

Uomo Contro Uomo Mentalit E Strategie Per L Autodifesa Arti Marziali

Il saggio si occupa del delitto di iniuria, la cui individuazione risale all'età più antica della civitas romana e già disciplinato nelle XII Tavole: se ne analizzano gli sviluppi che dapprima videro l'abbandono della pena del taglione, inizialmente sostituita dalla pactio la composizione stragiudiziale e poi da una pena pecuniaria, determinata dal giudice, e, con il tempo, una modificazione nell'ambito di applicazione. In particolare, il pretore fece rientrare nel concetto di iniuria le offese morali, arrecate all'onore e al decoro della persona, che divennero progressivamente il principale contenuto di questo delitto, accogliendo quella che doveva essere, molto probabilmente, una elaborazione giurisprudenziale. L'estensione avvenne attraverso l'emanazione di specifici editti, oggetto principale dell'indagine, che contemplavano singolarmente diverse offese morali ed erano accomunati dal medesimo rimedio processuale. Si trattava degli editti: De convicio, De adtemptata pudicitia, Ne quid infamandi causa fiat, De iniuriis quae servis fiunt, De noxali iniuriarum actione, Si ei, qui in alterius potestate erit, iniuria facta esse dicetur, e De contrario iniuriarum iudicio.

Praise for the first edition: "...a brave and fascinating exploration of an area that has so far been rather neglected by both historical and literary critics. The Beast Within provides extremely valuable information on the legal and cultural background of the human-animal relationship..." -- Studies in the Age of Chaucer This important book offers a unique exploration of the use of and attitude towards animals from the 4th to the 14th centuries. The Beast Within explores the varying roles of animals as property, food and sexual objects, and the complex relationship that this created with the people and world around them. Joyce E. Salisbury takes an interdisciplinary approach to the subject, weaving a historical narrative that includes economic, legal, theological, literary and artistic sources. The book shows how by the end of the Middle Ages the lines between humans and animals had blurred completely, making us recognise the beast that lay within us all. This new edition has been brought right up to date with current scholarship, and includes a brand new chapter on animals on trial and animals as human companions, as well as expanded and updated discussions on fables and saints, and a new section on 'bestial humans'. This important and provocative book remains a key work on the historical study of animals, as well as in the field of environmental history more generally, and also provides crucial context to ongoing debates on animal rights and the environment.

<http://dx.doi.org/10.12946/gplh6><http://www.epubli.de/shop/buch/53894>"The spatiotemporal conjunction is a fundamental aspect of the juridical reflection on the historicity of law. Despite the fact that it seems to represent an issue directly connected with the question of where legal history is heading today, it still has not been the object of a focused inquiry. Against this background, the book's proposal consists in rethinking key confluences related to this problem in order to provide coordinates for a collective understanding and dialogue. The aim of this volume, however, is not to offer abstract methodological considerations, but rather to rely both on concrete studies, out of which a reflection on this conjunction emerges, as well as on the reconstruction of certain research lines featuring a spatiotemporal component. This analytical approach makes a contribution by providing some suggestions for the employment of space and time as coordinates for legal history. Indeed, contrary to those historiographical attitudes reflecting a monistic conception of space and time (as well as a Eurocentric approach), the book emphasises the need for a delocalized global perspective. In general terms, the essays collected in this book intend to take into account the multiplicity of the spatiotemporal confines, the flexibility of those instruments that serve to create chronologies and scenarios, as well as certain processes of adaptation of law to different times and into different spaces. The spatiotemporal dynamism enables historians not only to detect new perspectives and dimensions in foregone themes, but also to achieve new and compelling interpretations of legal history. As far as the relationship between space and law is concerned, the book analyses experiences in which space operates as a determining factor of law, e.g. in terms of a field of action for law. Moreover, it outlines the attempted scales of spatiality in order to develop legal historical research. With reference to the connection between time and law, the volume sketches the possibility of considering the factor of time, not just as a descriptive tool, but as an ascriptive moment (quasi an inner feature) of a legal problem, thus making it possible to appreciate the synchronic aspects of the 'juridical experience'. As a whole, the volume aims to present spatiotemporality as a challenge for legal history. Indeed, reassessing the value of the spatiotemporal coordinates for legal history implies thinking through both the thematic and methodological boundaries of the discipline."

From 1971 until his death in 1984, Foucault gave public lectures at the world-famous College de France. Attended by thousands, these were seminal events in the world of French letters. Picador is proud to be publishing the lectures in thirteen volumes. The lectures comprising Abnormal begin by examining the role of psychiatry in modern criminal justice, and its method of categorizing individuals who "resemble their crime before they commit it." Building on the themes of societal self-defense in "Society Must Be Defended," Foucault shows how and why defining "abnormality" and "normality" were prerogatives of power in the nineteenth century. The College de France lectures add immeasurably to our appreciation of Foucault's work and offer a unique window into his thinking.

