The first autobiography of a jazz musician, Louis Armstrong's *Swing That Music* is a milestone in jazz literature. Armstrong wrote most of the biographical material, which is of a different nature and scope than that of his other, later autobiography, *Satchmo: My Life in New Orleans* (also published by Da Capo/Perseus Books Group). *Satchmo* covers in intimate detail Armstrong's life until his 1922 move to Chicago; but *Swing That Music* also covers his days on Chicago's South Side with "King" Oliver, his courtship and marriage to Lil Hardin, his 1929 move to New York, the formation of his own band, his European tours, and his international success. One of the most earnest justifications ever written for the new style of music then called "swing" but more broadly referred to as "Jazz," *Swing That Music* is a biography, a history, and an entertainment that really "swings."

"Having been born a freeman, and for more than thirty years enjoyed the blessings of liberty in a free State—and having at the end of that time been kidnapped and sold into Slavery, where I remained, until happily rescued in the month of January, 1853, after a bondage of twelve years—it has been suggested that an account of my life and fortunes would not be uninteresting to the public." -an excerpt

"The Invention of Martial Arts examines the media history of what we now call 'martial arts' and argues that martial arts is a cultural construction that was born in film, TV and other media. It argues that 'martial arts' exploded into popular consciousness entirely thanks to the work of media. Of course, the book does not deny the existence of real, material histories and non-media dimensions in martial arts practices. But it thoroughly recasts the status of such histories, combining recent myth-busting findings in historical martial arts research with important insights into the discontinuous character of history, the widespread 'invention of tradition', the orientalism and imagined geographies that animate many ideas about history, and the frequent manipulation of history for reasons of status, cultural capital, private or public power, politics, and/or financial gain. In doing so, *The Invention of Martial Arts* argues for the primacy of media representation as key player in the emergence and spread of martial arts. This argument overturns the dominant belief that 'real practices' are primary, while representations are secondary. The book makes its case via historical analysis of the British media history of such Eastern and Western martial arts as Bartitsu, jujutsu, judo, karate, tai chi and MMA across a range of media, from newspapers, comics and books to cartoon, film and TV series, as well as television adverts and music videos, focusing on key but often overlooked texts such as adverts for 'Hai Karate', the 1970s disco hit 'Kung Fu Fighting', and many other mainstream and marginal media texts"--

Rediscover the pleasure you got from childhood drawing, before you became too self-conscious and self-critical to enjoy it. Most children draw. Before we can write, even, we scribble and sketch and create. But somehow that gets lost as we get older. We learn that Being An Artist is hard and complicated, and that there are technical rules to choosing colour and perfecting your perspective. This book is here to remind you of the joy you once found in creating, scribbling, getting something down on paper – and that it's really about the process and nothing to do with how technically brilliant the finished 'artwork' is. In this accessible guide, largely self-taught artist Jen Russell-Smith takes beginners by the hand and breaks down the barriers we face around sketching, and shows you how to begin with quick, loose sketches building your confidence and skills to draw spontaneously, with nothing more than the things around you for inspiration. With simple exercises that anyone can follow, Jen shows you how to sketch the things and the places around you from life, using simple watercolour techniques to add vibrancy to your work.

Mythology, Madness and Laughter: Subjectivity in German Idealism explores some long neglected but crucial themes in German idealism. Markus Gabriel, one of the most exciting young voices in contemporary philosophy, and Slavoj Žižek, the celebrated contemporary philosopher and cultural critic, show how these themes impact on the problematic relations between being and appearance, reflection and the absolute, insight and ideology, contingency and necessity, subjectivity, truth, habit and freedom. Engaging with three central figures of the German idealist movement, Hegel, Schelling, and Fichte, Gabriel, and Žižek, who here shows himself to be one of the most erudite and important scholars of German idealism, ask how is it possible for Being to appear in reflection without falling back into traditional metaphysics. By applying idealistic theories of reflection and concrete subjectivity, including the problem of madness and everydayness in Hegel, this hugely important book aims to reinvigorate a philosophy of finitude and contingency, topics at the forefront of contemporary European philosophy. MARKUS GABRIEL is Assistant Professor of Philosophy at the New School for Social Research, NY. He has published a number of books and journal articles in German, including *Der Mensch im Mythos* (De Gruyter, 2006), and *Das Absolute und die Welt in Schellings Freiheitsschrift* (Bonn University Press, 2006).

Bad Attitude is a collection of writings and graphics from the extraordinary *Processed Word* magazine. Dedicated to giving voice to the benumbed foot-soldiers of the information age it contains blistering first-hand accounts of life at the bottom of the ladder in big banks, defense

contractors, computer manufacturers and food processing factories. In these pages the service economy and the new high tech jobs often touted in glowing terms by the mainstream media are exposed for their quotidian banality, their essential uselessness, and the catch-22 absurdity that permeates all corporate life under late capitalism. Moving at bike messenger speed between offices, *Bad Attitude* describes the hazards of the office computer and how to sabotage it, mutant culture in Silicon Valley, the new transiency undercutting links at work, the connections between time and money, bosses and secretaries, resistance and resignation. It provides a unique basis for new theoretical developments in the struggle for human liberation, and, above all, it assures the thousands of isolated rebels mired in dead-end and deadening jobs that they are not alone. The spark of revolt can and must be nurtured until the next wave comes along.

