In this book, Jonathan H. Turner combines sociology, evolutionary biology, cladistic analysis from biology, and comparative neuroanatomy to examine human nature as inherited from common ancestors shared by humans and present-day great apes. Selection pressures altered this inherited legacy for the ancestors of humans—termed hominins for being bipedal—and forced greater organization than extant great apes when the hominins moved into open-country terrestrial habitats. The effects of these selection pressures increased hominin ancestors' emotional capacities through greater social and group orientation. This shift, in turn, enabled further selection for a larger brain, articulated speech, and culture along the human line. Turner elaborates human nature as a series of overlapping complexes that are the outcome of the inherited legacy of great apes being fed through the transforming effects of a larger brain, speech, and culture. These complexes, he shows, can be understood as the cognitive complex, the psychological complex, the emotions complex, the interaction complex, and the community complex.

If a student does not meet the minimum required score set by the state, it's an indication that the student needs more academic preparation. The high school is then required to provide postsecondary preparatory instruction. All students enrolled in public high school in the state of Florida are required to take the PERT in the eleventh grade. The PERT tests students' abilities in math, reading, and writing. The test directly tests for competence for intermediate algebra and freshman level composition. The PERT is not timed, and each section has thirty questions. Scoring The PERT is not a test to pass or fail; it's used to determine the best academic path toward college for students. It's important for students to take the PERT seriously (even though it isn't graded) to ensure they are placed in the most appropriate classes. The PERT is scored by section in a range of 50 - 150, with "cut scores" throughout (so students will get three different scores). There are three or four tiers (depending on the section) of cut scores to determine what level students are currently at.

The critically acclaimed, award-winning, modern classic *Speak* is now a stunning graphic novel. "Speak up for yourself—we want to know what you have to say." From the first moment of her freshman year at Merryweather High, Melinda knows this is a big fat lie, part of the nonsense of high school. She is friendless—an outcast—because she busted an end-of-summer party by calling the cops, so now nobody will talk to her, let alone listen to her. Through her work on an art project, she is finally able to face what really happened that night: She was raped by an upperclassman, a guy who still attends Merryweather and is still a threat to her. With powerful illustrations by Emily Carroll, Laurie Halse Anderson's *Speak: The Graphic Novel* comes alive for new audiences and fans of the classic novel. This title has Common Core connections.
