Prison On Trial is the classic critique of prisons and imprisonment: a book for everyone's shelf. For anyone seeking to understand the modern penchant for locking-up ever more people, it distils the arguments for and against incarceration in a readable, accessible and authoritative way - gaining in status each time prison populations increase across large parts of the world.

Established in 2002, the Euro is now the currency of 17 countries used by over 335 million people daily. Although the single currency is much discussed in terms of macroeconomics and global finances, policymakers rarely address its impact on European citizenship in social, cultural, political, and everyday life economics terms. This hidden side of the single currency is the focus of the essays, which use various approaches, from economic history and political sociology to citizenship and legitimacy, to reveal the connections between the Euro and European citizenship. This timely contribution by renowned experts provides a greater understanding of the Euro at a time when it is not clear whether it should be celebrated or commemorated, and looks into aspects of the single currency that are the base of the social trust that supports it and that is at stake in the present crisis. It will be an essential tool to anyone studying the political, social, and economic development of the E.U.

This White Paper sets out a strategic policy framework for the development of airport capacity in the UK over the next 30 years. Chapters focus on the following: the strategic framework; the environmental impacts; the air transport sector. It also looks at individual regions and the impact for them, including: Scotland, Wales and Northern Ireland, also the North of England, the Midlands, the South West and finally the South East. The framework itself can be used by public bodies, air operators and airlines for future planning applications. It also sets out the Government and devolved administrations' conclusions on the case for future airport expansion, taking into account the large consultation exercise of over half million respondents. This paper provides reasons why airport capacity should be expanded, but recommends a balanced approach to the issue. Among the reasons are: the economic importance of air travel for the country's economy and the increased desire amongst the population for foreign travel, which should be balanced against minimizing, where possible the environmental effects to an area where airports are situated. These are some of the main cases for future development following a full environmental assessment: for Scotland: an additional runway at Edinburgh Airport; substantial terminal development at Glasgow Airport. For Wales: further terminal development needed at Cardiff airport. For Northern Ireland: development of increased capacity at Belfast. For the North of England: additional terminal capacity provided at Manchester Airport and development of increased capacity at Liverpool John Lennon Airport. For the

Midlands: additional runway for Birmingham. For South West England: expansion of Bristol Airport. For South East England: a new runway at Stansted; further development of Heathrow supported, including a further runway and additional terminal capacity. Some options though are not to be followed through, including: two new runways at Gatwick, a development of a second runway at Luton, and a new airport at Cliffe, a new airport of central Scotland, and a new airport at Rugby.

Public Administration and Information Technology provides a foundational overview of the impact of information technology (IT) on modern public organizations. The focus is on what public managers need to know about managing IT to create more efficient, effective, and transparent organizations. This book is unique in that it provides a concise introduction to the subject area and leaves students with a broad perspective on the most important issues. Other books in the field either examine e-government, or are large reference volumes that are not easily accessible to most students. This textbook shows the practical application of IT to the most important areas of public administration. Public Administration and Information Technology is ideal for use in traditional public administration courses on IT as well as management information systems courses in schools of business. Divided into 3 parts, the book covers: - Public Organizations and Information Technology - Information Technology, Evaluation, and Resource Management - Emerging Issues in for Public Managers

For the past half-century, the planning system has operated on the basis of a growth-dependence paradigm. It has been based on market-led urban development and has sought to provide community benefits from a share of development profits. However, we do not live in a world where growth can be taken for granted and we are more aware than previously of the implications for well-being and sustainability. This timely book provides a fresh analysis of the limitations of the growth-dependence planning paradigm. It considers alternative urban development models, ways of protecting and enhancing existing low value land uses and means of managing community assets within the built environment. In each case it spells out the role that a reformed planning system could play in establishing a new agenda for planning. The book will be of relevance to planning students, planning professionals and planning academics, as well as urban policy specialists more generally.

Ravenna has eight World Heritages sites--churches, baptisteries, chapels and monuments dating from the fifth and sixth centuries AD which are renowned especially for exquisite mosaics portraying biblical scenes and figures. They were designed, constructed and decorated over decades during the era of the fall of the western Roman empire, against a tide of invasion, regime change, conflict and a destructive Italian civil war. How did Ravenna achieve such architectural and artistic glory in this era? The book recounts the city's unique experience as the capital both of the late western Roman empire and of its successor Gothic kingdoms. It shows the central role played by its bishops as the early Christian

Church detached itself from the crumbling imperial government. It brings out the important cultural contribution of the kingdom of Italy headed by Theodoric the Ostrogoth and the strong links between Ravenna and the emerging Byzantine empire of the eastern emperor Justinian.

