

## Journalism Abma Past Exam Papers 2013

From Dr. Amy Blackstone, childfree woman, co-creator of the blog we're {not} having a baby, and nationally recognized expert on the childfree choice, comes a definitive investigation into the history and current growing movement of adults choosing to forgo parenthood: what it means for our society, economy, environment, perceived gender roles, and legacies, and how understanding and supporting all types of families can lead to positive outcomes for parents, non-parents, and children alike. As a childfree woman, Dr. Amy Blackstone is no stranger to a wide range of negative responses when she informs people she doesn't have--nor does she want--kids: confused looks, patronizing quips, thinly veiled pity, even outright scorn and condemnation. But she is not alone in opting out when it comes to children. More people than ever are choosing to forgo parenthood, and openly discussing a choice that's still often perceived as taboo. Yet this choice, and its effects personally and culturally, are still often misunderstood. Amy Blackstone, a professor of sociology, has been studying the childfree choice since 2008, a choice she and her husband had already confidently and happily made. Using her own and others' research as well as her personal experience, Blackstone delves into the childfree movement from its conception to today, exploring gender, race, sexual orientation, politics, environmentalism, and feminism, as she strips away the misconceptions surrounding non-parents and reveals the still radical notion that support of the childfree can lead to better lives and societies for all.

With contributions from leading authorities in the field, this one-of-a-kind text explores the major health challenges and conditions specifically affecting women. *Epidemiology of Women's Health* covers chronic, infectious, autoimmune and psychological conditions as well as the health disparities and differences in health behaviors to give the reader a comprehensive understanding of the major female-specific needs that may be useful in developing effective public health programs. The text concludes with a review of the ethical aspects of gender-specific research studies. Divided into 10 sections, the book covers the following topic areas: Introduction to Epidemiology of Women's Health; Personal and Community-Based Health Promotion and Morbidity Prevention; Sexual Health Across the Life Span; Sexually Transmitted Infections; Chronic Psychological and Psychosocial Conditions; Endocrine & Autoimmune Conditions; Malignancies; Chronic Conditions; Aging; and Impact of Research: Lessons from the Past, Challenges of the Future.

Health and Biomedical Informatics is a rapidly evolving multidisciplinary field; one in which new developments may prove crucial in meeting the challenge of providing cost-effective, patient-centered healthcare worldwide. This book presents the proceedings of MEDINFO 2015, held in São Paulo, Brazil, in August 2015. The theme of this conference is 'eHealth-enabled Health', and the broad spectrum of topics covered ranges from emerging methodologies to successful implementations of innovative applications, integration and evaluation of eHealth systems and solutions. Included here are 178 full papers and 248 poster abstracts, selected after a rigorous review process from nearly 800 submissions by 2,500 authors from 59 countries. The conference brings together researchers, clinicians, technologists and managers from all over the world to share their experiences on the use of information

methods, systems and technologies to promote patient-centered care, improving patient safety, enhancing care outcomes, facilitating translational research and enabling precision medicine, as well as advancing education and skills in Health and Biomedical Informatics. This comprehensive overview of Health and Biomedical Informatics will be of interest to all those involved in designing, commissioning and providing healthcare, wherever they may be.

This volume is designed to motivate and engage scientists, policymakers, and practitioners to greater scientific discourse, reduce the stigma on and validate the importance of women's sexual and reproductive health. It brings together historians, anthropologists, psychologists, sociologists, epidemiologists, public health researchers, genetic counselors, attorneys, social workers, nurses and physicians, and presents comprehensive coverage that will benefit women's health advocates, students, and practitioners.

The ACP Handbook of Women's Health distills the expertise of ACP Press' acclaimed Women's Health Series and the latest evidence into a compact single volume that offers physicians the essential information they need to optimize the health of their female patients from adolescence through adulthood. Ideal for busy clinicians at the point of care, this concise resource provides clinically relevant information and essential management guidance on all major diseases and disorders, including: Heart disease Diabetes Cancer Musculoskeletal conditions Reproductive health Behavior and mood disorders Su

Does democracy control business, or does business control democracy? This study of how companies are bought and sold in four countries - France, Germany, Japan and the Netherlands - explores this fundamental question. It does so by examining variation in the rules of corporate control - specifically, whether hostile takeovers are allowed. Takeovers have high political stakes: they result in corporate reorganizations, layoffs and the unraveling of compromises between workers and managers. But the public rarely pays attention to issues of corporate control. As a result, political parties and legislatures are largely absent from this domain. Instead, organized managers get to make the rules, quietly drawing on their superior lobbying capacity and the deference of legislators. These tools, not campaign donations, are the true founts of managerial political influence.

