Legal Services Authorities Act aims to constitute Legal Services authorities to provide free and competent legal Service to the weaker sections of the society to ensure that opportunities for securing justice are not denied to any citizen by reason of economic or other disabilities, and to organise Lok Adalats to secure that the operation of the legal system promotes justice on a basis of equal opportunity. This Work is a legal commentary on the working of the Act.

Countries that have sustained rapid growth over decades have typically had a strong public commitment to expanding education as well as to improving learning outcomes. South Asian countries have made considerable progress in expanding access to primary and secondary schooling, with countries having achieved near-universal enrollment of the primary-school-age cohort (ages 6†“11), except for Afghanistan and Pakistan. Secondary enrollment shows an upward trend as well. Beyond school, many more people have access to skilling opportunities and higher education today. Although governments have consistently pursued policies to expand access, a prominent feature of the region has been the role played by nonstate actors—private nonprofit and forprofit entities—in expanding access at every level of education. Though learning levels remain low, countries in the region have shown a strong commitment to improving learning. All countries in South Asia have taken the first step, which is to assess learning outcomes regularly. Since 2010, there has been a rapid increase in the number of large-scale student learning assessments conducted in the region. But to use the findings of these assessments to improve schooling, countries must build their capacity to design assessments and analyze and use findings to inform policy.

Comprehensive second editions of History for the IB Diploma Paper 2, revised for first teaching in 2015.

"The work-book entitled 'Student's Laboratory Workbook' is designed to assist both teaching & learning process at an institute where laboratory classes are scheduled on regular basis. During teaching, students will note down the important points demonstrated by the teacher incharge. In addition, students will also complete their worksheets with their findings and observations during every practical when they perform. On other hand teacher incharge will be able to evaluate the understanding level of the students using defined parameters and can record the continuous assessment of the student time to time. Over all, this book may assist in maintaining the quality of teaching and learning specially in laboratory course."

Mathematic

Over the last thirty years, several disciplines and sub-disciplines have emerged to deepen our understanding of public policy. However, this literature is dominated by western scholarship and has developed within the context of American and (Western) European public institutions. Efforts to place this literature in the context of the global South have been conspicuous by their absence. This book seeks to bridge this gap by placing this literature in the context of Indian public policy processes and reviews key concepts, theories and models that are employed in the study for students of public policy, policy change and administration and governance and management. It aims to shape our understanding of public policy processes as developed across several disciplines and study them within the Indian context, explaining most ideas and concepts with reference to India and the global South.
