

For The Love Of Cities

Will he ever find his love again or will she always just be a memory?

In this delightful series written by BabyLit author Jennifer Adams and illustrated by kidlit darling Greg Pizzoli, each book showcases a different city with lighthearted baby-appropriate text and ridiculously charming illustrations. Take a whirlwind tour of the Big Apple: cheer with the roaring crowds at Yankee Stadium, chug along peacefully on the Staten Island Ferry, wonder at the bright lights of Times Square, and say good night to the famous New York City skyline.

Re-Imagining the City: Art, Globalization, and Urban Spaces examines how contemporary processes of globalization are transforming cultural experience and production in urban spaces. It maps how cultural productions in art, architecture and communications media are contributing to the reimagining of place and identity through events, artefacts and attitudes. This book recasts how we understand cities – how knowledge can be formed, framed and transferred through cultural production and how that knowledge is mediated through the construction of aesthetic meaning and value.

The mutual love affair between people and their place is one of the most powerful influences in our lives, yet rarely thought of in terms of a relationship. As cities begin thinking of themselves as engaged in a relationship with their citizens, and citizens begin to consider their emotional connections with their places, we open up new possibilities in community, social and economic development by including the most powerful of motivators—the human heart—in our toolkit of city-making. The book explores what makes cities lovable, what motivates ordinary citizens to do extraordinary things for their places and how some cities, such as New Orleans, Detroit, and Cleveland are using that energy to fill in the gaps that "official" city makers have left as resources have disappeared. Meet those amazing people who are truly "in love" with their cities and learn how they are key to the future development of our communities. Praise for the book: What Kageyama has done is to introduce the vital piece into the urban discussion-- the matter of love; the piece without which all city building must fail, for "love" the corner stone of civic citizenship. It takes some bravura and acumen to champion the subject of love in the urban forum that wants to quantify, when only love qualifies and justifies the discussion of cities. Mr. Kageyama goes one step further. He provides precious indicators. Many city thinkers will follow suit, but for the time being, this is the essential book. Pier Giorgio Di Cicco Poet Laureate Emeritus, Toronto, Ontario Author of *Municipal Mind: Manifestos for The Creative City* For the Love of Cities succeeds in putting an exclamation point on the exceptional value of deepening the relationship that city dwellers feel for their neighborhoods by adding amenities such as parks, outdoor cafes, art galleries, trees, flowers and even sidewalks to create a meaningful sense of place. It also explores the often hidden added value of creative entrepreneurs in creating a sense of place that attracts, nurtures and retains citizens. The book is a love note from Author Peter Kageyama to cities everywhere that will prompt you to more closely examine your own relationship with where you live, work and play. Diane Egner Publisher and Managing Editor, 83 Degrees Media Former Book Editor, The Tampa Tribune For the Love of Cities is a must read for city changemakers. Jeff Slobotski Silicon Prairie News & Founder, Big Omaha Peter has captured something very important... love. When we love a city, we are committed to it, we engage with it, we care for it, we give our best to it. A city that is loved also gives back. It makes those who live there feel enriched. And so you have a virtuous cycle. Charles Landry Author of *The Creative City: A Toolkit for Urban Innovators* and *The Art of City Making*

NATIONAL BEST SELLER • The basis for the HBO documentary now streaming on HBO Max For five years, James and Deborah Fallows have travelled across America in a single-engine prop airplane. Visiting dozens of towns, the America they saw is acutely conscious of its problems—from economic dislocation to the opioid scourge—but it is also crafting solutions, with a practical-minded determination at dramatic odds with the bitter paralysis of national politics. At times of dysfunction on a national level, reform possibilities have often arisen from the local level. The Fallows describe America in the middle of one of these creative waves. Their view of the country is as complex and contradictory as America itself, but it also reflects the energy, the generosity and compassion, the dreams, and the determination of many who are in the midst of making things better. *Our Towns* is the story of their journey—and an account of a country busy remaking itself.