In theory the CMPS was set up to enshrine the human and social studies that were at the heart of Enlightenment culture. Staum illustrates, however, that the Institute helped transform key ideas of the Enlightenment in order to maintain civil rights while upholding social stability, and that the social and political assumptions on which it was based affected notions of social science. He traces the careers of individual members and the factions within the Institute, arguing that the discord within the CMPS reflects the unravelling of Enlightenment culture. Minerva's Message presents a valuable overview of the intellectual life of the period and brings together new evidence about the social sciences in their nascent period.

1946. Contents Part One: Death of the Gods; What Drove the Middle Ages to Despair; The Little Demon of the Hearth and Home; Temptations; Diabolical Possession; The Pact with Satan; King of the Dead; Prince of Nature; Satan the Healer; Charms and Love Potions; Communion of Revolt-Witches' Sabbaths-The Black Mass; and Black Mass (continued)-Love and Death-Satan Disappears. Contents Part Two: The Sorceress in Her Decadence-Satan Multiplied and Vulgarised; Persecutions; A Hundred Years' Toleration in France; The Basque Witches, 1609; Satan Turns Ecclesiastic, 1610; Gauffridi, 1610; The Nuns of Loudun-Urbain Grandier, 1633, 1634; The Nuns of Louviers and Satanic Possession-Madeleine Bavent, 1640-1647; Satan Triumphant in the Seventeenth Century; Father Girard and Charlotte Cadiere; Charlotte Cadiere at the Convent of Ollioules; and Trial of Charlotte Cadiere, 1730, 1731.

Technological change is ridden with conflicts, bifurcations and unexpected developments. Neurocapitalism takes us on an extraordinarily original journey through the effects that cutting-edge technology has on cultural, anthropological, socio-economic and political dynamics. Today, neurocapitalism shapes the technological production of the commons, transforming them into tools for commercialization, automatic control, and crisis management. But all is not lost: in highlighting the growing role of General Intellect's autonomous and cooperative production through the development of the commons and alternative and antagonistic uses of new technologies, Giorgio Griziotti proposes new ideas for the organization of the multitudes of the new millennium.

The humble loaf serves as a prism through which to study how public market regulation affected private economic life.

Figura affascinante del mondo scientifico tedesco, Sombart è ormai da tutti pienamente riconosciuto come uno degli autori classici del pensiero sociologico. L'autore, in questo trattato, tenta di rispondere alla domanda "Che cos'è l'uomo?", analizzando gli elementi fondamentali di cui si compone la cultura umana: l'uomo stesso e la terra su cui egli vive, compiendo un'analisi trasversale, che attraversa varie discipline. Lo scopo finale è quello di gettare le basi per un nuovo concetto di "antropologia", intesa non come "ramo" di una disciplina scientifica, bensì come "scienza dello spirito".

Barbara Spackman here examines the ways in which decadent writers adopted the language of physiological illness and alteration as a figure for psychic otherness. By means of an ideological and rhetorical analysis of scientific as well as literary texts, she shows how the rhetoric of sickness provided the male decadent writer with an alibi for the occupation and appropriation of the female body.

Rule of law and constitutionalist ideals are understood by many, if not most, as necessary to create a just political order. Defying the traditional division between normative and positive theoretical approaches, this book explores how political reality on the one hand, and constitutional ideals on the other, mutually inform and influence each other. Seventeen chapters from leading international scholars cover a diverse range of topics and case studies to test the hypothesis that the best normative theories, including those regarding the role of constitutions, constitutionalism and the rule of law, conceive of the ideal and the real as mutually regulating.

This book, based on authoritative sources and reports, links environmental communication to different fields of competence: environment, sustainability, journalism, mass media, architecture, design, art, green and circular economy, public administration, big event management and legal language. The manual offers a new, scientifically based perspective, and adopts a theoretical-practical approach, providing readers with qualified best practices, case studies and 22 exclusive interviews with professionals. A fluent style of writing leads the readers through specific details, enriching their knowledge without being boring. As such it is an excellent preparatory and interdisciplinary academic tool intended for university students, scholars, professionals, and anyone who would like to know more on the matter.

Issu d'un projet de recherche international, cet ouvrage interroge la diversité de la vie culturelle, intellectuelle et scientifique à la cour des papes à Avignon en privilégiant trois approches : le contenu de la bibliothèque papale, la production des manuscrits et les débats théologiques qui se déroulèrent à Avignon au 14e siècle.
