

Mariner 125 Hp Outboard Repair Manual

Vols. for 1921-22, 1924- include an annual review number with title: Fishing gazette annual review and classified directory of marine and shore plant equipment (1921-60, Fishing gazette annual review number (varies slightly)). More and more sailors and powerboaters are buying and relying on electronic and electric devices aboard their boats, but few are aware of proper installation procedures or how to safely troubleshoot these devices if they go on the blink. The aim of this book, with its superb step by step photographs and detailed diagrams is to enable every owner to understand the workings of an outboard motor (2 or 4 stroke) and be able to fix it with relative ease. It includes: an explanation of the different parts that make up the engine and how they interact; how fuel is transformed into propulsion; regular maintenance and repair worksheets to help even the most mechanically ignorant to work on their outboard engine with confidence; the most common causes of breakdown; troubleshooting tables to allow you to diagnose and fix the most common engine problems and advice on how to winterize your outboard in one short afternoon. After reading this book, your outboard will no longer be a potential bother to you but an ally for better boating.

Provides a guide to the Mercury outboard motor, featuring step-by-step illustrated procedures, trouble-shooting, and wire diagrams.

This early work on goat keeping is both expensive and hard to find in its first edition. It contains details on the methods of selection, housing, breeding and other aspects of goat management. This is a fascinating work and is thoroughly recommended for anyone interested in the techniques of keeping livestock. Many of the earliest books, particularly those dating back to the 1900s and before, are now extremely scarce. We are republishing these classic works in affordable, high quality, modern editions, using the original text and artwork.