Sy Middleton, a teenager living in Manhattan, enters a secret world when he is initiated into Earth-tribe and becomes a Tribber. In the Middle Realm, Tribbers from Earth-, Fire-, Air- and Water-tribe train to enhance their powers and compete in monthly Lunar Festivals. The Zodiac Council has protected the Lower and Middle Realms from the Darkforce for thousands of years, but the balance of power has shifted, placing humanity at risk. The Darkforce has stolen the Book of Dreams. Sy and his friend Joshua Ryderson embark on a quest to find it...

Business is about relationships. What's the secret to success? Like many talented business owners, Jack Green thought it was long hours, do-it-yourself dedication, and cut-throat competition. But he learns how wrong he was when time begins running out for his struggling business. In the middle of a sleepless night, Jack is given a chance to change things when a mysterious visitor appears from the past, promising to deliver nine keys that will salvage Jack's future--the keys to the city of influence. Jack then is thrust into an adventure with an extraordinary group of mentors who teach him the secrets to building strong professional relationships. *The City of Influence* is a humorous, insightful parable that will leave you ready to roll up your sleeves and change the way you build relationships from the inside out.

"A journalist travels the world and investigates current socioeconomic theories of happiness to discover why most modern cities are designed to make us miserable, what we can do to change this, and why we have more to learn from poor cities than from prosperous ones"--

In *A Country of Cities*, author Vishaan Chakrabarti argues that well-designed cities are the key to solving America's great national challenges: environmental degradation, unsustainable consumption, economic stagnation, rising public health costs and decreased social mobility. If we develop them wisely in the future, our cities can be the force leading us into a new era of progressive and prosperous stewardship of our nation. In compelling chapters, Chakrabarti brings us a wealth of information about cities, suburbs and exurbs, looking at how they developed across the 50 states and their roles in prosperity and globalization, sustainability and resilience, and health and joy. Counter to what you might think, American cities today are growing faster than their suburban counterparts for the first time since the 1920s. If we can intelligently increase the density of our

cities as they grow and build the transit systems, schools, parks and other infrastructure to support them, Chakrabarti shows us how both job opportunities and an improved, sustainable environment are truly within our means. In this call for an urban America, he illustrates his argument with numerous infographics illustrating provocative statistics on issues as disparate as rising childhood obesity rates, ever-lengthening automobile commutes and government subsidies that favor highways over mass transit. The book closes with an eloquent manifesto that rallies us to build "a Country of Cities," to turn a country of highways, houses and hedges into a country of trains, towers and trees. Vishaan Chakrabarti is an architect, scholar and founder of PAU. PAU designs architecture that builds the physical, cultural, and economic networks of cities, with an emphasis on beauty, function and user experience. PAU simultaneously advances strategic urbanism projects in the form of master planning, tactical project advice and advocacy.

Dustin is a seventeen-year-old young man who finds out that his girlfriend, Sandy

The Award-Winning Book Returns - Updated, Revised and Expanded! The mutual love affair between people and their place is one of the most powerful influences in our lives, yet rarely thought of in terms of a relationship. As cities come to think of themselves as engaged in a relationship with their residents, and residents begin to consider their emotional connections with their places, we open up new possibilities in community, social and economic development by including the most powerful of motivators - the human heart - in our toolkit of place-making. Here we will explore what makes cities lovable, what motivates ordinary people to do extraordinary things for their places and how some cities are using that energy to fill in the gaps that "official" city makers have left as resources disappeared. Meet the amazing people who are truly in love with their cities and learn how they are the key resource to the future development of our communities. "Peter's book takes the age old notion that love is a powerful, but intangible force and completely turns it on its head by uniquely illustrating the impact human emotion can have on our cities. I strongly recommend For the Love of Cities to all local leaders and anyone who is looking for creative solutions to the challenges facing America's cities." Buddy Dyer, Mayor of Orlando, Florida "When it comes to making places better, there are so many things we can do beyond those conventionally labeled as 'planning.' Most of them involve not the hardware of cities but the software - people. And the best of them are on display in this remarkable book." Jeff Speck, AICP, author of Walkable City: How Downtown Can Save America One Step at a Time "In this book, Peter goes 'next level' and shows us HOW and WHY our placemaking process can help residents and visitors fall in love with your city all over again. This book is for activists, engineers, planners and community leaders committed to transforming their communities." Rebecca Ryan, APF - Futurists/Economist, NEXT Generation Consulting "The book is a love note from Author Peter Kageyama to cities everywhere that will prompt you to more closely examine your own relationship with where you live, work and play." Diane Egner Publisher and Managing Editor, 83 Degrees Media Former Book Editor, The Tampa Tribune "What Kageyama has done is to introduce the vital piece into the urban discussion- the matter of love; the piece without which all city building must fail, for "love" the corner stone of civic citizenship. It takes some bravura and acumen to champion the subject of love in the urban forum that wants to quantify, when only love qualifies and justifies the discussion of cities. Mr. Kageyama goes one step further. He provides precious indicators. Many city thinkers will follow suit, but for the time being, this is the essential book." Pier Giorgio Di Cicco Poet Laureate Emeritus, Toronto, Ontario Author of Municipal Mind: Manifestos for The Creative City

