This volume constitutes a multidisciplinary intervention into the emerging field of postcolonial studies in Italy, bringing together cultural and social history, critical and political theory, literary and cinematic analyses, ethnomusicology and cultural studies, anthropological fieldwork, and race, gender, diaspora, and urban studies.

Exploring literature, the visual and performing arts, photography, music, and film, the author uses the lens of European machine culture to elucidate the work of a broad set of artists and practitioners, including Censi, Depero, Marinetti, Munari, and Prampolini. The machine emerges here as an archaeology of technology in modernity: the time machine of futurism.

How big data is transforming the creative industries, and how those industries can use lessons from Netflix, Amazon, and Apple to fight back. “[The authors explain] gently yet firmly exactly how the internet threatens established ways and what can and cannot be done about it. Their book should be required for anyone who wishes to believe that nothing much has changed.”

—The Wall Street Journal “Packed with examples, from the nimble-footed who reacted quickly to adapt their businesses, to laggards who lost empires.” —Financial Times Traditional network television programming has always followed the same script: executives approve a pilot, order a trial number of episodes, and broadcast them, expecting viewers to watch a given show on their television sets at the same time every week. But then came Netflix's House of Cards. Netflix gauged the show's potential from data it had gathered about subscribers' preferences, ordered two seasons without seeing a pilot, and uploaded the first thirteen episodes all at once for viewers to watch whenever they wanted on the devices of their choice. In this book, Michael Smith and Rahul Telang, experts on entertainment analytics, show how the success of House of Cards upended the film and TV industries—and how companies like Amazon and Apple are changing the rules in other entertainment industries, notably publishing and music. We're living through a period of unprecedented technological disruption in the entertainment industries. Just about everything is affected: pricing, production, distribution, piracy. Smith and Telang discuss niche products and the long tail, product differentiation, price discrimination, and incentives for users not to steal content. To survive and succeed, businesses have to adapt rapidly and creatively. Smith and Telang explain how. How can companies discover who their customers are, what they want, and how much they are willing to pay for it? Data. The entertainment industries, must learn to play a little “moneyball.” The bottom line: follow the data.

The acclaimed and now-classic biographical novel of Walter Benjamin's last days--adapted into screenplay by Jay Parini. It is 1940. For the past decade, Walter Benjamin--the German-Jewish critic and philosopher--has been writing his masterpiece in a library in Paris, a city he loves. Now Nazi tanks have overrun the suburbs, and Benjamin is forced to flee. With a battered briefcase that contains his precious manuscript of a thousand handwritten pages, he sets off for the border and is led by chance to a young anti-Nazi who is taking Jews and other refugees over the Pyrenees into Spain, where they may (with luck) make their way to freedom in Portugal or South America. Beloved biographical novelist Jay Parini's thrilling tale of escape is beautifully interwoven with vignettes of Benjamin's complex, cosmopolitan past: his privileged childhood in Berlin, his years with the German Youth Movement, his university days. His close friendship with Gershom Scholem, the eminent scholar of Jewish mysticism, and many other well-known artists and intellectuals who were part of Benjamin's intimate circle between the two world wars. Part tragedy, part dark comedy, this sharply realized historical novel tells one of the great and most moving peripheral stories of the Holocaust.

The New York Times bestselling debut book of poetry from Lana Del Rey, *Violet Bent Backwards Over the Grass*. “Violet Bent Backwards Over the Grass is the title poem of the book and the first poem I wrote of many. Some of which came to me in their entirety, which I dictated and then typed out, and some that I worked laboriously picking apart each word to make the perfect poem. They are eclectic and honest and not trying to be anything other than what they are and for that reason I’m proud of them, especially because the spirit in which they were written was very authentic.” —Lana Del Rey Lana’s breathtaking first book solidifies her further as “the essential writer of her times” (The Atlantic). The collection features more than thirty poems, many exclusive to the book: *Never to Heaven*, *The Land of 1,000 Fires*, *Past the Bushes Cypress Thriving*, *LA Who Am I to Love You?*, *Tessa DiPietro*, *Happy*, *Paradise Is Very Fragile*, *Bare Feet on Linoleum*, and many more. This beautiful hardcover edition showcases Lana’s typewritten manuscript pages alongside her original photography. The result is an extraordinary poetic landscape that reflects the unguarded spirit of its creator. *Violet Bent Backwards Over the Grass* is also brought to life in an unprecedented spoken word audiobook which features Lana Del Rey reading fourteen select poems from the book accompanied by music from Grammy Award–winning musician Jack Antonoff.