"Leading economist Daniel Cohen provides a whirlwind tour of the history of economic growth, from the early days of civilization to modern times, underscoring what is so unsettling today. The new digital economy is establishing a "zero-cost" production model, inexpensive software is taking over basic tasks, and years of exploiting the natural world have begun to backfire with deadly consequences. Working hard no longer guarantees social inclusion or income. Drawing on economics, anthropology, and psychology, and thinkers ranging from Rousseau to Keynes and Easterlin, Cohen examines how a future less dependent on material gain might be considered and, how, in a culture of competition, individual desires might be better attuned to the greater needs of society."--Publisher's description.

In recent years, sunset clauses have mostly been associated with emergency legislation introduced in the wake of terrorist attacks. However, as this book demonstrates, they have a long history and a substantial constitutional impact on the separation of powers and the rule of law. In addition, the constitutional value of such clauses is examined from certain neglected normative aspects pertaining to concepts such as deliberative and consensus democracy, parliamentary sovereignty and constitutional dialogue. The work is an amalgam of three perspectives: the historical, the positive and the normative. All three are intertwined and each subsequent part builds upon the findings of the previous one. The historical perspective investigates the historical development of sunset clauses since the first Parliaments in England. The positive perspective examines the legal effect and the contemporary utility of sunset clauses. Finally, the normative perspective analyses their interaction with several models of separation of powers, and their influence on the dialogue between various institutions as it values their impact on the rule of law, formal and substantive. The detailed examination of this topical subject will be a valuable resource for academics, researchers and policy makers.

The Treasury's Asset Protection Scheme to protect over £280 billion of Royal Bank of Scotland's financial assets against losses has, so far, only been partially successful in encouraging lending to creditworthy borrowers on the scale originally envisaged. The Scheme, launched in early 2009, initially involved two banks. RBS eventually put £282 billion of assets into the Scheme, while Lloyds Banking Group paid £2.5 billion to exit the Scheme in November 2009 and instead raised additional capital from shareholders. The principal elements of the Scheme, particularly the first loss, were based on a robust assessment of incentives and on as complete information on the underlying assets as were available at the time. As part of the Scheme, Lloyds and RBS agreed lending targets. While both banks met targets for mortgage lending, there was a shortfall of £30 billion against targets for lending to business. Value for money in the longer term will depend heavily on incentives built into the Scheme to encourage good management of assets. Establishing a requirement for RBS to bear the first £60 billion of losses (a 'first loss') was crucial in providing the right incentive for the bank to manage its assets effectively. However, if the first loss is exceeded, RBS will have less financial incentive to avoid further losses although the bank considers it will still have a legal and moral obligation to manage the assets as best it can. The position of taxpayers would be particularly vulnerable if losses were to exceed about £73 billion

The world's favorite expert on la dolce vita (Under the Tuscan Sun author) guides readers through Italy's iconic regions, replete with lavish National Geographic images. This lush guide, featuring more than 350 glorious photographs from National Geographic, showcases the best Italy has to offer from the perspective of two women who have spent their lives reveling in its unique joys. In these illuminating pages, Frances Mayes, the author of Under the Tuscan Sun and many other bestsellers, and New York Times travel writer Ondine Cohane reveal an Italy that only the locals know, filled with top destinations and unforgettable travel experiences in every region. From the colorful coastline of Cinque Terre and the quiet ports of the Aeolian Islands to the Renaissance architecture of Florence and the best pizza in Rome, every section features insider secrets and off-the-beaten-path recommendations (for example, a little restaurant in Piedmont known for its tajarin, a pasta that is the perfect bed for the region's celebrated truffles). Here are the best places to stay, eat, and tour, paired with the rich history of each city, hillside town, and unique terrain. Along the way, you'll make stops at the country's hidden gems--art galleries, local restaurants, little-known hiking trails, spas, and premier spots for R&R. Inspiring and utterly unique, this vivid treasury is a must-have for anyone who wants to experience the best of Italy.

Making the European Union "stronger and more equitable". That's the aim of this document which Paolo Savona, the European Affairs Minister, has submitted to the European authorities on behalf of the Italian Government. It contains a series of proposals to complete the European institutional architecture and to correct the policies currently followed, by promoting an intra-European dialogue in the framework of a high level working group composed by the Representatives of the Commission and the Member States in order to offer more social well-being and growth opportunities which could combine with the requests for monetary and financial stability, whose satisfaction, contrarily to the first two objectives, is endowed with good tools. All this in line with the commitments made in the Treaties that followed one another from that of Maastricht onwards. One central point of this proposal is that the governance of the European economy and society can not be entrusted to mechanical rules typical of the private governance organization that is prevalently aimed at the efficient management of resources, but to political choices which start from the changing structural and conjunctural conditions of the individual Member States and the Union inspired by a "Politeia", that is, the ways in which the common good is organized in order to embrace the social issues with particular regard to

the needs of the weakest parts of the population.