Life is hard for Gary. He has a dead-end job, a grouchy boss, and a beat-up car-and he's only in eighth grade! Things go from bad to worse when a wave of bank robberies hits the city and Gary becomes the prime suspect. With time running out to clear his name and nail the real crooks, this teenage tough-guy must rely on cunning, stealth, and good, old-fashioned, two-fisted justice! It's all in a day's work in a city that doesn't exist.

In cities around the world, planning and health experts are beginning to understand the role of social and environmental conditions that lead to trauma. By respecting the lived experience of those who were most impacted by harms, some cities have developed innovative solutions for urban trauma. In Cities for Life, public health expert Jason Corburn shares lessons from three of these cities: Richmond, California; Medellín, Colombia; and Nairobi, Kenya. Corburn draws from his work with citizens, activists, and decision-makers in these cities over a ten-year period, as individuals and communities worked to heal from trauma--including from gun violence, housing and food insecurity, poverty, and other harms. Cities for Life is about a new way forward with urban communities that rebuilds our social institutions, practices, and policies to be more focused on healing and health.

Enjoy 20 limited-detail illustrations, designed for those who would rather keep it simple. Each page was hand-drawn and edited by K J Kraemer, with you in mind. If you don't want to spend days on a project or just want room to get creative, this adult coloring book is for you!

Teenage drama, hotly contested elections, Facebook groups, accusations, affairs, and romance. Some people interact, others are strangers, but they all live, work, love, and play in this unnamed city.

Following the widespread success of For the Love of Cities, this book builds upon the central premise that love of place matters, with more examples from all over the world and practical steps that community leaders, both official and unofficial, might use to kick start the process in their city. This book explores how to build networks of co-creators, how to allay community fears, how to deal with naysayers and bad news, how to find your authentic identity and how little bits of funding can be instrumental in creating big changes.

One of Apple's Most Anticipated Books of Winter 2021 A quest to explore some of the most spectacular ancient cities in human history—and figure out why people abandoned them. In Four Lost Cities, acclaimed science journalist Annalee Newitz takes readers on an entertaining and mind-bending adventure into the deep history of urban life.

Investigating across the centuries and around the world, Newitz explores the rise and fall of four ancient cities, each the center of a sophisticated civilization: the Neolithic site of Çatalhöyük in Central Turkey, the Roman vacation town of Pompeii on Italy's southern coast, the medieval megacity of Angkor in Cambodia, and the indigenous metropolis Cahokia, which stood beside the Mississippi River where East St. Louis is today. Newitz travels to all four sites and investigates the cutting-edge research in archaeology, revealing the mix of environmental changes and political turmoil that doomed these ancient settlements. Tracing the early development of urban planning, Newitz also introduces us to the often anonymous workers—slaves, women, immigrants, and manual laborers—who built these cities and created monuments that lasted millennia. *Four Lost Cities* is a journey into the forgotten past, but, foreseeing a future in which the majority of people on Earth will be living in cities, it may also reveal something of our own fate.

