Solomon, the legend goes, had a magic ring which enabled him to speak to the animals in their own language. Konrad Lorenz was gifted with a similar power of understanding the animal world. He was that rare beast, a brilliant scientist who could write (and indeed draw) beautifully. He did more than any other person to establish and popularize the study of how animals behave,

receiving a Nobel Prize for his work. King Solomon's Ring, the book which brought him worldwide recognition, is a delightful treasury of observations and insights into the lives of all sorts of creatures, from jackdaws and water-shrews to dogs, cats and even wolves. Charmingly illustrated by Lorenz himself, this book is a wonderfully written introduction to the world of our furred and feathered friends, a world which often provides an uncanny resemblance to our own. A must for any animal-lover!

A daybreaker rebels on an overpopulated planet in this dystopian adventure by the author of the World of Tiers series. Jeff Caird was once a daybreaker: a criminal who avoided government-required suspended animation by living seven different identities. Now he goes by the name William St.-George Duncan, and he's suppressed the memory of his past, and even his real identity, in order to avoid harsh punishment by the government of the Organic Commonwealth of Earth. But the danger is far from over, and the authorities continue to hunt him—because among the things he's forgotten there's something very important . . . In the

wilderness of northern New Jersey, Dunc has fallen in with a group of rebel daybreakers. As he struggles to retrieve the memory that's so valuable—and dangerous—to the government, he learns from his new allies that there's a larger movement to break free from the control of the corrupt World Council that limits citizens to one day of consciousness per week. And the knowledge buried deep within him may be the key to their success. Hugo award-winning Science Fiction Grand Master Philip José Farmer returns to the Dayworld universe for the second installment of his richly imagined trilogy, in which Earth's overpopulation has led to the most stringent government restrictions on personal freedom imaginable.

In this book, the author traces the philosophical origins of empathy and its development, with Freud and the first psychoanalysts, up to its "re-discovery" in the 1950s, in parallel with changing views on countertransference.

For twenty-five hundred years Buddhism has taught that everyone is Buddha—already enlightened, lacking nothing. But still there is the question of how we can experience that truth in our lives. In this book, Dainin Katagiri points to the manifestation of enlightenment right here, right now, in our everyday routine. Genuineness of practice lies in "just living" our lives wholeheartedly. The Zen practice of sitting meditation (zazen) is this not a means to an end but is the activity of enlightenment itself. That is why Katagiri Roshi says, "Don't expect enlightenment—just sit down!" Based on the author's talks to his American students, *Returning to Silence* contains the basic teachings of the Buddha, with special emphasis on the meaning of faith and on meditation. It also offers a commentary on "The Bodhisattva's Four Methods of Guidance" from Dogen Zenji's *Shobogenzo*, which speaks in depth about the appropriate actions of those who guide others in the

practice of the Buddha Way. Throughout these pages, Katagiri Roshi energetically brings to life the message that "Buddha is your daily life."

Let history drop behind as we explore the sacred confines of a temple city built by a race that was here long before us; before our species was even a glimmer in the Cosmic Eye, and whose work is still evident, usable, and heuristic. Dominated by a mountain, sculpted as a pregnant woman, with a lion at her feet and a rearing serpent behind, the site is still alive with eddies of spiritual energy. Between the colossal lady and lion is a saddle in the mountain beautified by mazes of stone, sparkling sand terraces, and the gardens of windswept splendor with the rock everywhere seeming to be incised with aesthetic, undecipherable hieroglyphics. The site is beautiful, bolstering, and enlivened; geometrically tuned to the cosmos, whose forces it appropriates to utilize in various ways. Join in as we uncover a few of the marvels of an authentically magical place with a psychedelic consciousness adapted to tuning into the ancient mysteries; giving a new dynamism to the on-going story of a truly sacred mountain.

M is the name of an enigma. In his short and violent life, Michaelangelo Merisi, from Caravaggio, changed art for ever. In the process he laid bare his own sexual longing and the brutal realities of his life with shocking frankness. Like no painter before him and few since, M the man appears in his art. As a book about art and life and how they connect, there has never been anything quite like it.

‘After the historic student revolt in France a period of audacious creativity resulted. The watchword was: “It is forbidden to forbid”. We took advantage of this transient cultural folly to do what would have been impossible ten years before or ten years after,

introducing in the maternity unit of a state hospital an inflatable outdoor pool as a way to replace drugs during birth.’ – from the Introduction In this groundbreaking book, Dr Odent takes as his starting point the world-famous work on childbirth at Pithiviers, where he first noticed the strong attraction to water that many women have during labour. As well as discovering the practical advantages of water during the birthing process, he began to consider the meaning and importance of water as a symbol. *Water, Birth and Sexuality* examines the living power of water and its erotic connotations. Odent evaluates what water meant in different cultures throughout history, through myths and legends, and what it means for us today: from an advertiser’s tool to a metaphor for aspects of the psyche. He also studies humanity’s special relationship to dolphins, and the related ‘aquatic ape’ theory. A practical section on the use of water during birth and in various therapies, particularly sex therapy, is included. This edition of this classic work features a new Introduction.

