

Grade 11 June Geography Questin Paper 2014

The book weaves the story of the complex links between education and its territories. The aim here is to examine the education couple - understood in the broadest sense: school, college, high school, universities - and territory, according to three main axes: the history and the characterization of the different ties maintained And which the school and its territory always maintain; That of the categorization and characterization of the territories in which the school is situated, of the educational policies - both explicit and grassroots - connected with it and their effects on the school; That of recent pedagogical, didactic and organizational innovations. The book is based on French specialists in territorial education issues.

For centuries, the Catholic Church ran schools around the world, but by the 20th century most countries had moved to a state school system. Piety and Privilege shows Ireland as an exception, with the state financing schools, leaving the Church to promote practices aimed at salvation of souls and at the reproduction of a loyal middle class.