One of our great urbanists and one of our great public health experts join forces to reckon with how cities are changing in the face of existential threats the pandemic has only accelerated. Cities can make us sick. They always have—diseases spread more easily when more people are close to one another. And disease is hardly the only ill that accompanies urban density. Cities have been demonized as breeding grounds for vice and crime from Sodom and Gomorrah on. But cities have flourished nonetheless because they are humanity's greatest invention, indispensable engines for creativity, innovation, wealth, and connection, the loom on which the fabric of civilization is woven. But cities now stand at a crossroads. During the global COVID crisis, cities grew silent as people worked from home—if they could work at all. The normal forms of socializing ground to a halt. How permanent are these changes? Advances in digital technology mean that many people can opt out of city life as never before. Will they? Are we on the brink of a post-urban world? City life will survive but individual cities face terrible risks, argue Edward Glaeser and David Cutler, and a wave of urban failure would be absolutely disastrous. In terms of intimacy and inspiration, nothing can replace what cities offer. Great cities have always demanded great management, and our current crisis has exposed fearful gaps in our capacity for good governance. It is possible to drive a city into the ground, pandemic or not. Glaeser and Cutler examine the evolution that is already happening, and describe the possible futures that lie before us: What will distinguish the cities that will flourish from the ones that won't? In America, they argue, deep inequities in health care and education are a particular blight on the future of our cities; solving them will be the difference between our collective good health and a downward spiral to a much darker place. In this volume filled with historical and contemporary references to guiding historic precedents and ideological errors of 20th-century planning, the author sets up the carfree city as the cornerstone of sustainable development. This book outlines a structure carefully designed to maximize the quality of life for people and communities worldwide. Also available in cloth, 9057270374.

Where does the Express bus take you? How many swans are in the lake at the park? What replaces the shoe repair store? *The Ultimate Book of Cities* reveals the answers to these questions and much, much more in an oversized fact- and action-packed look at life in the big city! Featuring 59 flaps, pop-ups, pull tabs and movable parts, this all-you-need-to-know guide provides detailed information about what makes a city tick: from the different ways of getting around and what goes on in all the big buildings, to what traffic signs mean and who are all the people who keep the city in tip-top shape! It is a must-have volume to add to a young reader's library of *The Ultimate Book* series.

For more than forty years Jan Gehl has helped to transform urban environments around the world based on his research into the ways people actually use—or could use—the spaces where they live and work. In this revolutionary book, Gehl presents his latest work creating (or recreating) cityscapes on a human scale. He clearly explains the methods and tools he uses to reconfigure unworkable cityscapes into the landscapes he believes they should be: cities for people. Taking into account changing demographics and changing lifestyles, Gehl emphasizes four human issues that he sees as essential to successful city planning. He explains how to develop cities that are Lively, Safe, Sustainable, and Healthy. Focusing on these issues leads Gehl to think of even the largest city on a very small scale. For Gehl, the urban landscape must be considered through the five human senses and experienced at the speed of walking rather than at the speed of riding in a car or bus or train. This small-scale view, he argues, is too frequently neglected in contemporary projects. In a final chapter, Gehl makes a plea for city planning on a human scale in the fast-growing cities of developing countries. A "Toolbox," presenting key principles, overviews of methods, and keyword lists, concludes the book. The book is extensively illustrated with over 700 photos and drawings of examples from Gehl's work around the globe.

"A farmer and entrepreneur, Chase is a man of many abilities. Now he is being asked to use those abilities, and his own particular skills with a sword and bow, to assist an alien planet. This means trading a valuable resource that the planet harbours to convince the Inter-galactic Federation to repair its failing sun" -- Back cover.