How do architects use color? Do they adopt a different strategy or starting point for every project? Do they gradually cultivate individual color palettes, which develop alongside their body of built work? Do they utilize, or are they aware of, the body of theoretical work that underpins the use of color in the past, and forms the basis of most of the color systems commercially available today? Informed by the author’s thirty years in architectural practice and academia, this book investigates, documents and analyzes the work of a number of contemporary architects in order to respond to these questions and provide a clear reference of contemporary color use. The book suggests a holistic approach to the integration of color in architecture; through a series of thematic essays, the text explores and reveals underlying principles in color design and application. Case studies include: AHMM Caruso St John Erich Wiesner and Otto Steidle Gigon/Guyer O’Donnell + Tuomey Sauerbruch Hutton Steven Holl UN Studio. The book provides clear insights into how particular contemporary architects use color confidently and intelligently as an integral part of their design philosophy, in conjunction with their choices of materials and finishes. Offering a stimulating view of the history of color theory, and pragmatic advice to practicing architects, this book will be inspiring to both design professionals and students.

Ingmar Bergman, an undisputed giant of modern cinematic art, here talks frankly and extensively about himself and his films. This discussion with the great Swedish director ranges from Bergman's childhood memories to his admiration for Strindberg to his

relationship with the stars whom he made famous - Liv Ullmann, Harriet Andersson, Max von Sydow and Bibi Andersson, among others. It is a historical phenomenon that while thousands of women were being burnt as witches in early modern Europe, the English - although there were a few celebrated trials and executions, one of which the play dramatises - were not widely infected by the witch-craze. The stage seems to have provided an outlet for anxieties about witchcraft, as well as an opportunity for public analysis. *The Witch of Edmonton* (1621) manifests this fundamentally reasonable attitude, with Dekker insisting on justice for the poor and oppressed, Ford providing psychological character studies, and Rowley the clowning. The village community of Edmonton feels threatened by two misfits, Old Mother Sawyer, who has turned to the devil to aid her against her unfeeling neighbours, and Frank, who refuses to marry the woman of his father's choice and ends up murdering her. This edition shows how the play generates sympathy for both and how contemporaries would have responded to its presentation of village life and witchcraft.

It's hard to break out of a rut. For years, Nathan submerged himself into his job at St. Genevieve's. He enjoys teaching, hates faculty meetings, loves his science and has committed himself to the cycle of college life. Along the way, he's become resigned to being a gay man in a straight culture, a Jew among Catholics, and single in a world of couples. Then the brilliant Isaac Wolf appears in his classroom. Isaac's a few years older than his fellow students, gorgeous, self-composed and Jewish. Isaac has his own secrets, which Nathan finds out at the racy new club downtown where the boys who dance out front can be bought in the

back room. Nathan thinks he's about to get a lap dance, but behind the beaded curtain the man on his knees turns out to be Isaac. Nathan's mind isn't the only thing Isaac blows. Afterward, Nathan can't stop thinking about that night. The question is whether Nathan can let himself fall in love with a student, much less someone with Isaac's checkered past. Is it too late for a student to teach his professor the true nature of love and respect? This is a revised, author's edition of the first Tarnished Souls story, originally published in 2012 by Loose Id.

Animal expressions: Franz Marc's search for a universal art Franz Marc (1880-1916) became known principally for his images of animals: blue horses, yellow tigers, red fawns. What was it that led him to concentrate on painting animals? Marc himself explained his choice of subject matter in these words: "From an early date I felt humankind to be 'ugly'; animals seemed to me possessed of a greater beauty and purity..." Seeing Marc merely as a painter of animals proves, however, premature. Marc, cofounder of the Blauer Reiter group of Expressionist artists, was deeply dissatisfied with the impurity of the world, and was on a quest for a universal art which would resolve the contrarities of life in the harmony of creation. Using pure colors highly charged with symbolic values, adopting crystalline shapes, and absorbing the influence of Cubism, he moved steadily towards an abstract order of image, coming closer to his own understanding of a better world. At the age of 36, Franz Marc's life was cut short when he died in the Battle of Verdun. About the Series: Each book in TASCHEN's Basic Art series features: a detailed chronological summary of the life and oeuvre of the artist, covering his or her cultural and historical importance a concise biography approximately 100 illustrations with explanatory captions
