1861-1891 include meteorological reports.

Since its creation in 1884, Engineering Index has covered virtually every major engineering innovation from around the world. It serves as the historical record of virtually every major engineering innovation of the 20th century. Recent content is a vital resource for current awareness, new production information, technological forecasting and competitive intelligence. The world's most comprehensive interdisciplinary engineering database, Engineering Index contains over 10.7 million records. Each year, over 500,000 new abstracts are added from over 5,000 scholarly journals, trade magazines, and conference proceedings. Coverage spans over 175 engineering disciplines from over 80 countries. Updated weekly.

This monograph on the forecasting of long-range Air Force science began as an attempt to describe the five major scientific studies undertaken by the U.S. Army Air Force (USAAF)/U.S. Air Force (USAF) since the end of World War II. 'Toward New Horizons' was initiated to summarize the most advanced air power technologies of World War II and project them into the future. 'Woods Hole Summer Studies' organized hundreds of academic scientists to predict the short and long-term military uses of space. 'Project Forecast' had the mandate of revitalizing Air Force thinking by linking national policy issues of scientific vistas and new weapon systems. 'New Horizons II' endeavored to point the way toward technological improvements in a period of expected scarcity. 'Project Forecast II' sought to infuse the Air Force laboratories with new avenues of basic science research.

Beskriver hvorledes USAF benytter videnskaben og den teknologiske udvikling til at optimere sin Air Power også på længere sigt

Analyses UNHCR's supervision of international refugee law and compliance with international standards in helping to ensure and advance refugee rights.

"I agree with Singer and Langdon who point out over and over again that the conquerors and the conquered shared in both the benefits and the sacrifices of imperialism. All this makes for a notable work."—William A. Hoisington, Jr., Professor Emeritus of Modern European & French Colonial History, University of Illinois at Chicago Bridging gaps between intellectual history, biography, and military/colonial history, Barnett Singer and John Langdon provide a challenging, readable interpretation of French imperialism and some of its leading figures from the early modern era through the Fifth Republic. They ask us to rethink and reevaluate, pulling away from the usual shoal of simplistic condemnation. In a series of finely-etched biographical studies, and with much detail on both imperial culture and wars (including World War I and II), they offer a balanced, deep, strong portrait of key makers and defenders of the French Empire, one that will surely stimulate much historical work in the field. "Cultured Force is a revisionist work, first because it takes vigorous issue with prevalent negative views of colonial activity, second because it presents most of the military figures who are the heroes of the tale as cultivated, sensitive, all-round men. And its focus on individual personalities brings the story to life, filling it with anecdotes and color. . . The result is intriguing, mostly convincing, sometimes demanding, and quite fascinating."—Eugen Weber, Professor Emeritus of Modern European History, UCLA "Scholarly and yet passionately personal—without in any way drifting from the essential bibliographic and