Earth's environmental problems are far from being resolved. A large part of these are due to ever-growing cities. Despite more efforts made to improve cities, it has been difficult to change cities. One of the fundamental reasons is that people are not motivated to help change their cities. Apathy is now the number one obstacle to positive change. There is hope and Love is the antidote. What you love, you will sustain. *Cities of Love* aims to urge, persuade and provoke fellow residents of our earth to collectively shape the cities we live in. To achieve this, her residents must again uncover the reasons to love and therefore sustain her cities. To this end, *Cities of Love* tries to identify the ingredients that could possibly be the reasons for such active love. When a city is filled by the people who love their cities, then can a city have a greater chance of advancing towards a better tomorrow. Love is a mighty force to be reckoned with. *Cities of Love* comes alive with augmented reality! See, watch, and read beyond the contents of the book. Scan the pages for more photos and maybe selfie videos of the author in a new city exploring urban developments around the world. Immerse and discover more things to love about cities and inspire yourself to do the same with yours. An app will be available for download (from the App store and Google Play store). Watch this space for more exciting features of the

book!

With the revelation and capture of the killer creature; Charles, Elsa and the other survivors anticipate leaving the island and putting their deadly and terrifying vacation behind them. In an unfortunate incidence, the cunning creature escapes, sets out for vengeance and blood. The group is once again thrown in to a frenzied fight for their lives. The killings resume, and it is left up to Charles to remove the deadly threat to them all once and for all. He and Elsa's relationship has escalated; and as he prepares for battle, he is determined to survive to be with his one true love. In a final confrontation between Charles and the creature, a startling secret is revealed about Elsa's past; one that will change the couples lives forever, if they survive. The final battle ensues. Will Charles be the hero? Or will he and Elsa's love affair end on the island, along with their lives?

"Cities, like dreams, are made of desires and fears, even if the thread of their discourse is secret, their rules are absurd, their perspectives deceitful, and everything conceals something else." — from *Invisible Cities* In a garden sit the aged Kublai Khan and the young Marco Polo — Mongol emperor and Venetian traveler. Kublai Khan has sensed the end of his empire coming soon. Marco Polo diverts his host with stories of the cities he has seen in his travels around the empire: cities and memory, cities and desire, cities and designs, cities and the dead, cities and the sky, trading cities, hidden cities. As Marco Polo unspools his tales, the emperor detects these fantastic places are more than they appear. "Invisible Cities changed the way we read and what is possible in the balance between poetry and prose . . . The book I would choose as pillow and plate, alone on a desert island." — Jeanette Winterson

"In the face of the most perilous challenges of our time--climate change, terrorism, poverty, and trafficking of drugs, guns, and people--the nations of the world seem paralyzed. The problems are too big for governments to deal with. Benjamin Barber contends that cities, and the mayors who run them, can do and are doing a better job than nations. He cites the unique qualities cities worldwide share: pragmatism, civic trust, participation, indifference to borders and sovereignty, and a democratic penchant for networking, creativity, innovation, and cooperation. He demonstrates how city mayors, singly and jointly, are responding to transnational problems more effectively than nation-states mired in ideological infighting and sovereign rivalries. The book features profiles of a dozen mayors around the world, making a persuasive case that the city is democracy's best hope in a globalizing world, and that great mayors are already proving that this is so"--

Emma Alexander has been living in San Diego the past eight years building her career. She's only been home once during that time. When she rushes home to deal with a family tragedy, she discovers small towns have long memories. Circumstances force her to deal with the reason she stayed away so long. Now she must decide between the life she left behind and the one she's secretly yearned for. Jack McElroy has been in love with Emma since they met their freshman year of college. The last four years of living in San Francisco have been torturous for him, being away from her. When her promotion moves her north, fear of ruining their friendship tempers his desire to show her how he truly feels. Will he be able to profess his love for her or will her ex-fiancé beat him to the punch?

Having survived the worst effects of the Civil War, the city of Memphis, battered but unbowed, finds itself facing a far more dangerous foe. It is invisible, lethal, and unstoppable: a plague of yellow fever. It is the story of JP Mahoney, 14-year-old farm boy who dreams of escape from tedious chores and farmlife routine. It is the story of a courageous young woman, Ginnie Moon, onetime Confederate spy, who now operates a boarding house for men who have survived the war. And it is the story of Kevin O'Boyle, an embittered riverfront laborer, who blames the world for his troubles, and finds the crippled city his perfect prey. Several characters in the novel are actual historical figures, most notably Ginnie Moon, Judge "Pappy" Hadden, and Cap'n Jim Lee. Their actions, and those of the other characters, are entirely fictional. The plague, one of several to hit the city in the years following the war, was all too real.