With three generations of one family we share moments that are meant to be savored in this special book that beautifully illustrates the words John Lennon and Paul McCartney's world-renowned song "In My Life." There are places I'll remember, in my life, though some have changed... One gift with a bright bow starts a young girl on a path...one her mother follows with her as she explores, grows, and rides off on her own, only to return again with her own daughter in tow. This hauntingly beautiful book shares the small moments of that journey that are meant to be remembered and savored in the lyrics of this classic song.

Over 30 of the greatest jazz songs ever, specially arranged for ukulele. Includes full lyrics, strumming patterns and ukulele chord diagrams.

Cultural responses to most illnesses differ; dementia is no exception. These responses, together with a society's attitudes toward its elderly population, affect the frequency of dementia-related diagnoses and the nature of treatment. Bringing together essays by nineteen respected scholars, this unique volume approaches the subject from a variety of angles, exploring the historical, psychological, and philosophical implications of dementia. Based on solid ethnographic fieldwork, the essays employ a cross-cultural perspective and focus on questions of age, mind, voice, self, loss, temporality, memory, and affect. Taken together, the essays make four important and interrelated contributions to our understanding of the mental status of the elderly. First, cross-cultural data show the extent to which the aging process, while biologically influenced, is also very much culturally constructed. Second, detailed ethnographic reports raise questions about the behavioral criteria used by health care professionals and laymen for defining the elderly as demented. Third, case studies show how a diagnosis affects a patient's treatment in both clinical and familial settings.; Finally, the collection highlights the gap that separates current biological understandings of aging from its cultural meanings. As Alzheimer's disease and other forms of dementia continue to command an ever-increasing amount of attention in medicine and psychology, this book will be essential reading for anthropologists, social scientists, and health care professionals. This book describes and systematizes all aspects of the grammar of Russian: the patterns of orthography, sounds, inflection, syntax, tense-aspect-mood, word order, and intonation. It is especially concerned with the meaning of combinations of words (constructions). The core concept is that of the predicate history: a record of the states of entities through time and across possibilities. Using predicate histories, the book presents an integrated account of the semantics of verbs, nouns, case, and aspect. More attention is paid to syntax than in any other grammars of Russian written in English or in other languages of Western Europe. Alan Timberlake refers to the literature on variation and trends in development, and makes use of contemporary data from the internet. This book will appeal to students, scholars and language professionals interested in Russian.

inch....this work is likely to become a standart work very quickly and is to be recommended to all schools where recorder studies are undertaken inch. (Oliver James,Contact Magazine) A novel and comprehensive approach to transferring from the C to F instrument. 430 music examples include folk and national songs (some in two parts), country dance tunes and excerpts from the standard treble repertoire of•Bach, Barsanti, Corelli, Handel, Telemann, etc. An outstanding feature of the book has proved to be Brian Bonsor's brilliantly simple but highly effective practice circles and recognition squares designed to give, in only a few minutes, concentrated practice on the more usual leaps to and from each new note and instant recognition of random notes. Quickly emulating the outstanding success of the descant tutors, these books are very popular even with those who normally use tutors other than the Enjoy the Recorder series.

Kim Addonizio's latest collection of poetry, My Black Angel" Blues Poems and Portraits, is an amazing work; featuring woodcuts by book artisan Charles D. Jones, My Black Angel is both an auditory pleasure and visual feast. First, Addonizio's poetry celebrates the blues tradition in poetry much the way Langston Hughes, James Weldon Johnson, and Paul Laurence Dunbar did; she understands, feels, knows blues rhythms and the result is an incomparable and important poetry. Furthermore, Jones' accompanying art encompasses the blues medium and personalities Addonizio so aptly employs in her poetry: edgy and surprising, multifaceted with concurrent streams of meaning, his woodcuts feature such blues personalities as Blind Willie Johnson, Robert Johnson, Billie Holliday, Muddy Waters, Lightnin' Hopkins, John Lee Hooker, Big Mama Thornton, and more. The concert resultant from this collaboration is a dynamic performance bound to turn readers' attentions to the music and tradition of the blues, to seek out the sources, to immerse in the blues.

Painting and Understanding Abstract Art is a practical book on how to paint abstracts but it also explains how to approach and understand abstract art. It moves the teaching of art from a doing level of painting a certain subject in a particular medium to a thinking level of 'what am I doing when I paint?' and 'what am I trying to say in this painting?' Using practical exercises with explanatory text, John Lowry develops the thinking and doing processes together and leads the reader to a greater understanding and appreciation of this most exciting art genre. Gives advice on moving from figurative painting towards abstraction, and explains the tools to abstraction - simplifying and exaggerating; eliminating curves and straights; changing colours, lines and items ; emphasising positive and negative shapes; and using contrast. Includes practical exercises to help develop your own style and understand the techniques of the masters, and offers an overview of the lives and times of artists involved in the stage-by-stage evolution from realism to abstraction. Aimed at beginners and the more experienced, and illustrated with 229 colour illustrations.
