The first part of the book tells the story of how the Consumer Products Division of John Deere came to be and how it was accomplished. Then the book discusses from start to finish the development of John Deere snowmobiles, including key products along the way and the people and processes that were part of the adventure. This includes racing and the significant role it played. Then the book discusses the decade from 1976 to 1986 when Deere introduced multitudes of new products for Lawn & Ground care and snowmobiles and the Horicon factory made significant contributions to Deere profits. The last section discusses how the snowmobile changed product engineering. Interspersed throughout the book are Fortune 500 rankings for Deere and comments on the financial effects that Horicon had upon Deere. An illustrated history of the garden tractors that make small farms and vast gardens grow--the Cub Cadets, John Deeres, Simplicitys, Fords, Ariens, Wheel Horses, Kabotas, etc.

In the 1960s and 1970s, John Deere's tractors evolved dramatically from small machines into large, powerful tractors with modern advances and muscular engines; it was a period of the greatest changes since the 1920s. Deere christened these tractors the New Generation. This book in the Tractor Legacy series examines these Big Green machines in detail, with archival and current photography of restored tractors, a thorough historical text, and details of model specifications and variations.

Long respected as a manufacturer of sturdy agricultural machinery, the John Deere Company began in the 1960s to build a line of consumer products in a dedicated factory in Horicon, Wisconsin. Starting with a lawn and garden tractor in 1963, Deere soon entered the fast-growing snowmobile market, introducing two models in 1971. The next 13 years would see a succession of models as Deere vied against tough competitors in a weather-dependent market. This detailed history, written by two key participants in the snowmobile program, describes the development of John Deere snowmobiles from start to finish: the design and engineering decisions that shaped each important model; reception of the snowmobiles by consumers; the factory race teams; the introduction of front-engine and water-cooled models; the process of selecting engines and negotiating with suppliers, including when problems developed; and the snowmobiles' impact on product engineering. The text provides an inside view of Deere's Consumer Products Division at a time of rapid growth, and of the people and processes that made it all happen.

What begins as a look back at a different time in history quickly takes a dark turn in Bob Currie's latest collection. Embodying a variety of characters, often in different voices – both those of well-known classic poets as well as the voices of Saskatchewan poets past and present – Currie ponders the collective human experience. With razor-sharp precision and telltale imagery, these poems explore domestic and public life: bad marriages, infidelity, poverty, gun violence, and in a final section, death – and how these experiences change (or don't) between one generation and the next. Currie expertly combines seemingly innocuous poems – catching fish, discovering false breasts in a dresser – with more sinister and somber poems – murder, hiding from a gunman outside of a grocery store, bearing witness to the death of loved ones – with poignant candor.