The world's first activity book for kids focused on learning about the future of smarter cities! *Exploring Smart Cities Activity Book for Kids* provides a fun and engaging educational experience for a wide range of kids ages and learning styles. Activities and rhymes will provide endless hours of enjoyment at home and at school, and ample opportunities for topics to inspire a kid's interests now and into the future. Created by Dr. Jonathan Reichental, one of the world's foremost authorities on smart cities, and his co-author, Brett Hoffstadt, the producer of many popular children's activity books on current technologies! There are over 40 engaging learning activities including:- Coloring- Mazes- Drawing- Word searches- Crosswords- Cryptograms- Connect-the-dots- Craft construction Plus, several multiplayer activities such as:- Scavenger hunt- Discussion topics- Brainstorming- Even a board game! Kids will be gently introduced to important topics such as:- Civil engineering- Public safety- Water management- The Internet of Things (IoT)- Alternative energy- Drones- Sustainability Today, more than half of the people in the world live in cities. In the years ahead, many more people will join them. Our future belongs to cities! Through fun and interactive activities, woven through an entertaining rhyming storyline, this book gives children a better understanding of the past, the present, and the future of cities.

"A revelation of the drive and creative flux of the metropolis over time."--Nature A sweeping history of cities through the millennia--from Mesopotamia to Manhattan--and how they have propelled Homo sapiens to dominance. Six thousand years ago, there were no cities on the planet. Today, more than half of the world's population lives in urban areas, and that number is growing. Weaving together archeology, history, and contemporary observations, Monica Smith explains the rise of the first urban developments and their connection to our own. She takes readers on a journey through the ancient world of Tell Brak in modern-day Syria; Teotihuacan and Tenochtitlan in Mexico; her own digs in India; as well as the more well-known Pompeii, Rome, and Athens. Along the way, she presents the unique properties that made cities singularly responsible for the flowering of

humankind: the development of networked infrastructure, the rise of an entrepreneurial middle class, and the culture of consumption that results in everything from take-out food to the tell-tale secrets of trash. *Cities* is an impassioned and learned account full of fascinating details of daily life in ancient urban centers, using archaeological perspectives to show that the aspects of cities we find most irresistible (and the most annoying) have been with us since the very beginnings of urbanism itself. She also proves the rise of cities was hardly inevitable, yet it was crucial to the eventual global dominance of our species--and that cities are here to stay.

Infrastructure is a hot topic for communities all over the world. Ranging from roads and bridges to power grids and cell towers - it is all the foundational elements for a shared and common purpose. Infrastructure is literally all around us, like the background music we take for granted. It is both big and small, obvious and subtle - and it needs to be considered in a different way. The next steps in place-making will be to embrace emotional awareness, emotional design and incorporate love into our places. Emotional Infrastructure is the foundation that supports our sentimental, psychological and spiritual life. Designing for this intent will add vast new dimensions to our approach of place making. This book explores how we create emotional attachments and connections to our places and to each other, which in turn allows us to take on the biggest and most complex problems facing our societies today.

Featuring 12 cities from around the world, this highly-illustrated search-and-find book rewards close inspection. Incredibly detailed illustrations by Tilly bring the vibrant city scenes to life and are sure to spark a child's interest in the wider world around them. Each spread features explanatory text alongside a full-page artwork. First, comb through each cityscape and spot five of the most significant landmarks. Can you see the Eiffel Tower in Paris? Or how about Lady Liberty in NYC? Once you've discovered the landmarks, there are five cultural gems hidden to spot. Finally, answer the counting question in each scene. There's always something new to spot in *Cities Around the World*, meaning children will want to read it again and again.