Absorption-Based Post-Combustion Capture of Carbon Dioxide provides a comprehensive and authoritative review of the use of absorbents for post-combustion capture of carbon dioxide. As fossil fuel-based power generation technologies are likely to remain key in the future, at least in the short- and medium-term, carbon capture and storage will be a critical greenhouse gas reduction technique. Post-combustion capture involves the removal of carbon dioxide from flue gases after fuel combustion, meaning that carbon dioxide can then be compressed and cooled to form a safely transportable liquid that can be stored underground. Provides researchers in academia and industry with an authoritative overview of the amine-based methods for carbon dioxide capture from flue gases and related processes Editors and contributors are well known experts in the field Presents the first book on this specific topic

Whether childless by choice, by chance, or by happenstance, women without children today are alternately pitied and scorned, and are rarely asked directly about the reasons for, and their comfort with, childlessness. Asking the right questions, Madelyn Cain

thoughtfully uncovers the reasons for childlessness – from biological, to economic, and even political – and explores the ramifications for both the individual and society. Simultaneously compassionate and journalistically curious, *The Childless Revolution* is informed by the stories of over 100 childless or self-proclaimed childfree women, at long last giving voice to their experience and validating the jumble of emotions most feel about being part of this misunderstood population. The first book to put a face on these women who cannot conceive – or, for reasons as varied as womanhood itself, have chosen not to – *The Childless Revolution* dispels fears, removes ignorance, and corrects misconceptions about the ever-growing group of women without children in our midst.

This collection explores the sexual content of U.S. mass media and its influence in the lives of adolescents. Contributors address the topic of sexuality broadly, including evidence not only about physical sex acts, but also about the role the media play in the development of gender roles, standards of beauty, courtship, and relationship norms. Chapters included here present new perspectives on what teens are paying attention to in the media, and offer insight into how teens are understanding and applying what the media present about sex and sexuality. Employing various methodological approaches, the studies also represent a diversity of adolescent audiences and deal with a wide variety of media content, ranging from teens' favorite TV programs to magazines, movies, music, and teen girls' Web pages. Taken as a whole, this volume highlights the significant roles the media play in adolescents' sexual lives. *Sexual Teens, Sexual Media* contributes important evidence to the ongoing debate over media effects, making it essential reading for scholars and students in media studies, as well as social and developmental psychology. Historians have established a norm whereby President Eisenhower's actions in relation to the dawn of the space age are judged solely as a response to the Soviet launch of the Sputnik satellite, and are indicative of a passive, negative presidency. His low-key actions are seen merely as a prelude to the US triumph in space which is largely bookended first by President Kennedy's man-to-the-moon pledge in 1961, and finally by Neil Armstrong's moon landing eight years later. This book presents an alternative view of the development of space policy during Eisenhower's administration, assessing the hypothesis that his space policy was not a reaction to the heavily-propagandized Soviet satellite launches, or even the effect they caused in the US political and military elites, but the continuation of a strategic journey. This study engages with three distinct but converging strands of literature and proposes a revised interpretation of Eisenhower's actions in relation to rockets, missiles and satellites: namely that Eisenhower was operating on a parallel path to the established norm that started with the Bikini Atoll Castle H-bomb tests; developed through the CIA's reconnaissance efforts and was distilled in the Aeronautics and Space Act of 1958 which set a policy for US involvement in outer space that matched Eisenhower's desire for a balanced budget and fundamental belief in maintaining peace. President Eisenhower was not interested in joining a "space race": while national security underpinned his thinking, his space policy actions were strategic steps that actively sidestepped internecine armed forces rivalry, and provided a logical next step for both civilian and military space programs at the completion of the International Geophysical Year. In reassessing the United States' first space policy, the book adds to the revisionism under way in relation to the Eisenhower presidency, focusing on the "Helping Hands" that

enabled him to wage peace.

