Advanced degrees are necessary for careers that once required only a college education. Yet little has been written about who gets into grad school and why. Julie Posselt pulls back the curtain on this secret process, revealing how faculty evaluate applicants in top-ranked doctoral programs in the humanities, social sciences, and natural sciences.

Over 125,000 entries cover 124 scientific and technological fields, including acoustical engineering, cartography graphic arts, microbiology, organic chemistry, radiology, and zoology

This book (Volume One) gives an historical overview of 36 countries whose armed forces served in Europe 1900-2000, together with uniform descriptions. Includes 200 full colour paintings of the regular armies, marines, airforce and para-military troops engaged in land exercises, operations and warfare in Europe, including non-European troops serving in Europe. Each entry is accompanied by a history and description of the uniforms illustrated. The author and illustrator Ron Kidd, has been interested in both police and military history, uniforms and insignia since he was a school boy in the 1950's. He has visited over 300 police and military museums world-wide, and has written and illustrated a number of magazine articles on both police and military history and uniforms. He is a member of both the Military Heraldry Society and the Military Historical Society. It is anticipated that Volume Two will be published in

2013.

India is the largest film producing country in the world and its output has a global reach. After years of marginalisation by academics in the Western world, Indian cinemas have moved from the periphery to the centre of the world cinema in a comparatively short space of time. Bringing together contributions from leading scholars in the field, this Handbook looks at the complex reasons for this remarkable journey. Combining a historical and thematic approach, the Handbook discusses how Indian cinemas need to be understood in their historical unfolding as well as their complex relationships to social, economic, cultural, political, ideological, aesthetic, technical and institutional discourses. The thematic section provides an up-to-date critical narrative on diverse topics such as audience, censorship, film distribution, film industry, diaspora, sexuality, film music and nationalism. The Handbook provides a comprehensive and cutting edge survey of Indian cinemas, discussing Popular, Parallel/New Wave and Regional cinemas as well as the spectacular rise of Bollywood. It is an invaluable resource for students and academics of South Asian Studies, Film Studies and Cultural Studies.

Science gossip and Country queries and notes are incorporated with this.

Is the United States falling behind in the global race for scientific and engineering talent? Are U.S. employers facing shortages of the skilled workers that they need to compete in a globalized world? Such claims from some employers and educators have been widely embraced by mainstream media and political leaders, and have figured prominently in recent policy debates about education, federal expenditures, tax policy, and immigration. *Falling Behind?* offers careful

examinations of the existing evidence and of its use by those involved in these debates. These concerns are by no means a recent phenomenon. Examining historical precedent, Michael Teitelbaum highlights five episodes of alarm about "falling behind" that go back nearly seventy years to the end of World War II. In each of these episodes the political system responded by rapidly expanding the supply of scientists and engineers, but only a few years later political enthusiasm or economic demand waned. Booms turned to busts, leaving many of those who had been encouraged to pursue science and engineering careers facing disheartening career prospects. Their experiences deterred younger and equally talented students from following in their footsteps—thereby sowing the seeds of the next cycle of alarm, boom, and bust. *Falling Behind?* examines these repeated cycles up to the present, shedding new light on the adequacy of the science and engineering workforce for the current and future needs of the United States.

Probationary Americans examines contemporary immigration rules and how they affect the make-up of immigrant communities. The authors' key argument is that immigration policies place race and class as important criteria for gaining entry to the United States, and in doing so, alter the makeup of America's immigrant communities.

Born At Midnight is written by Kedar Vitekar, a very talented new born writer. This is his