Algorithms specify the way computers process information and how they execute tasks. Many recent technological innovations and achievements rely on algorithmic ideas – they facilitate new applications in science, medicine, production, logistics, traffic, communication and entertainment. Efficient algorithms not only enable your personal computer to execute the newest generation of games with features unimaginable only a few years ago, they are also key to several recent scientific breakthroughs – for example, the sequencing of the human genome would not have been possible without the invention of new algorithmic ideas that speed up computations by several orders of magnitude. The greatest improvements in the area of algorithms rely on beautiful ideas for tackling computational tasks more efficiently. The problems solved are not restricted to arithmetic tasks in a narrow sense but often relate to exciting questions of nonmathematical flavor, such as: How can I find the exit out of a maze? How can I partition a treasure map so that the treasure can only be found if all parts of the map are recombined? How should I plan my trip to minimize cost? Solving these challenging problems requires logical reasoning, geometric and combinatorial imagination, and, last but not least, creativity – the skills

needed for the design and analysis of algorithms. In this book we present some of the most beautiful algorithmic ideas in 41 articles written in colloquial, nontechnical language. Most of the articles arose out of an initiative among German-language universities to communicate the fascination of algorithms and computer science to high-school students. The book can be understood without any prior knowledge of algorithms and computing, and it will be an enlightening and fun read for students and interested adults.

Hollywood Godfather is Gianni Russo's over-the-top memoir of a real-life mobster-turned-actor who helped make The Godfather a reality, and his story of life on the edge between danger and glamour. Gianni Russo was a handsome 25-year-old mobster with no acting experience when he walked onto the set of The Godfather and entered Hollywood history. He played Carlo Rizzi, the husband of Connie Corleone, who set her brother Sonny—played by James Caan—up for a hit. Russo didn't have to act—he knew the mob inside and out: from his childhood in Little Italy, where Mafia legend Frank Costello took him under his wing, to acting as a messenger for New Orleans mob boss Carlos Marcello during the Kennedy assassination, to having to go on the lam after shooting and killing a member of the Colombian drug cartel in his Vegas club. Along the way, Russo befriended Frank Sinatra, who became his son's godfather, and Marlon Brando, who mentored his career as an actor after trying to get Francis Ford Coppola to fire him from The Godfather. Russo had passionate affairs with Marilyn Monroe, Liza Minelli, and scores of other celebrities. He went on to become a producer and starred in The Godfather: Parts I and II, Seabiscuit, Any Given Sunday and Rush Hour 2, among many other films. Hollywood Godfather is a no-holds-barred account of a life filled with violence, glamour, sex—and fun.

The essays in this volume reexamine Coppola's The Godfather trilogy from a variety of perspectives.

Lion of Hollywood is the definitive biography of Louis B. Mayer, the chief of Metro-Goldwyn-Mayer—MGM—the biggest and most successful film studio of Hollywood's Golden Age. An immigrant from tsarist Russia, Mayer began in the film business as an exhibitor but soon migrated to where the action and the power were—Hollywood. Through sheer force of energy and foresight, he turned his own modest studio into MGM, where he became the most powerful man in Hollywood, bending the film business to his will. He made great films, including the fabulous MGM musicals, and he made great stars: Garbo, Gable, Garland, and dozens of others. Through the enormously successful Andy Hardy series, Mayer purveyed family values to America. At the same time, he used his influence to place a federal judge on the bench, pay off local officials, cover up his stars' indiscretions and, on occasion, arrange marriages for gay stars. Mayer

rose from his impoverished childhood to become at one time the highest-paid executive in America. Despite his power and money, Mayer suffered some significant losses. He had two daughters: Irene, who married David O. Selznick, and Edie, who married producer William Goetz. He would eventually fall out with Edie and divorce his wife, Margaret, ending his life alienated from most of his family. His chief assistant, Irving Thalberg, was his closest business partner, but they quarreled frequently, and Thalberg's early death left Mayer without his most trusted associate. As Mayer grew older, his politics became increasingly reactionary, and he found himself politically isolated within Hollywood's small conservative community. *Lion of Hollywood* is a three-dimensional biography of a figure often caricatured and vilified as the paragon of the studio system. Mayer could be arrogant and tyrannical, but under his leadership MGM made such unforgettable films as *The Big Parade*, *Ninotchka*, *The Wizard of Oz*, *Meet Me in St. Louis*, and *An American in Paris*. Film historian Scott Eyman interviewed more than 150 people and researched some previously unavailable archives to write this major new biography of a man who defined an industry and an era.

