Some assumptions about biology are so deeply rooted in our thinking that they seem beyond question. These concepts - expressed in playful jargon - are our sacred bovines. With a light-hearted spirit, Douglas Allchin sets out to challenge many of these common beliefs about science and life. Allchin draws on fascinating insights from science to illustrate the ironies in many widespread beliefs. Be prepared to challenge the notion that male and female are fixed natural categories. Or that evolution implies cutthroat competition in human society. Or that we struggle against a fundamental immoral nature. Or that genes establish our identity. Or that science progresses through rare leaps of genius. Or that politics and emotions inevitably taint good science. Sacred Bovines revels in revelations about the nature of science. Reflecting on the many errors in commonly accepted, everyday ideas also fosters creative thinking. How do we challenge assumptions? How do we "think outside the box"? The many

examples here provide inspiration and guidance, further elaborated in a retrospective epilogue. An additional "Afterword for Teachers" highlights how the essays can foster learning about the nature of science and describes some practical classroom strategies.

His most famous work is "The Power of your Unconscious Mind."

Two such birding enthusiasts are Vera and Bob Thornton, who have spent fifteen years photographing these special and exotic birds in the rainforests of eleven different countries of Central and South America. In this book, you'll find more than a hundred spectacular color photographs they took during their travels, along with a highly entertaining account of their adventures—and misadventures—in chasing these exotic neotropicals. The birds pictured here are among the Thorntons' personal favorites—birds that, in their words, "either dazzled us with their beauty, or charmed us by their behavior, or, in a few cases, simply challenged us by the mystique of their rarity." This latter category includes such elusive and sought-after birds as the Black-crowned Antpitta, the Zigzag Heron, the Rufous-vented Ground-Cuckoo, the Bare-necked Umbrellabird, and the monkey-eating Harpy Eagle. In the accompanying text, Bob Thornton engagingly describes the challenges as well as the magic of negotiating the neotropical rainforests in search of colorful birds to photograph. For those who would like to follow in the Thorntons' footsteps, there are also helpful tips about photographic gear and techniques, preferred places to see the birds, lodging, and guides. Why I suspect the rollout of Windows 11 will be relatively slow, and why it will take quite a long time before lots of people start using it. Apps experiencing troubles with Windows 11 and why Microsoft is unable to find a fix. 8 Windows 11 troubles Microsoft is currently investigating The Microsoft's policy and how it will affect Windows 11 users when Windows 10 support ends on October 14th, 2025.