This is the first book to provide a comprehensive, multidisciplinary overview of evidence-based relationship and marriage education (RME) programs. Readers are introduced to the best practices for designing, implementing, and evaluating effective RME programs to better prepare them to teach clients how to have healthy intimate relationships. Noted contributors from various disciplines examine current programs and best practices, often by the original developers themselves. Readers learn to critically appraise approaches and design and implement effective, evidence-based programs in the future. Examples and discussion questions encourage readers to examine issues and apply what they have learned. The conceptual material in Parts I & II provides critical guidance for practitioners who wish to develop, implement, and evaluate RME programs in various settings. Chapters in Parts III & IV follow a consistent structure so readers can more easily compare programs-- program overview and history, theoretical foundations, needs assessment and target audience, program goals & objectives, curriculum issues, cultural implications, evidence based research and evaluation, and additional resources. This book reflects what the editor has learned from teaching relationship development and family life education courses over the past decade and includes the key information that students need to become competent professionals. Highlights of the book's coverage include: Comprehensive summary of effective evidence-based RME training programs in one volume. Prepares readers for professional practice as a Certified Family Life Educator (CFLE) by highlighting the fundamentals of developing RME programs. Describes the challenges associated with RME program evaluation. The book opens with a historical overview of RME development. It is followed by 20 chapters divided in six parts. The initial four chapters focus on fundamentals of relationship and marriage education --program development, required training, delivery systems, and implementation. The three chapters in Part II consider important conceptual and theoretical frameworks used in RME. Part III considers best practices in inventory based programs while Part IV examines six skills-based programs. The chapters in Parts III and IV consider program overview and history, theoretical foundations, needs assessment and target audience, program goals and objectives, curriculum issues, cultural implications, evidence-based research & evaluation, and additional resources. This content covers four categories of effective programs -- design and content, relevance, delivery and implementation, and assessment and quality assurance. Part V presents evidence-based RME with diverse groups and Part VI reviews future directions. Intended for use in advanced undergraduate or graduate courses in relationship and marriage education, family life education, marriage and relationship counseling/therapy, intimate relationships, relationship development, or home/school/community services taught in human development and family studies, psychology, social work, sociology, religion, and more, this ground-breaking book also serves as a resource for practitioners, therapists, counselors, clergy members, and policy makers interested in evidence based RME programs and those seeking to become Certified Family Life Educators or preparing for a career in RME.

Sex and sexuality are undoubtedly on your mind. So don't you want a human sexuality text that's hip, that reflects your life situation, and that answers the questions you're eager to learn about but hesitant to ask? Filled with the information that students

like you want and need to learn, the fifth edition of this with it text hits the mark as it addresses concerns that students have about themselves and their sexuality with scientific fact, sensitivity, unmatched candor, and humor. Beyond simply providing a foundation in the biology and psychology of sexuality, *SEXUALITY NOW: EMBRACING DIVERSITY* connects with you and other students by exploring contemporary issues, changing sexual practices and behaviors, and their impact. Complemented by informative illustrations and photographs, the book covers the range of sexual orientations, preferences, and behaviors and takes into account the diverse social, religious, ethnic, racial, and cultural contexts of today's students. The result is that you'll find lots of material to relate to as well as eye-opening discussions about sexuality today on college campuses, within the United States, and around the world. This book contains selected papers from the 7th International Conference on Information Science and Applications (ICISA 2016) and provides a snapshot of the latest issues encountered in technical convergence and convergences of security technology. It explores how information science is core to most current research, industrial and commercial activities and consists of contributions covering topics including Ubiquitous Computing, Networks and Information Systems, Multimedia and Visualization, Middleware and Operating Systems, Security and Privacy, Data Mining and Artificial Intelligence, Software Engineering, and Web Technology. The contributions describe the most recent developments in information technology and ideas, applications and problems related to technology convergence, illustrated through case studies, and reviews converging existing security techniques. Through this volume, readers will gain an understanding of the current state-of-the-art information strategies and technologies of convergence security. The intended readers are researchers in academia, industry and other research institutes focusing on information science and technology.