This book is the first to address the multi-faceted influence of the global financial crisis on the national constitutions of the countries most affected. By tracing the impact of the crisis on formal and informal constitutional change, sovereignty issues, fundamental rights protection, regulatory reforms, jurisprudence, the augmentation of executive power, and changes in the party system it addresses all areas of the current constitutional law dialogue and aims to become a reference book with regard to the

interaction between financial crises and constitutions. The book includes contributions from prominent experts on Greece, Hungary, Iceland, Ireland, Italy, Latvia, Portugal, Spain, the UK, and the USA providing a critical analysis of the effects of the financial crisis on the constitution. The volume's extensive comparative chapter pins down distinct constitutional reactions towards the financial crisis, building an explanatory theory that accounts for the different ways constitutions responded to the crisis. How and why constitutions formed their reactions in the face of the financial crisis unravels throughout the book.

This fascinating and extensive study, enlivened by interviews with British and American gamblers, will be enthralling reading not just for those interested in the cultural and social implications of gambling - researchers in sociology, cultural studies and the history of ideas - but for anyone interested in how we create meaning in an increasingly insecure world.

Marking an important moment in the Art Institute of Chicago's 136-year history, this book documents an exceptional gift to the museum: the Edlis/Neeson Collection, consisting of 44 stellar works of contemporary art. Among the highlights are major paintings by some of the 20th century's best-known artists, including Jasper Johns, Roy Lichtenstein, Robert Rauschenberg, Gerhard Richter, Cy Twombly, and Andy Warhol. Also included in the gift are paintings, photographs, and sculptures by icons of contemporary art such as Damien Hirst, Jeff Koons, and Cindy Sherman. This catalogue places the Edlis/Neeson Collection in direct dialogue with works already in the Art Institute's holdings. An essay by James Rondeau situates the gift in the context of the museum's history and uses it to illustrate the growth and development of Pop Art. Most importantly, this book celebrates a transformative gift that allows the Art Institute to claim the most important collection of modern and contemporary art in any encyclopedic institution in the world.

Since the Frontex Border Agency's establishment in 2004, its activities have foregrounded the complexity and difficulty of protecting the human rights of those seeking access to the European Union. In this connection, protection from refoulement should be paramount in the Agency's work. By navigating through the intricacies of Frontex's structure and working methods, this book answers abiding questions: which circumstances would trigger European Union responsibility if violations were to occur in Frontex's joint operations? What is the legal standing of the principle of non-refoulement in relation to Frontex's activities? Can Frontex be entrusted with an exclusive search and rescue mandate? This book offers a theoretical and practical insight into the legislative intricacies of Frontex's work, examining the responsibility of the EU, and scrutinising the interaction of international law and EU law with a focus on the principle of non-refoulement.

While environmentalists insist that lower rates of consumption of natural resources are essential for a sustainable future, many economists dismiss the notion that resource limits act to constrain modern, creative societies. The conflict between these views tinges political debate at all levels and hinders our ability to plan for the future. Supply-Side Sustainability offers a fresh approach to this dilemma by integrating ecological and social science approaches in an interdisciplinary treatment of sustainability. Written by two ecologists and an anthropologist, this book discusses organisms, landscapes, populations, communities, biomes, the biosphere, ecosystems and energy flows, as well as patterns of sustainability and collapse in human societies, from hunter-gatherer groups to empires to today's industrial world. These diverse topics are integrated within a new framework that translates the authors' advances in hierarchy and complexity theory into a form useful to professionals in science, government, and business. The result is a much-needed blueprint for a cost-effective management regime, one that makes problem-solving efforts themselves sustainable over time. The authors demonstrate that long-term, cost-effective resource management can be achieved by managing the contexts of productive systems, rather than by managing the commodities that natural systems produce.

This easy-to-carry guide includes Bologna, Parma, Modena, Piacenza, Ravenna, Rimini and the Po delta. Art historian, Italy resident and long-time Blue Guides author Alta Macadam explores this beautiful region of fine cities, splendid cuisine and long history, providing a fascinatingly detailed guide, with carefully chosen recommendations of hotels and restaurants. A major new work from the world's leading writer on art Landscapes, the companion volume to John Berger's highly acclaimed Portraits, explores what art tells us about ourselves. "Berger's work is an invitation to reimagine; to see in different ways," writes Tom Overton in the introduction to this volume. As a master storyteller and thinker John Berger challenges readers to rethink their every assumption about the role of creativity in our lives. In this brilliant collection of diverse pieces--essays, short stories, poems, translations--which spans a

lifetime's engagement with art, John Berger reveals how he came to his own unique way of seeing. He pays homage to the writers and thinkers who influenced him, such as Walter Benjamin, Rosa Luxemburg and Bertolt Brecht. His expansive perspective takes in artistic movements and individual artists--from the Renaissance to the present--while never neglecting the social and political context of their creation. Berger pushes at the limits of art writing, demonstrating beautifully how his artist's eye makes him a storyteller in these essays, rather than a critic. With "landscape" as an animating, liberating metaphor rather than a rigid definition, this collection surveys the aesthetic landscapes that have informed, challenged and nourished John Berger's understanding of the world. Landscapes--alongside Portraits--completes a tour through the history of art that will be an intellectual benchmark for many years to come.
