooklyn Borough president and Democratic nominee for New York City mayor Eric Adams is on a mission to tackle one of the most stubborn health problems in the country: chronic disease in the African American community. African Americans are heavier and sicker than any other group in the U.S., with nearly half of all Black adults suffering from some form of cardiovascular disease. After Adams woke up with severe vision loss one day in 2016, he learned that he was one of the

nearly 5 million Black people living with diabetes-and, according to his doctor, he would have it for the rest of his life. A police officer for more than two decades, Adams was a connoisseur of the fast-food dollar menu. Like so many Americans with stressful jobs, the last thing he wanted to think about was eating healthfully. Fast food was easy, cheap, and comfortable. His diet followed him from the squad car to the state senate, and then to Brooklyn Borough Hall, where it finally caught up with him. But Adams was not ready to become a statistic. There was a better option besides medication and shots of insulin: food. Within three months of adopting a plant-based diet, he lost 35 pounds, lowered his cholesterol by 30 points, restored his vision, and reversed his diabetes. Now he is on a mission to revolutionize the health of not just the borough of Brooklyn, but of African Americans across the country. Armed with the hard science and real-life stories of those who have transformed their bodies by changing their diet, Adams shares the key steps for a healthy, active life. With this book, he shows readers how to avoid processed foods, cut down on salt, get more fiber, and substitute beef, chicken, pork, and dairy with delicious plant-based alternatives. In the process he explores the origins of soul food-a cuisine deeply important to the Black community, but also one rooted in the horrors of slavery-and how it can be reimaged with healthy alternatives. Features more than 50 recipes from celebrities and health experts, including Paul McCartney, Queen Afua, Jenné Claiborne, Bryant Jennings, Charity Morgan, Moby, and more! The journey to good health begins in the kitchen-not the hospital bed!

The essential primer and guide to preparing delicious, totally vegan, nut-based cheeses, from the coauthor of *The Plantpower Way*. In their debut cookbook, *The Plantpower Way*, Julie Piatt and her ultra-endurance athlete husband, Rich Roll, inspired thousands to embrace a plant-fueled lifestyle, and through their advocacy efforts, podcasts, and talks, countless people are now enjoying healthier and more vibrant lives. In *This Cheese Is Nuts*, Julie is bringing that message to the forefront once more, with a stunning collection of flavorful nut-based cheeses. Julie has always been known for her dairy-free cheeses, and here she shares seventy-five recipes using almonds, cashews, and other nuts to create cheeses anyone can make right at home. Nut-based cheeses are on the cutting edge in the world of vegan cuisine. They're remarkably simple to prepare (all you need are a few simple ingredients and a basic dehydrator), and in as little as twenty minutes, you can have an assortment of tasty fresh cheeses fit for any occasion. Even creating aged cheeses is easy—they require only a day or two in the dehydrator, so making “fancier” cheeses, like Aged Almond Cheddar, is an almost entirely hands-off process. And though they're delectable on their own, Julie's nut-based cheeses are a terrific component in her recipes for Raw Beet Ravioli with Cashew Truffle Cream, Country Veggie Lasagna with Fennel and Brazil Nut Pesto, French Onion Soup with Cashew Camembert, and more. Filled with the essential tips, tools, and mouth-watering recipes home cooks need to immerse themselves in the world of nut-based cheese-making, *This Cheese Is Nuts* will

demonstrate why nut cheeses should be part of any healthy, sustainable diet.

"A cookbook that puts into effect a strategic eating plan developed by the authors to help promote healthier living, disease prevention, better performance and a longer life"--
The Meaty Truth is an eye-opening look at the massive problems caused by the American population's food supply. Water, meat, and milk and other dairy products are filled with toxins, antibiotics, untested growth hormones, ammonia, and animal pus and manure. The current conditions of the food production industry must drastically improve, and until they do, it is absolutely vital to monitor what you eat. Castle and Goodman take a hard-hitting look at what America is putting into its food, the negative effects this has on the world, and the best ways to make healthy, informed decisions about eating. As the antibiotic age ends, the rise of pandemic diseases is approaching. Approximately half of the illnesses that claim American lives today are related to what we eat, and our health-care system is focused on treating the sick, not preventing illnesses from occurring. To fix our health problems, to continue feeding the world's ever-growing population, and to save our planet from ecological destruction, we can no longer avoid making changes to how American meat and dairy are produced. This guide is easy to read, applicable to anyone's lifestyle, and impossible to put down.

After a heart attack scare at the age of forty, physician Rajiv Misquitta and his pharmacist wife, Cathi, set out to find ways to change their lifestyle to ensure they lived long enough to see their children grow up. Finding existing vegetarian and vegan cookbooks less than satisfying, Cathi developed her own vegan recipes. Compiled and presented here is a bountiful collection of more than one hundred heart-healthy, eco-friendly, everyday vegan recipes for breakfast, lunch, dinner—and even snacks. Inspired by cuisines from around the world, the recipes include plenty of protein-rich grains and legumes as well
