This book offers a meso-level description of demographics, science education, and science teacher education. Representing all 13 Canadian jurisdictions, the book provides local insights that serve as the basis for exploring the Canadian system as a whole and function as a common starting point from which to identify causal relationships that may be associated with Canada's successes. The book highlights commonalities, consistencies, and distinctions across the provinces and territories in a thematic analysis of the 13 jurisdiction-specific chapters. Although the analysis indicates a network of policy and practice issues warranting further consideration, the diverse nature of Canadian science education makes simple identification of causal relationships elusive. Canada has a reputation for strong science achievement. However, there is currently limited literature on science education in Canada at the general level or in specific areas such as Canadian science curriculum or science teacher education. This book fills that gap by presenting a thorough description of science education at the provincial/territorial level, as well as a more holistic description of pressing issues for Canadian science education.

Dissatisfied with the state of in public education, a small group of Halifax parents and university professors banded together in September 1958 to found a school of their own. Paul Bennett tells the story of the Halifax Grammar School in this illustrated history. Bennett describes the many larger-than-life personalities and the ebbs and flows of the school's development over the past fifty years. In recent years the School has enjoyed a resurgence, expanding to acquire the historic Tower Road School, and doubling in student population. This illustrated book explores how the Grammar School has influenced education in Nova Scotia by challenging the standards and practice and offering an alternative to the public system.

Study & Master Agricultural Sciences Grade 12 has been especially developed by an experienced author team for the Curriculum and Assessment Policy Statement (CAPS). This new and easy-to-use course helps learners to master essential content and skills in Agricultural Sciences.

“Although standards-based reform emerged in the United States and the United Kingdom, the idea has spread across the world, as an approach to systemic reform. It might appear that there is a world-wide “tsunami” of standards-based reform that will standardize and homogenize the educational system across the globe. This volume makes it very clear, however, that there is no one approach to standards-based reform and countries change – there is a danger in paying attention to its evolution and impact in only one context.

That’s what makes this volume so valuable. Louis Volante

has drawn together descriptions from a wide range of countries, all involved in large-scale reform and using standards and assessments as part of their process. What becomes very obvious is that the language may be the same but the words reflect different contexts and can represent very different ideals, values, and processes. I'm sure you will find this book as interesting and challenging as I have – a gem that pushes your thinking and does not allow readers to remain neutral.” (Lorna Earl)
