The purpose of this longitudinal, non-experimental, causal comparative research study was to investigate whether a statistically significant difference existed between the college readiness indicator exam scores of students who participated in an International Baccalaureate Middle Years Programme (IBMYP) and those who did not. This quantitative study compared the archival data results of the AP Calculus AB, AP Calculus BC, AP English Language, AP English Literature, SAT Reading, SAT Writing, SAT Math, IB Mathematics HL, IB Mathematics SL, and IB English A1 exams of students in two large, urban comprehensive high schools. This study examined participation in an IBMYP middle school and high school exam scores three and four years later. The independent variable in this study was student participation in IBMYP in grades 6-8. There were mixed results in the findings of this study. Students who participated in the IBMYP middle school program achieved better than their non-IBMYP counterparts on the SAT Math, SAT Reading, SAT Writing, IB English A1, AP English Language, AP English Literature, and IB Math HL. Significant differences in scores between IBMYP participants and non-participants were found in all but three of the exams: IB Math SL, AP Calculus AB, and AP

Calculus BC.

Since 2013 I have been tutoring students full time for Cambridge 'A' level as well as International Baccalaureate SL and HL Mathematics. I learned over the years that the level of success of students in mathematics must do mainly with how they approach their study and their exam preparation strategies. I would like to share them with you in this book. This book is mainly for students with the desire to get a Grade A in mathematics.

Featuring a wealth of digital content, this concept-based Print and Enhanced Online Course Book Pack has been developed in cooperation with the IB to provide the most comprehensive support for the new DP Mathematics: applications and interpretation HL syllabus, for first teaching in September 2019. "Cambridge resources for the IB diploma"--p. [4] cover.

Featuring a wealth of digital content, this concept-based Print and Enhanced Online Course Book Pack has been developed in cooperation with the IB to provide the most comprehensive support for the new DP Mathematics: applications and interpretation SL syllabus, for first teaching in September 2019. This book takes a fresh look at programs for advanced studies for high school students in the United States, with a particular focus on the Advanced Placement and the International Baccalaureate programs, and asks how advanced studies can be

significantly improved in general. It also examines two of the core issues surrounding these programs: they can have a profound impact on other components of the education system and participation in the programs has become key to admission at selective institutions of higher education. By looking at what could enhance the quality of high school advanced study programs as well as what precedes and comes after these programs, this report provides teachers, parents, curriculum developers, administrators, college science and mathematics faculty, and the educational research community with a detailed assessment that can be used to guide change within advanced study programs.

The most comprehensive match to the new 2014 Chemistry syllabus, this completely revised edition gives you unrivalled support for the new concept-based approach, the Nature of science. The only DP Chemistry resource that includes support directly from the IB, focused exam practice, TOK links and real-life applications drive achievement. This book has been designed specifically to support the student through the IB Diploma Programme in Mathematical Studies. It includes worked examples and numerous opportunities for practice. In addition the book will provide students with features integrated with study and learning approaches, TOK and the IB learner profile. Examples and activities drawn from around the world will encourage students to develop an international perspective.

This completely new title is written to specifically cover the new IB Diploma

Mathematical Studies syllabus. The significance of mathematics for practical applications is a prominent theme throughout this coursebook, supported with Theory of Knowledge, internationalism and application links to encourage an appreciation of the broader contexts of mathematics. Mathematical modelling is also a key feature. GDC tips are integrated throughout, with a dedicated GDC chapter for those needing more support. Exam hints and IB exam-style questions are provided within each chapter; sample exam papers (online) can be tackled in exam-style conditions for further exam preparation. Guidance and support for the internal assessment is also available, providing advice on good practice when writing the project.

This text is written for the new courses (first examinations 2006), with the book covering the new 2-year diploma course. Contains worked examples, graded questions, with answers. The accompanying CD contains the full text of the book and activities.
