Written for use with the Cambridge Primary Mathematics Curriculum Framework, and endorsed by Cambridge International Examinations, the Cambridge Primary Mathematics series is informed by the most up-to-date teaching philosophies from around the world. It aims to support teachers to help all learners become confident and successful mathematicians through a fun and engaging scheme. Through an investigatory approach children learn the skills of problem solving in the context of other mathematical strands in the course. The course will encourage learners to be independent thinkers with the confidence to tackle a wide range of problems who understand the value and relevance of their mathematics. Classroom discussion is encouraged to help learners become good mathematical communicators, to justify answers and to make connections between ideas. This series is part of Cambridge Maths (www.cie.org.uk/cambridgeprimarymaths), a project between Cambridge University Press and Cambridge International Examinations and is appropriate for learners sitting the Primary Checkpoint test.

This unique title draws together in one volume some of the best thinking to date on the pressing social and environmental challenges we face as a society. These are the Top 50 Sustainability Books as voted for by the University of Cambridge Programme for Sustainability Leadership's alumni network of over 3,000 senior leaders from around the world. In addition to profiles of all 50 titles, many of the authors share their most recent reflections on the state of the world and the ongoing attempts by business, government and civil society to create a more sustainable future. Many of these authors have become household names in the environmental, social and economic justice movements – from Rachel Carson, Ralph Nader and E.F. Schumacher to Vandana Shiva, Muhammad Yunus and Al Gore. Others, such as Aldo Leopold, Thomas Berry and Manfred Max-Neef, are relatively undiscovered gems, whose work should be much more widely known. By featuring these and other seminal thinkers, The Top 50 Sustainability Books distills a remarkable collective intelligence – one that provides devastating evidence of the problems we face as a global society, yet also inspiring examples of innovative solutions; it explores our deepest fears and our highest hopes for the future. It is a must-read for anyone who wants to tap into the wisdom of our age.

This title covers the entire syllabus for Cambridge International Examinations' International AS and A Level Biology (9700). Many books have been written about the life of the Prophet Muhammad (SAW). In writing this book, the author had a specific objective. He used the life of the Prophet (SAW) to go onto depth about the Prophet (SAW) many historians only touched on the various aspects of his life. This book goes into detail and provides reasons and explanations for whatever took place. It is a blend of modern analysis and ancient detail. Its objective is to nurture faith, purify characters and fan the struggle to embrace the truth and be faithful to it.Indeed, the life of the Prophet (SAW) has been documented as a message for practical implementation, not intellectual entertainment'You may think that you have studied the life of Muhammad by following his history from birth to death but this is a grave mistake. You will never really understand the Sirah unless you study the noble Qur'an and the purified Sunnah. The amount that you derive from these will tell the strength of your connection with the prophet of Islam, sallallahu `alaihi wa sallam' From the EpilogueAn important work of the Egyptian scholar Sheikh Muhammad al-Ghazali. Drawing upon his profound classical Islamic learning and an extensive knowledge of modern science, Sheikh al-Ghazali has broken new ground in the study of Seerah, bringing to bear a fresh but wholly authentic approach. This is a work which all serious students should have, to complement the Seerah of the Prophet Muhammad (SAW)

The interest in understanding the relationship between Islam and consumption and marketing practices has been increasing in recent years. Although traditionally Islam enforces the idea of Halal for all the products in accordance to teachings of the Holy Quran, scholars have time and again debated the connection of this traditional Islamic branding to the modern branding and marketing theories. Modern branding and marketing techniques focus on creating a demand among the target population, which is then met by supplying adequately. Halal, Islam and Muslims will always cause brand academics and practitioners problems. The understanding of what is Halal and Islamic brands is very crucial and if Muslim consumers are not encourage and nurture, the Islamic brands will be may remain as cultural products and the status of being Halal is temporal. Islamic Branding and Marketing brings together up-to-date information on the impact of Islamic marketing and branding on consumer perception. This book investigates the promising, new subject matter of Islamic branding, which is yet to receive the academic and researchers attention it deserves. It provides a better understanding of Islamic branding, through conceptualizing the terms relevant to the brand-Islamization efforts of non-Muslim brands, by identifying the necessary 'branding to Muslims' practices. It differentiates between Islamic products and Islamic brands, identifies and explains the various types of Islamic branding and links them to the Islamization of originally non-Muslim brands, that is, international brands, and it discusses various halal-related issues that an Islamizing firm needs to adhere to in order to improve its chances of success in the Islamic market. This book is intended to explore the reasons underlying the recent interest on Islamic marketing, discusses past research on the topic and offers a future research perspective. This book will serve as an essential guide for upper-level students, researchers, academicians, professionals and practitioners, scientists, and executive managers as well as for those who study and those who participate in Muslim branding and marketing.