The Routledge Companion to Digital Journalism Studies offers an unprecedented collection of essays addressing the key issues and debates shaping the field of Digital Journalism Studies today. Across the last decade, journalism has undergone many changes, which have driven scholars to reassess its most fundamental questions, and in the face of digital change, to ask again: 'Who is a journalist?' and 'What is journalism?'. This companion explores a developing scholarly agenda committed to understanding digital journalism and brings together the work of key scholars seeking to address key theoretical concerns and solve unique methodological riddles. Compiled of 58 original essays from distinguished academics across the globe, this Companion draws together the work of those making sense of this fundamental reconceptualization of journalism, and assesses its impacts on journalism's products, its practices, resources, and its relationship with audiences. It also outlines the challenge presented by studying digital journalism and, more importantly, offers a first set of answers. This collection is the very first of its kind to attempt to distinguish this emerging field as a unique area of academic inquiry. Through identifying its core questions and presenting its fundamental debates, this Companion sets the agenda for years to come in defining this new field of study as Digital Journalism Studies, making it an essential point of reference for students and scholars of journalism.

Understanding how creative interventions can help develop social connectivity and resilience for older people is vital in developing a holistic cross-sector approach towards ageing well. Academics with a wide range of expertise critically reflect on how the built environment, community living, cultural participation, lifelong learning, and artist-led interventions encourage older people to thrive and overcome both challenging life events and the everyday changes associated with ageing. The book uses a range of approaches, including participatory

research methods, to bring the voices of older people themselves to the foreground. It looks at how taking part in creative interventions develops different types of social relationships and fosters resilience.

Based on the results of a third survey, the engineering and programming characteristics of 222 different electronic digital computing systems are given. The data are presented from the point of view of application, numerical and arithmetic characteristics, input, output and storage systems, construction and checking features, power, space, weight, and site preparation and personnel requirements, production records, cost and rental rates, sale and lease policy, reliability, operating experience, and time availability, engineering modifications and improvements and other related topics. An analysis of the survey data, fifteen comparative tables, a discussion of trends, a revised bibliography, and a complete glossary of computer engineering and programming terminology are included.

The 1960 Cryogenic Engineering Conference Committee is pleased to present the papers of the 1960 Cryogenic Engineering Conference. Discussion of the papers, wherever available, has also been included to make the papers more valuable and interesting to the reader. This annual meeting once again has been held in Boulder, Colorado. Many delegates will recall that similar meetings were held in Boulder in 1954, 1956 and 1957. However, this year, because of the continued growth of this conference, the National Bureau of Standards Boulder Laboratories was joined by the College of Engineering of the University of Colorado in hosting this sixth national conference. The Cryogenic Engineering Conference Committee is happy to acknowledge the help of an Editorial Committee which contributed valuable assistance in the difficult and thankless task of screening the preliminary papers and also reviewing the final drafts. This committee headed by R. B. Jacobs, who also served as chairman for the Conference Committee, consisted of R. W. Arnett, D. B. Chelton, R. J. Corruccini, T. M. Flynn, R. H. Kropschot, R. M. McClintock, A. F. Schmidt, L. E. Scott and W. A. Wilson.

The volume is divided into four parts. Part One provides up-to-date trends on children and adolescents' access to media in the home, as well as the time they spend with television, computers, and the Internet. Part Two presents research that highlights the potentially negative impact of age-inappropriate or excess media use on children's physical, cognitive, social, and emotional well-being. Part Three offers examples of how media enhance children's education, health, and social connections. Part Four explores implications for the creation of high-quality, enriching content that speaks to the needs and interests of young people today.

This edited volume with selected expanded papers from CELDA (Cognition and Exploratory Learning in the Digital Age) 2009 (<http://www.celda-conf.org/>) addresses the main issues concerned with problem solving, evolving learning processes, innovative pedagogies, and technology-based educational applications in the digital age. There have been advances in both cognitive psychology and computing that have affected the educational arena. The convergence of these two disciplines is increasing at a fast pace and affecting academia and professional practice in many ways. Paradigms such as just-in-time learning, constructivism, student-centered learning and collaborative approaches have emerged and are being supported by technological advancements such as simulations, virtual reality and multi-agents systems. These developments have created both opportunities and areas of serious concerns. This volume aims to cover both technological as well as pedagogical issues related to these developments.

Canada is often held up as an example of a healthy democracy. However, the Canadian public is less enthusiastic about the way our democracy works. This first-of-a-kind book approaches the "democratic deficit" from the perspective of everyday Canadians and assesses the performance of Parliament and the media in light of their perceptions and expectations. In doing so, a number of chapters highlight the disjuncture between perceptions and performance. Canadian Democracy from the Ground Up is essential for anyone who would like to learn

how to build a better democracy – one that meets the expectations of the Canadian public.