Nearly 4,000 cities on our planet today have populations of 100,000 people or more. We know their names, locations, and approximate populations from maps and other data sources, but there is little comparable knowledge about all these cities, and none that can be described as rigorously scientific. *The Planet of Cities* together with its companion volume, the *Atlas of Urban Expansion*, contributes to developing a science of cities based on studying all these cities together—not in the abstract, but with a view to preparing them for their coming expansion. The book puts into question the main tenets of the familiar Containment Paradigm, also known as smart growth, urban growth management, or compact city, that is designed to contain boundless urban expansion, typically decried as sprawl. It examines this paradigm in a broader global perspective and shows it to be deficient and practically useless in addressing the central questions now facing expanding cities outside the United States and Europe. In its place Shlomo Angel proposes to revive an alternative Making Room Paradigm that seeks to come to terms with the expected expansion of cities, particularly in the rapidly urbanizing countries in Asia and Africa, and to make the minimally necessary preparations for such expansion instead of seeking to contain it. This paradigm is predicated on four propositions: 1. The expansion of cities that urban population growth entails cannot be contained. Instead we must make adequate room to accommodate it. 2. City densities must remain within a sustainable range. If density is too low, it must be allowed to increase, and if it is too high, it must be allowed to decline. 3. Strict containment of urban expansion destroys the homes of the poor and puts new housing out of reach for most people. Decent housing for all can be ensured only if urban land is in ample supply. 4. As cities expand, the necessary land for public streets, public infrastructure networks, and public open spaces must be secured in advance of development. The first part of the book explores planetary urbanization in a historical and geographical perspective, to establish a global perspective for the study of cities. It confirms that we are in the midst of an urbanization project that started in earnest at the beginning of the nineteenth century, has now reached its peak with half the world population residing in urban areas, and will come to a close, possibly by the end of this century, when most people who want to live in cities will have moved there. This realization lends urgency to the call for preparing for urban expansion now, when the urbanization project is still in full swing, rather than later, when it would be too late to make a difference. The second part of the book seeks to deepen our understanding and thus lessen our fear of urban expansion by providing detailed quantitative answers to seven sets of questions regarding the dimensions and attributes of urban expansion: 1. What are the extents of urban areas everywhere and how fast are they expanding over time? 2. How dense are these urban areas and how are urban densities changing over time? 3. How centralized are the residences and workplaces in cities and do they tend to disperse to the periphery over time? 4. How fragmented are the built-up areas of cities and how are levels of fragmentation changing over time? 5. How compact are the shapes of urban footprints and how are their levels of compactness changing over time? 6. How much land would urban areas require in future decades? 7. How much cultivated land will be consumed by expanding urban areas? By answering these questions and exploring their implications for action, this book provides the conceptual framework, basic empirical data, and practical agenda necessary for the minimal yet meaningful management of the urban expansion process. The companion volume, *Atlas of Urban Expansion*, was also authored by Lincoln Institute visiting fellow Shlomo “

Three-time Hugo Award-winning and New York Times bestselling author N.K. Jemisin crafts her most incredible novel yet, a "glorious" story of culture, identity, magic, and myths in contemporary New York City. In Manhattan, a young grad student gets off the train and realizes he doesn't remember who he is, where he's from, or even his own name. But he can sense the beating heart of the city, see its history, and feel its power. In the Bronx, a Lenape gallery director discovers strange graffiti scattered throughout the city, so beautiful and powerful it's as if the paint is literally calling to her. In Brooklyn, a politician and mother finds she can hear the songs of her city, pulsing to the beat of her Louboutin heels. And they're not the only ones. Every great city has a soul. Some are ancient as myths, and others are as new and destructive as children. New York? She's got six. For more from N. K. Jemisin, check out: *The Inheritance Trilogy* *The Hundred Thousand Kingdoms* *The Broken Kingdoms* *The Kingdom of Gods* *The Inheritance Trilogy* (omnibus edition) *Shades in Shadow: An Inheritance Triptych* (e-only short fiction) *The Awakened Kingdom* (e-only novella) *Dreamblood Duology* *The Killing Moon* *The Shadowed Sun* *The Dreamblood Duology* (omnibus) *The Broken Earth* *The Fifth Season* *The Obelisk Gate* *The Stone Sky* *How Long 'til Black Future Month?* (short story collection) "A glorious fantasy." —Neil Gaiman