This book has been designed for the orientation and training of specialists in open and distance learning methods in Asia. It is the outcome of the collaborative PANdora research and development initiative (2005–08) between 24 open and distance learning (ODL) institutions, government departments and non-governmental organizations in 13 Asian countries. The guidelines in the book have been designed in modular form so that selected sections can be combined according to users' needs and translated into local languages in keeping with the PANdora network's open resources philosophy.

Assessment in Science combines professional development and classroom practice in a single volume. The pragmatic nature of the book makes it a valuable resource for administrators and staff developers interested in designing professional development programs, and for science teachers looking for techniques and examples of classroom-based assessments. Unique features of Assessment in Science include: 1) practical strategies and tools for implementing successful professional development programs in science assessment, 2) teacher stories and case studies about classroom-based assessment practice and how these teachers changed their assessment practice, 3) examples of classroom-based assessments and scoring guides, 4) samples of student work with teacher commentary, and 5) examples of how the national reform documents in science education served as tools in professional development programs and in designing classroom-based assessments. Assessment in Science expands the existing literature on science assessment by sharing a model for professional development, and examples of teacher-developed assessments with accompanying student work and teacher commentary. Chapters written by science teachers tell how they assess students and how they have changed their assessment practice, as well as how changing assessment practice has resulted in a change in their science instruction. Assessment in Science is targeted at practising professionals in science education: administrators, staff developers, science teachers, and university science educators. Assessment in Science has applicability to graduate-level courses in science education and in-service courses for science teachers. The teacher chapters are also appropriate for use in undergraduate science methods courses to illustrate classroom-based assessments.

A solid understanding of how banks operate is crucial to grasp the functioning of modern society. Banks are an intrinsic part of business, finance, and everyday life. Modern banking is regulated by a sophisticated set of laws and regulations that are constantly evolving. Banking Law and Practice from the Hong Kong Institute of Bankers outlines and explains these laws and regulations clearly and in detail. This regulatory framework has a deep impact on banks, bankers, and anyone that deals with them, which is the overwhelming majority of society. This high level of impact makes Banking Law and Practice an important book as well as a necessary and authoritative reference for industry professionals, students, and the public at large. Banking Law and Practice discusses a range of topics that have a direct bearing on the day-to-day operations of banks, from

contracts to how to ensure safe and secure lending. It examines the development and current state of banking legislation and regulation and facilitates bankers and their institutions to shape their practice to meet all the necessary legal and regulatory requirements. Students, industry professionals, and the public at large will welcome the thorough and clear explanations of the legal and regulatory framework in which banks operate. This book is essential reading for candidates studying for the HKIB Associateship Examination and anyone else seeking expert knowledge of the legal and regulatory structure affecting banks in Hong Kong. Topics covered in this book include: Contractual Relationships Code of Banking Practice Money Laundering Negotiable Instruments Law Related to Securities Bankruptcy and Insolvency