Dante Alighieri's *Divine Comedy* has, despite its enormous popularity and importance, often stymied readers with its multitudinous characters, references, and themes. But until the publication in 2007 of Guy Raffa's guide to the *Inferno*, students lacked a suitable resource to help them navigate Dante's underworld. With this new guide to the entire *Divine Comedy*, Raffa provides readers—experts in the Middle Ages and Renaissance, Dante neophytes, and everyone in between—with a map of the entire poem, from the lowest circle of Hell to the highest sphere of Paradise. Based on Raffa's original research and his many years of teaching the poem to undergraduates, *The Complete Danteworlds* charts a simultaneously geographical and textual journey, canto by canto, region by region, adhering closely to the path taken by Dante himself through Hell, Purgatory, and Paradise. This invaluable reference also features study questions, illustrations of the realms, and regional summaries. Interpreting Dante's poem and his sources, Raffa fashions detailed entries on each character encountered as well as on many significant historical, religious, and cultural allusions.

In 1798, the armies of the French Revolution tried to transform Rome from the capital of the Papal States to a Jacobin Republic. For the next two decades, Rome was the subject of power struggles between the forces of the Empire and the Papacy, while Romans endured the unsuccessful efforts of Napoleon's best and brightest to pull the ancient city into the modern world. Against this historical backdrop, Nicassio weaves together an absorbing social, cultural, and political history of Rome and its people. Based on primary sources and incorporating two centuries of Italian, French, and international research, her work reveals what life was like for Romans in the age of Napoleon. "A remarkable book that wonderfully vivifies an understudied era in the history of Rome. . . . This book will engage anyone interested in early modern cities, the relationship between religion and daily life, and the history of the city of Rome."—*Journal of Modern History* "An engaging account of Tosca's Rome. . . . Nicassio provides a fluent introduction to her subject."—*History Today* "Meticulously researched, drawing on a host of original manuscripts, memoirs, personal letters, and secondary sources, enabling [Nicassio] to bring her story to life."—*History*

Winner, category of Architecture and Urban Studies in the 1991 Professional/Scholarly Publishing Annual Awards Competition presented by the Association of American Publishers, Inc. and Winner, Alice Davis Hitchcock Award, Society of Architectural Historians. Richard Etlin's sweeping, generously illustrated study explores the changing idea of modernism in Italian architecture over the five crucial decades that saw the birth and crystallization of modern architecture. Systematically treating the major architects and movements of the period - such as Raimondo D'Aronoco and Art Nouveau, Antonio Sant'Elia and Futurism, Marcello Piacentini and the modern vernacular, Giovanni Muzio and the Novecento, Giuseppe Terragni and Italian Rationalism - this book also explores the ways in which the original ideals of the various movements were transformed by working for the Fascist state. *Modernism in Italian Architecture* examines the legacy of the romantic revolution, which confronted architects with the dilemma of how to create an architecture that was both modern and national. It challenges accepted opinion on a variety of issues. Etlin argues against too close an association of Sant'Elia's architecture and manifesto with Futurism by demonstrating a broader context for its themes. His study of Novecento architecture chronicles a movement whose use of classical detailing created a "postmodernism" contemporaneous with the pioneering buildings of the International Style elsewhere in Europe and preceding its arrival in Italy. Etlin undermines the notion that the architects of Italian Rationalism blindly followed an antihistorical credo, by bringing to light the profoundly contextual nature of the abstract geometries of the best Rationalist architecture. The final section, devoted to Fascism, focuses on Terragni's famous Casa del Fascio in Como and the Dantearn project by Terragni and Lingeri. Etlin concludes with a consideration of the anti-Semitic attacks on modern architecture during the Fascist racial campaign of 1938. Richard Etlin is Professor in the School of Architecture at the University of Maryland.

There are many good books on Italian immigration to the United States, including success biographies, field researches and historical investigations. What is lacking however is an account of the immigrant experience from a "grassroots" point of view. This book tells the stories of a normal people, the great majority of the immigrant population, through their own, sometimes almost illiterate, words. With this book I aim to contribute to this country's story of immigration with these first-hand accounts of those who lived it, first-generation immigrants. It was said once, by Giuseppe Prezzolini, that Italian immigration left tears and sweat but not "words." The material of this book proves such arrogance wrong. I tried to be as thorough as possible in my field research looking for such "words" on both sides of the Ocean. I consulted Italian and American archives, I looked for books out of print, and scavenged for unpublished ones in private houses and forgotten drawers. What I found fills a silence and gives a wider spectrum of the immigrant experience, from the miner to the tailor, from the janitor to the professor. The book will interest scholars of Italian immigration because it adds information from within the protagonists' self. Their tales may be average, their memory may be inaccurate but their drive toward a new life and their immigrant "philosophy," made of grinding teeth and hope, is all there in its

most fresh features. The book will also interest scholars of the autobiographical genre because it adds a new facet to the autobiographical voice. There are only a few studies on the life writing of the lower class (which come from France and England, not the US). I have tried to formulate new concepts that describe the autobiographical "I" of these works, conc

