Derived from the word "to propagate," the idea and practice of propaganda concerns nothing less than the ways in which human beings communicate, particularly with respect to the creation and

widespread dissemination of attitudes, images, and beliefs. Much larger than its pejorative connotations suggest, propaganda can more neutrally be understood as a central means of organizing and shaping thought and perception, a practice that has been a pervasive feature of the twentieth century and that touches on many fields. It has been seen as both a positive and negative force, although abuses under the Third Reich and during the Cold War have caused the term to stand in, most recently, as a synonym for untruth and brazen manipulation. Propaganda analysis of the 1950s to 1989 too often took the form of empirical studies about the efficacy of specific methods, with larger questions about the purposes and patterns of mass persuasion remaining unanswered. In the present moment where globalization and transnationality are arguably as important as older nation forms, when media enjoy near ubiquity throughout the globe, when various fundamentalisms are ascendant, and when debates rage about neoliberalism, it is urgent that we have an up-to-date resource that considers propaganda as a force of culture writ large. The handbook will include twenty-two essays by leading scholars from a variety of disciplines, divided into three sections. In addition to dealing with the thorny question of definition, the handbook will take up an expansive set of assumptions and a full range of approaches that move propaganda beyond political

This collection of fresh essays on Suzanne Collins's epic trilogy spans multiple disciplines. The contributors probe the trilogy's meaning using theories grounded in historicism, feminism, humanism, queer theory, as well as cultural, political, and media studies. The essayists demonstrate diverse perspectives regarding Collins's novels but their works have three elements in common: an appreciation of the trilogy as literature, a belief in its permanent value, and a need to share both appreciation and belief with fellow readers. The 21 essays that follow the context-setting introduction are grouped into four parts: Part I "History, Politics, Economics, and Culture," Part II "Ethics, Aesthetics, and Identity," Part III "Resistance, Surveillance, and Simulacra," and Part IV "Thematic Parallels and Literary Traditions." A core bibliography of dystopian and postapocalyptic works is included, with emphasis on the young adult category--itself an increasingly crucial part of postmodern culture.

Sixteen-year-old Max and 10-year-old Tessa were fully prepared for another horrible summer vacation. While they always hoped to go somewhere fun like Disney World or Universal Studios, they usually went somewhere weird and cheap that their father, former boy bander Don Masters, found in an ad in a truck stop coupon magazine. But this year was different. Where they went couldn't be found on any map or in any truck stop coupon book. They passed through a portal to a place called Turtle Island, an alternate version of America that diverged from our history before the pilgrims landed at Plymouth Rock. It was there where

they met world famous action movie star Jordie Paine -- star of such films as I Plan to Kill You Now and the sequel, I Plan to Kill You Now, Too, the ninja film, Chuck Butcher: Sword Wielding Jackal, as well as the light-hearted romp, Harry Hinklehoffer and the Giant Dancing Toad of East Nebraska -- who would be their guide in this strange new world. Jordie, they later learned, brought the Masters family to Turtle Island for a very specific reason. Because they look just like the ruthless first family of Turtle Island, the Masters are pawns in a coup to overthrow the dictator. But things don't go as planned and the Masters wind up in the Survival Games, Turtle Island's national pastime/system of justice where criminals competitors, or crimpetitors, compete for their freedom. In this scifi comedy, the stakes are very simple -- if they win, they rule, if they lose, they must suffer the consequences.

In a future North America, where the rulers of Panem maintain control through an annual televised survival competition pitting young people from each of the twelve districts against one another, sixteen-year-old Katniss's skills are put to the test when she voluntarily takes her younger sister's place.

Graduate School of Arts and Social Sciences at Lesley University, Dr. Bey's work now gives instructors a manual that introduces a plethora of comparative cultural material and evidence into the classroom-and into our thinking. Through well researched examples, her book carefully insists that both instructor and student begin to think of humanity outside of their own parochial setting. Through lessons on food, clothing and ritual, this manual purposefully underscores a deep appreciation of world-wide culture. In this era of globalization, it becomes particularly important that we manage to identify distinctions, still, in ethnic form and culture-so that no modern effort toward homogeneity obscures those particular ways and means that varieties of cultures have solved similar problems. This manual gently helps the user to create an understanding that the diverse range of human genius is the greatest contribution to civilization, world-wide. In this manual Bey celebrates that genius...of humanity to demonstrate how similar problems can be solved in acutely distinct ways while maintaining similarities of import across of the range of possibility. To this end Dr. Bey's work and her insistence on cultural inclusion demand both our respect and applause."