This book is result of five years teaching of Islamic finance course to MBA Finance students. This book is written with a clear focus on learning of Islamic banking & finance by accounting, banking, business and finance students/professionals. Resources available, so far, on the subject have focused on legal side and very negligible work is available on financial front for a common user. This book is written in financial perspective and author has focused upon financial impacts, generated by application of Islamic financial laws. However a summary of Islamic commercial laws of each chapter has been provided. Author has adopted balance sheet method to inculcate the knowledge; hence, understanding of elementary balance sheet is recommended to get maximum out of this book. This book is divided into five parts. Part-1 presents an update on Islamic finance. Part two is about asset backed financing provided by IFIs. It includes trading (selling) modes of financing including Murabaha, Salam and Istisna'a; it also includes Ijarah financing. At the start of part two, summary of Shari'a rulings about sales is reported. Part three of the book deals with profit and loss sharing modes of financing including Musharaka, diminishing Musharaka and Mudaraba. A special section is devoted to discuss the causes of lesser application of Musharaka in operations of IFIs, in addition to Shari'a rulings and financial impact. Chapter seven is about Diminishing Musharaka; a form of gradually declining partnership between an IFI and clients; generally used to finance real estates. Under diminishing Musharaka, I have discussed the basic Shari'a rulings, Islamic house financing, comparative study of conventional and Islamic mortgages and installment calculation under different assumptions for house financing. Chapter eight is about Mudaraba. Under this scheme of financing IFIs provide capital to financially weak but skilful people to do the business and share outcome with IFIs. Part four is about deposits management. Part five of the book presents special topics in Islamic Finance. In this part areas of liquidity management and Islamic insurance are discussed. Under Islamic capital market two dedicated chapters have been included; each for equities and Sukuk. Chapter 12 is dedicated for Islamic insurance. Last chapter has focused on challenges to Islamic finance industry. Third edition is definitely outcome of very encouraging response by academic community to earlier editions. In this edition due attention has been given to present material in reader friendly mode in addition to thorough review of content, exercises and figures. In this edition Islamic capital market is re-written by including separate chapters on equities and Sukuk. Also a special chapter is devoted to Islamic insurance. Updated figures on global volume of assets, regional shares, equity funds and Sukuk are also part of this edition. Also more examples included in the text to make the concept clear. In appendix guidance for establishment of Islamic bank and appointment of Shari'a advisor as provided by local central bank is included. Increased number of true/false, multiple choice questions and mini cases are also forming part of updated edition. This book is useful for MBA/BBA students as a three credit hour course as well as for banking/finance students and practitioners of Islamic banking & finance. It is also useful for accounting & finance professionals, trainers in Islamic banking, regulators, investors, corporate managers and general public, interested in understanding Islamic finance. I hope this book will serve its purpose through imparting knowledge of Islamic banking & finance among accounting, business and finance graduates as well as practitioners of Islamic financial system, investors and general public.

Today, black players compose more than eighty percent of the National Basketball Association's rosters, providing a strong and valued contribution to professional basketball. In the first half of the twentieth century, however, pro basketball was tainted by racism, as gifted African Americans were denied the opportunity to display their talents. Through in-depth interviews with players, their families, coaches, teammates, and league officials, Ron Thomas tells the largely untold story of what basketball was really like for the first black NBA players, including recent Hall of Fame inductee Earl Lloyd, early superstars such as Maurice Stokes and Bill Russell, and the league's first black coaches. They Cleared the Lane is both informative and entertaining, full of anecdotes and little-known history. Not all the stories have happy endings, but this unfortunate truth only emphasizes how much we have gained from the accomplishments of these pioneer athletes.

The international multi-topic conference IMTIC 2008 was held in Pakistan during April 11–12, 2008. It was a joint venture between Mehran University, Jamshoro, Sindh and Aalborg University, Esbjerg, Denmark. Apart from the two-day main event, two workshops were also held: the Workshop on Creating Social Semantic Web 2.0 Information Spaces and the Workshop on Wireless Sensor Networks. Two hundred participants registered for the main conference from 24 countries and 43 papers were presented; the two workshops had overwhelming support and over 400 delegates registered. IMTIC 2008 served as a platform for international scientists and the engineering community in general, and in particular for local scientists and the engineering community to share and cooperate in various fields of interest. The topics presented had a reasonable balance between theory and practice in multidisciplinary topics. The conference also had excellent topics covered by the keynote speeches keeping in view the local requirements, which served as a stimulus for students as well as experienced participants. The Program Committee and various other committees were experts in their areas and each paper went through a double-blind peer review process. The conference received 135 submissions of which only 46 papers were selected for presentation: an acceptance rate of 34%.