It is 1977. A new force is terrorising Rome - a mob of reckless, ultraviolent youths known as La Banda della Magliana. As the gang ruthlessly take control of Rome's heroin trade, they begin an inexorable rise to power. Banda della Magliana intend to own the streets of Rome - unless their internal struggles tear them apart. Based on Rome's modern gangland history, *Romanzo Criminale* fearlessly confronts Italy's Age of Lead: war on the streets and terrorism, kidnappings and corruption at the highest levels of government. Best known for directing the Impressionist classic *The Smiling Madame Beudet* and the first Surrealist film *The Seashell and the Clergyman*, Germaine Dulac, feminist and pioneer of 1920s French avant-garde cinema, made close to thirty fiction films as well as numerous documentaries and newsreels. Through her filmmaking, writing, and cine-club activism, Dulac's passionate defense of the cinema as a lyrical art and social practice had a major influence on twentieth century film history and theory. In *Germaine Dulac: A Cinema of Sensations*, Tami Williams makes unprecedented use of the filmmaker's personal papers, production files, and archival film prints to produce the first full-length historical study and critical biography of Dulac. Williams's analysis explores the artistic and sociopolitical currents that shaped Dulac's approach to cinema while interrogating the ground breaking techniques and strategies she used to critique conservative notions of gender and sexuality. Moving beyond the director's work of the 1920s, Williams examines Dulac's largely ignored 1930s documentaries and newsreels establishing clear links with the more experimental impressionist and abstract works of her early period. This vivid portrait will be of interest to general readers, as well as to scholars of cinema and visual culture, performance, French history, women's studies, queer cinema, in addition to studies of narrative avant-garde, experimental, and documentary film history and theory.

Discusses renowned masters including Roberto Rossellini and Federico Fellini, as well as directors lesser known outside Italy like Dino Risi and Ettore Scola. The author examines overlooked Italian genre films such as horror movies, comedies, and Westerns, and he also devotes attention to neglected periods like the Fascist era. He illuminates the epic scope of Italian filmmaking, showing it to be a powerful cultural force in Italy and leaving no doubt about its enduring influence abroad. Encompassing the social, political, and technical aspects of the craft, the author recreates the world of Italian cinema.

In the *Mother of Invention* in their analyses of literature, painting, sculptures, film, and fashion, the contributors explore the politics of invention articulated by these women as they negotiated prevailing ideologies.

The Godfather Doctrine draws clear and essential lessons from perhaps the greatest Hollywood movie ever made to illustrate America's changing geopolitical place in the world and how our country can best meet the momentous strategic challenges it faces. In the movie *The Godfather*, Don Corleone, head of New York's most powerful organized-crime family, is shockingly gunned down in broad daylight, leaving his sons Sonny and Michael, along with his adopted son, consigliere Tom Hagen, to chart a new course for the family. In *The Godfather Doctrine*, John Hulsman and Wess Mitchell show how the aging and wounded don is emblematic of cold-war American power on the decline in a new world where our enemies play by unfamiliar rules, and how the don's heirs uncannily exemplify the three leading schools of American foreign policy today. Tom, the left-of-center liberal institutionalist, thinks the old rules still apply and that negotiation is the answer. Sonny is the Bush-era neocon who shoots first and asks questions later, proving an easy target for his enemies. Only Michael, the realist, has a sure feel for the changing scene, recognizing the need for flexible combinations of soft and hard power to keep the family strong and maintain its influence and security in a dangerous and rapidly changing world. Based on Hulsman and Mitchell's groundbreaking and widely debated article, "Pax Corleone," *The Godfather Doctrine* explains for everyone why Francis Ford Coppola's epic story about a Mafia dynasty holds key insights for ensuring America's survival in the twenty-first century.

A collection of Hunt's essays, many previously unpublished, dealing with the ways in which men and women have given meaning to gardens and landscapes, especially with the ways in which gardens have represented the world of nature "picturesquely".

The other side of twentieth-century architectural history in Italy and Europe. The short-lived cultural journal *Quadrante* transformed the practice of architecture in fascist Italy. Over the course of three years (1933–36), the magazine agitated for an "architecture of the state" that would represent the values and aspirations of the fascist regime, and in so doing it changed the language with which architects and their clientele addressed the built environment. *Quadrante* rallied supporters and organized the most prominent practitioners and benefactors of Italian rationalism into a coherent movement that advanced the cause of specific currents of modern architecture in interwar Italy. Through a detailed study of *Quadrante* and its circle of architects, critics, artists, and patrons, the book investigates the relationship between modern architecture and fascist political practices in Italy during Benito Mussolini's regime (1922–1943).
