

Leveled Literacy Intervention In The Siop Model

Research has consistently concluded that reading is an essential skill related directly to personal lifetime success and that failure to close the reading gap can lead to dire consequences. This study addressed the limited research available on the use of Leveled Literacy Intervention (LLI) with middle school students that received special education services. The purpose of this quantitative study was to explore if 6th, 7th and 8th grade students receiving special education instruction using LLI as an intervention demonstrated a difference in acceleration of reading growth on the Benchmark Assessment or Minnesota Comprehensive Assessment compared to those that received a non-LLI special education reading intervention. This study used a non-random sample in conjunction with an intentional screening process to limit confounding variables within the sample of 30 in the LLI group and 22 in the non-LLI group. A causal comparative design was used to determine if a relationship existed between LLI and non-LLI through the use of the t-test. In the sample of 52 participants that received special education reading intervention those that received LLI demonstrated a significant difference in accelerated growth when compared to students that received a non-LLI intervention according to results on the Benchmark Assessment. Of the 30 students that received LLI instruction 57% experienced accelerated reading growth of four or more levels on the Benchmark Assessment as compared to 14% of students that received a non-LLI intervention.

Which is more dangerous, a gun or a swimming pool? What do schoolteachers and sumo wrestlers have in common? How much do parents really matter? These may not sound like typical questions for an economist to ask. But Steven D. Levitt is not a typical economist. He studies the riddles of everyday life--from cheating and crime to parenting and sports--and reaches conclusions that turn conventional wisdom on its head. Freakonomics is a groundbreaking collaboration between Levitt and Stephen J. Dubner, an award-winning author and journalist. They set out to explore the inner workings of a crack gang, the truth about real estate agents, the secrets of the Ku Klux Klan, and much more. Through forceful storytelling and wry insight, they show that economics is, at root, the study of incentives--how people get what they want or need, especially when other people want or need the same thing.

"Textured Teaching is a framework for teaching and learning about texts, centered in love and social justice. The term social justice refers to a redistribution of resources, opportunities, wealth, and power that promotes equity. A teaching approach that strives for social justice, then, is one that openly addresses social injustices and functions in a way that leads students to reimagine

an equitable redistribution. Our framework is built upon the values that a Textured Teacher must hold. The strategies we use to bring those values to life are the traits of Textured Teaching. Therefore, a thoughtful and intentional implementation of Textured Teaching leads to social justice work"--

Now aligned to the Expanded Edition of The Fountas & Pinnell Literacy Continuum! Play and language are critical learning tools for the prekindergarten child. Through play and language, they learn about their world and about themselves. Play and language are also the most important tools for early literacy learning. Think of the young child who takes a memo pad and marker around to family members, "taking orders" for dinner. Like all emergent readers and writers, this child makes no distinction between play and literacy--both involve curiosity, excitement, learning, and discovery. In Literacy Beginnings, Irene C. Fountas and Gay Su Pinnell bring their characteristically rich, comprehensive, and practical insights to the frontier of early literacy. They show you how to tap into young children's curiosity to introduce them to the world of literacy in joyful, engaging ways.