2 superpowers at odds - and Grant Markey is right in the middle! Action in 8 cities on 3 continents - in 1 different kind of suspense/thriller! Grant Markey, a gem and collectibles dealer in Natchez, Mississippi, has the psychic ability to probe the mind of any person on earth, and he doesn't even know it....at least not yet. But his Ole Miss fraternity brother,

now CIA Deputy Director Tony Russell, realizes his potential and wants Grant to covertly work for the CIA. Grant uncovers an imminent attack on the U.S. financial system by a powerful, rogue Chinese official. Chaos ensues - assassination attempts, shoot-outs, kidnappings, counter-attacks, killings, and suicides. The selection of China's next supreme leader depends on the outcome, and the Russians have their own interests at play. Natchez, Washington, D.C., New York, Paris, Bangkok, Chiang Mai, Beijing, and Baton Rouge - the plot moves between locations at the speed of travel and the speed of thought! Along the way, Grant discovers he has new and enhanced psychic powers but doesn't tell anyone. He realizes his special abilities place him in extreme danger - from any person or country with secrets to protect. And Grant struggles with the moral dilemma - when to use his immense power and when to not? And he wonders when, if ever, can he return to a normal life?

Digital Media Criticism is an introductory text about media criticism - the act of interpreting and making sense of a range of new media texts that we use (and create) on a daily basis - offering a critical language and a methodological template for interrogating and analyzing the complex texts of digital media. Individual chapters connect key methods of media criticism - genre, auteur, cultural/ideological, and ethnographic - with digital culture. Case studies of social media, user generated content, cell phones, and video games are provided, which include everything from downloading ring tones and making new (Facebook) friends, to creating an avatar, texting, and opening a window on RL (real-life). Insightful and accessible, the book looks at the possibilities and limits of the digital age for us - as creators, consumers, and distributors of content. It will be useful to undergraduates studying media criticism, digital culture and communication, and media literacy, and is written to invite them into a conversation about the culture of the digital age.

The production and distribution of reports on recent events is referred to as journalism. It includes the methods of gathering information and using literary techniques. It uses various means of media such as print, television, radio, and the Internet. Journalism went through various changes due to the Internet and smartphones. It has several forms such as broadcast journalism, citizen journalism, investigative journalism, interactive journalism and photo journalism. Broadcast journalism is the journalism that is written or spoken for radio or television. Investigative journalism includes the in-depth reporting that uncovers the social problems that often lead to major problems being resolved. Interactive form of journalism is an online form that is presented on the web. Photojournalism focuses on telling true stories through images. This book attempts to understand the multiple branches that fall under the discipline of journalism and how such concepts have practical applications. The various sub-fields of journalism along with technological progress that have future implications are glanced at in it. This book is an essential guide for both academicians and those who wish to pursue this discipline further.

This series builds on the fact that pictures are easier to memorize than words. Each topic is summarized on a single page using annotated diagrams and concise notes with a full index for easy reference. Expert authors have taken the content of the AS and A Level specifications and presented them in a refreshingly clear and concise format.

The scientific study of society is known as sociology. All spheres of human activity are continuously influenced by a complex interplay of individual agency and social structure. The study of society expands to the domains of health, economy, education, military and science. However, at its core, the field is focused on the study of culture, criminality and punishment, economy, family, gender and sexuality, health and illness, peace, war and conflict, etc. Sociological study and research is vital for educators, policy makers, legislators, non-profit organizations and non-governmental organizations, social workers and anyone with the inclination to resolve or address social issues. The central problems of sociological theory are concerned with the way to transcend, link or cope with the dichotomies of structure and agency, subjectivity and objectivity, and synchrony and diachrony. Modern sociological studies are advanced by the adoption of hermeneutic, philosophic and interpretive techniques as well as analytic, computational and mathematical approaches to the study of society and culture. This book is a valuable compilation of topics, ranging from the basic to the most complex advancements in the field of sociology. Different approaches, evaluations, methodologies and advanced studies have been included in this book. With state-of-the-art inputs by acclaimed experts of this field, this book targets students and professionals.