Written at the clerkship level, this book is a comprehensive introduction to family medicine. It is organized into three sections—principles of family medicine, preventive care, and common problems—and includes chapters on evidence-based medicine and complementary therapies. The text has a user-friendly writing style, focuses on common clinical problems, and uses case studies to show practical applications of key concepts. This edition features an updated art program, more illustrations, summaries, consistent headings, greater emphasis on evidence-based care, and more diverse family physician profiles representing varied practice settings. A companion Website offers the fully searchable text, 75 study questions, and an ExamKit of more than 300 questions with which faculty can generate tests.

Children, Adolescents, and the Media, Third Edition provides a comprehensive, research-oriented overview of how the media impact the lives of children and adolescents in modern society. The approach is grounded in a developmental perspective, focusing on how young people of different ages and levels of cognitive, emotional, and social development interact with the media. Incorporating the most up-to-date research available, Authors Victor C. Strasburger, Barbara J. Wilson, and Amy B. Jordan target areas most controversial and at the heart of debates about the media and public health—equipping students to approach the media as critical consumers.

Young adulthood - ages approximately 18 to 26 - is a critical period of development with long-lasting implications for a person's economic security, health and well-being. Young adults are key contributors to the nation's workforce and military services and, since many are parents, to the healthy development of the next generation. Although 'millennials' have received attention in the popular media in recent years, young adults are too rarely treated as a distinct population in policy, programs, and research. Instead, they are often grouped with adolescents or, more often, with all adults. Currently, the nation is experiencing economic restructuring, widening inequality, a rapidly rising ratio of older adults, and an increasingly diverse population. The possible transformative effects of these features make focus on young adults especially important. A systematic approach to understanding and responding to the unique circumstances and needs of today's young adults can help to pave the way to a more productive and equitable tomorrow for young adults in particular and our society at large. Investing in The Health and Well-Being of Young Adults describes what is meant by the term young adulthood, who young adults are, what they are doing, and what they need. This study recommends actions that nonprofit programs and federal, state, and local agencies can take to help young adults make a successful transition from adolescence to adulthood. According to this report, young adults should be considered as a separate group from adolescents and older adults. Investing in The Health and Well-Being of Young Adults makes the case that increased efforts to improve high school and college graduate rates and education and workforce development systems that are more closely tied to high-demand economic sectors will help this age group achieve greater opportunity and success. The report also discusses the health status of young adults and makes recommendations to develop evidence-based practices for young adults for medical and behavioral health, including preventions. What happens during the young adult years has profound implications for the rest of the life course, and the stability and progress of society at large depends on how any cohort of young adults fares as a whole. Investing in The Health and Well-Being of Young Adults will provide a roadmap to improving outcomes for this age group as they transition from adolescence to adulthood.

Given the interdisciplinary nature of digital journalism studies and the increasingly blurred boundaries of journalism, there is a need within the field of journalism studies to widen the scope of theoretical perspectives and approaches. Theories of Journalism in a Digital Age discusses new avenues in theorising journalism, and reassesses established theories. Contributors to this volume describe fresh concepts such as de-differentiation, circulation, news networks, and spatiality to explain journalism in a digital age, and provide concepts which further theorise

technology as a fundamental part of journalism, such as actants and materiality. Several chapters discuss the latitude of user positions in the digitalised domain of journalism, exploring maximal–minimal participation, routines–interpretation–agency, and mobility–cross-mediality–participation. Finally, the book provides theoretical tools with which to understand, in different social and cultural contexts, the evolving practices of journalism, including innovation, dispersed gatekeeping, and mediatized interdependency. The chapters in this book were originally published in special issues of Digital Journalism and Journalism Practice.

Updated with the latest data and research, Cohen/Strong's **THE MARRIAGE & FAMILY EXPERIENCE: INTIMATE RELATIONSHIPS IN A CHANGING SOCIETY** offers a realistic look at modern relationships, helping you understand the underlying issues at work in marriages, families and other relationships. It explores adoptive parenting, childbearing patterns, gay and lesbian families, the transgender experience, virginity, gender roles, communication and conflict resolution, the influence of popular culture, working families and more. Thorough coverage reflects the diversity of families and relationships, illustrating how racial, cultural, economic and sexual differences shape relationships and families. Real-life, cross-cultural examples and self-assessment features encourage you to reflect on your own life and behaviors. The book's straightforward overview of key topics helps you maximize your course success.
