"As our eyes are drawn upward to the skyline of great cities, it's important to remember that these impressive constructions are able to reach such heights only because their foundations are strong. In much the same way, being successful in the business world begins with fundamental courses like financial and managerial accounting. It is only when students have a firm grasp of concepts like the accounting cycle and managerial decision making that they have a base on which to stand, a strong foundation on which to grow. In this edition, as before, the Williams team has revised the text with a keen eye toward the principle of helping students establish the foundation they will need for future success in business. However, through new coverage of International Financial Reporting Standards and a revised globalization chapter, the Williams book also introduces students to larger themes and evolving concerns. This dual emphasis allows students to keep their eyes trained upward even as they become solidly grounded in accounting fundamentals"--

While there is growing interest in IFRS within the US, interest outside the US has exploded. Weygandt's fourth edition of Financial Accounting: IFRS highlights the integration of more US GAAP rules, a desired feature as more foreign companies find the United States to be their largest market. The highly anticipated new edition retains each of the key features (e.g. TOC, writing style, pedagogy, robust EOC) on which users of Weygandt Financial have come to rely, while putting the focus on international companies/examples, discussing financial accounting principles and procedures within the context of IFRS, and providing EOC exercises and problems that present students with foreign currency examples instead of solely U.S. dollars.

Financial Accounting, 10e, by Meigs/Williams/Haka/Betner will gain support in traditional accounting departments where instructors expect students to not only understand the concepts of accounting, but to be able to apply and perform accounting processes. Truly a revision based on users needs and market feedback, the tenth edition of Financial Accounting offers increased end-of-chapter material, and a new student CD-ROM including GLAS, SPATS, and student tutorial. Chapters 6-10 are reorganized to be more consistent with the structure of a balance sheet, making the accounting process much clearer for the student. Finally, by providing a stronger foundation, Meigs better prepares students to apply concepts such as the Statement of Cash Flows and Financial Statement Analysis in later chapters. These changes and others have made an already proven financial accounting text