Some time within the first quarter of the present nineteenth century, a little old lady—some people would even have called her a dear little old lady—sat one afternoon in a high-backed chair beside a cottage window, from which might be had a magnificent view of Sicilian rocks, with the Mediterranean beyond. This little old lady was so pleasant in all respects that an adequate description of her is an impossibility. Her mouth was a perfect study. It was not troubled with anything in the shape of teeth. It lay between a delicate little down-turned nose and a soft little up-turned chin, which two seemed as if anxious to meet in order to protect it. The wrinkles that surrounded that mouth were innumerable, and each wrinkle was a distinct and separate smile; so that, whether pursing or expanding, it was at all times rippling with an expression of tender benignity. This little old lady plays no part in our tale; nevertheless she merits passing introduction as being the grandmother of our hero, a Sicilian youth of nineteen, who, at the time we write of, sat on a stool at her feet engaged in earnest conversation.

Indistinct voices, strange visitations and unusual dreams have begun to plague Nineteen-year-old Khari days before her return from London to her Oregon home. As the occurrences have spawned haunting emotions she thought she had escaped, she realizes she can't ignore them any longer and begins to surrender to their pull. Feeling weary and a bit crazy, Khari struggles to cope with what is happening to her. She is forced to open up about herself, only to find out secrets were kept from her by those she trusts the most. She then begins a problematic journey toward self-discovery and uncovers more than she ever imagined possible. But, continuing toward understanding requires Khari to face a dangerous figure, risk of death and a fight for love. Kharishma explores the importance of family ties, both past and present, the consequences of love and hate, and the power of believing in oneself. It is a story of deception, humility, discovery and the strength of bonds to the seen and unseen. It is a story that will not be easily forgotten and will leave you wishing for more.

An exploration of four cities that reflect a blend of Eastern and Western cultures traces the historical threads connecting St. Petersburg, Shanghai, Mumbai, and Dubai while discussing their conflicted embrace of modernity.

The Valley of the Giants is set on the edge of Humboldt Bay in the fictional town of Sequoia, California. Starting in the 1850s, with John Cardigan founding the logging company to build a life for him and his son Bryce, the novel follows the ups and downs of the Cardigan family and the on-going rivalry with Colonel Pennington over logging rights and other business matters. When Bryce Cardigan returns home from the college he finds out that his father's company is in trouble and that Pennington is pushing them out of business. He must try to save the company and screw Colonel Pennington, while juggling a secret relationship with Shirley, Pennington's niece.

Thirty years after its publication, *The Death and Life of Great American Cities* was described by *The New York Times* as "perhaps the most influential single work in the history of town planning....[It] can also be seen in a much larger context. It is first of all a work of literature; the descriptions of street life as a kind of ballet and the biting satiric account of traditional planning theory can still be read for pleasure even by those who long ago absorbed and appropriated the book's arguments." Jane Jacobs, an editor and writer on architecture in New York City in the early sixties, argued that urban diversity and vitality were being destroyed by powerful architects and city planners. Rigorous, sane, and delightfully epigrammatic, Jacobs's small masterpiece is a blueprint for the humanistic management of cities. It is sensible, knowledgeable, readable, indispensable. The author has written a new foreword for this Modern Library edition.

In his debut collection of poetry, Steve Coughlin examines the severity of family trauma on both personal memory and the human psyche. Written in an accessible, colloquial voice that poet J. Allyn Rosser describes as "strong, versatile, original...[and] capable of radically different tones and angles of approach," these poems move from haunted laments to playful musings as they negotiate the complexities of grief with the desire to escape into the imagination's safe refuge. Ultimately, in *ANOTHER CITY* Coughlin depicts the harsh struggles of a working class family and leaves readers to consider what healing, if any, the imagined world can offer.
