Whereas the past few years have repeatedly been referred to as the “era of biotechnology”, most recently the impression has emerged that at least the same degree of attention is being paid to the latest developments in the field of neurosciences. It has now become nearly impossible to maintain an overview of the number of research projects dealing with the functionality of the brain – for example concerning its organizational structure – or projects dealing with the topics of legal responsibility, brain-computer interface applications, neuromarketing, lie detection or mind reading. These procedures are connected to a number of legal questions concerning the framework conditions of research projects as well as the right approach to the findings generated. Given the primary importance of the topic for the latest developments, it is essential to compare the different legal systems and strategies that they offer for dealing with these legal implications. Therefore, the book *International Neurolaw – A Comparative Analysis* contains several country reports from around the world, as well as those of international organizations such as UNESCO, in order to show the different legal approaches to the topic and possible interactions.

This book brings together ancient spiritual wisdom and modern science and philosophy to address age-old questions regarding our existence, free will and the nature of conscious awareness. Stuart Hameroff MD Professor, Anesthesiology and Psychology, and Director, Center for Consciousness Studies The University of Arizona, Tucson, Arizona This book presents a rich, broad-ranging overview of contemporary research and scholarship into consciousness and the self.... It is ... to their credit that the editors have assembled a highly stimulating set of scholars whose expertise cover all the relevant areas. I strongly recommend the book to anyone with an interest in understanding the directions in which contemporary thinking about the nature of consciousness is headed. B. Les Lancaster Emeritus Professor of Transpersonal Psychology Liverpool John Moores University, UK This volume is a collection of 23 essays that contribute to the emerging discipline of consciousness studies with particular focus on the concept of the self. The essays together argue that to understand consciousness is to understand the self that beholds consciousness. Two broad issues are addressed in the volume: the place of the self in the lives of humans and nonhuman primates; and the interrelations between the self and consciousness, which contribute to the understanding of cognitive functions, awareness, free will, nature of reality, and the complex experiential and behavioural attributes of consciousness. The book presents cutting-edge and original work from well-known authors and scholars of philosophy, psychiatry, behavioural sciences and physics. This is a pioneering attempt to present to the reader multiple ways of conceptualizing and thus understanding the relation between consciousness and self in a nuanced manner.

Faking it never felt so good in this red-hot new standalone by New York Times bestselling author K. Bromberg. Zane Phillips mistook me for his dog walker. It shouldn't surprise me that the man with a suit more expensive than my rent would assume that I was there to serve him. The positive? I put him in his place. The negative? I missed my job interview because of it. Now I find out he's a rich Australian entrepreneur, and he wants to make up for tanking my interview. Yes, he's impossibly hot – but he's also an arrogant jackass—so . . . no thanks. But after a little white lie I tell spirals out of control, I'm somehow offered the chance to play Zane's girlfriend to help promote his new dating website – and the best part? He can't say no because he'll get caught in his lie too. Little did I know this would entail sharing a tour bus with him for the next few months. The fact that the bus has just one bed isn't the most ideal of circumstances, but this spokesperson gig might be the kick in the pants my career needs, so why not take a chance? Famous last words. Now I'm crisscrossing the country—and sharing that bed—with the one guy I can't stand. And even worse, my traitorous body is wondering at every turn what it's like to be down under the gorgeous Australian. But as the miles unfurl, so does our passion...and if I'm not careful, I might end up believing that fairytales really do come true.
