from both HR and IT streams in assimilating the intricacies of implementation of HRIS projects. HR is one of the most popular ERP product implementation topics in today's business world. Its implementation needs a practical discussion using examples from real world. The examples, the case study and discussions in the book follow an international approach rather than discussing only a single country HRIS implementations. A real-life case study that flows through various chapters of the book brings out challenges in the implementation of HR specific projects. In today's global economy, HR is changing fast and dives into areas such as strategy outsourcing, mergers and acquisitions (M & A). This book covers all these areas and other topics that are relevant to today's HR world, providing more value to the readers. It provides illustrations to assist readers in visualizing the topics discussed and in developing a sound understanding of the integration and data aspects of HRIS systems. This book will be useful as a text for a course in HRIS wherever prescribed for the MBA (HR) and MBA (IT) students. The book encourages self-directed study and thought process, based on references provided at the end of each chapter, and hence will also be useful to consultants, HR professionals, and IT professionals working with HR departments.

This textbook is completely updated and revised to provide the latest information on the Internet, e-commerce, software and database management systems as they apply to accountancy.

Simple is seldom easy to implement. However, as a recent Flow trainee puts it, “Flow ‘plays nice’ with everyone! And, it will enable you to successfully customize and implement whatever solution you choose.” Flow is the distillation of over fifty years of successful, hands-on experience that has delivered more than 100 million US dollars in value-add to companies in Europe, the United States, and Asia. Putting Flow into practice, one company increased profit \$550,000 in one year on \$2.5 million of revenue, and a large Asian telecom turned around a mission critical project from a projected 2-year schedule overrun and 300% budget increase to delivering seven months early and \$4 million under the original budget in a 90-day period. Ted and Andrew Kallman unify Traditional management and Agile methodologies enabling successful results, regardless of the existing leadership framework. Simple and easy to understand, Flow helps individuals, teams, and organizations create and sustain high performance.
