It includes details on professional competence, insurance, international transport of animals, dangerous and perishable goods, international haulage and customs procedures. This manual includes guidance for drivers in the Republic of Ireland and mainland Europe, along with the rules and penalties governing these regions. Lowe's Transport Manager's and Operator's Handbook 2020 is the essential reference source for any transport manager, fleet operator, owner-driver haulier or student involved in the transport industry. This new edition has been thoroughly updated and revised to reflect the latest developments, covering changes to EU drivers' hours, HM Customs, tachograph rules for AETR rules and intermodal freight material.

Acute, questioning, humane and passionately concerned for justice, Helena Kennedy is one of the most powerful voices in legal circles in Britain today. Here she roundly challenges the record of modern governments over the fundamental values of equality, fairness and respect for human dignity. She argues that in the last twenty years we have seen a steady erosion of civil liberties, culminating today in extraordinary legislation, which undermines long established freedoms. Are these moves a crude political response to demands for law and order? Or is the relationship between citizens and the state being covertly reframed and redefined?

When three friends, fueled by an alcohol-induced dream to travel the world, clicked "buy" on an iconic London cab they name Hannah, little did they know what they were getting themselves into. Leaving the Big Smoke in their vintage taxi, Paul, Johnno, and Leigh began a 43,000-mile trip that would take them off the beaten track to some of the most dangerous and deadly places on earth. By the time they arrived home, they would manage, against all the odds, to circumnavigate the globe, and in doing so, break two World Records. It's On the Meter is an honest account of what it's like to drive a Black Cab around the world. From altercations with the Iranian Secret Police to narrowly escaping the Taliban, the trio's adventure is filled with hair-raising escapades. The traveling trio will give an impression of each country the taxi passed through and its people and will help readers understand how to survive fifteen months on the road. Feel the fear, frolic in the fun, and meet the hundred passengers the taxi picked up along the way, as the authors take you on their action-packed journey.

In this consultation paper, the Law Commission sets out the case for reducing the scope for criminal law to be used in regulated fields such as farming, food safety, banking and retail sales. Criminal sanctions should only be used to tackle serious wrongdoing and it is out of proportion for regulators to rely wholly on the criminal law to punish and deter activities that are merely 'risky', unless the risk involved is a serious one. There has been a steep increase in the number of criminal offences created since the late 1980s to penalise risk-taking. The areas regulated cover a wide range of risk-posing activities, and involve millions of people and thousands of businesses. By turning to civil penalties for minor breaches, regulators could reduce costs to themselves and the criminal justice system by £11 million a year. In some cases, criminal prosecution can cost almost twice what the courts obtain in fines. The paper proposes that: (i) regulatory authorities should make more use of cost-effective, efficient and fairer civil measures to govern standards of behaviour; (ii) a set of common principles should be established to help agencies consider when and how to use the criminal law to tackle serious wrongdoing, and (iii) existing low-level criminal offences should be repealed where civil penalties could be as effective. Where criminal offences are created in regulatory contexts, they should require proof of fault elements such as intention, knowledge, or a failure to take steps to avoid harm being done or serious risks posed.

This best-seller for busy fleet operators, now in its 44th edition, provides essential information and advice on transport legislation, technical standards and goods vehicle operations. Lowe's Transport Manager's and Operator's Handbook is a truly comprehensive guide to the legal, operational and environmental factors that are of the utmost importance in today's road transport industry - including professional competence, working times and driving hours rules, speed cameras and penalties, the international road haulage market, and drugs testing for drivers. This new edition incorporates revised guidance from H.M Treasury which is designed to promote efficient policy development and resource allocation across government through the use of a thorough, long-term and analytically robust approach to the appraisal and evaluation of public service projects before significant funds are committed. It is the first edition to have been aided by a consultation process in order to ensure the guidance is clearer and more closely tailored to suit the needs of users.

Futures thinking and foresight is a powerful planning approach that can help Asia and the Pacific countries meet economic, political, social, and environmental and climate change challenges. This publication shows how the Asian Development Bank (ADB) piloted this approach to understand entry points to support transformational change in the region. It compiles lessons from an ADB initiative to apply futures and foresight tools in Armenia, Cambodia, Kazakhstan, Mongolia, the People's Republic of China, the Philippines, and Timor-Leste. Futures terminology is introduced as are specific tools such as emerging issues analysis, scenario planning, and backcasting. It also describes how futures and foresight tools were applied in the countries.
