

Routledge Encyclopedia Of Translation Studies

This one-volume Encyclopedia covers both the conceptual framework and history of translation. Organised alphabetically for ease of access, a team of experts from around the world has been gathered together to provide unique, new insights.

As an interdisciplinary area of research, translation studies attracts students and scholars with a wide range of backgrounds, who then need to face the challenge of accounting for a complex object of enquiry that does not adapt itself well to traditional methods in other fields of investigation. This book addresses the needs of such scholars – whether they are students doing research at postgraduate level or more experienced researchers who want to familiarize themselves with methods outside their current field of expertise. The book promotes a discerning and critical approach to scholarly investigation by providing the reader not only with the know-how but also with insights into how new questions can be fruitfully explored through the coherent integration of different methods of research. Understanding core principles of reliability, validity and ethics is essential for any researcher no matter what methodology they adopt, and a whole chapter is therefore devoted to these issues. Research Methodologies in Translation Studies is divided into four different chapters, according to whether the research focuses on the translation product, the process of translation, the participants involved or the context in which translation takes place. An introductory chapter discusses issues of reliability, credibility, validity and ethics. The impact of our research depends not only on its quality but also on successful dissemination, and the final chapter therefore deals with what is also generally the final stage of the research process: producing a research report.

Written by the winners of the Intranews Linguists of the Year award for 2016! Discursive and non-discursive interventions in the political arena are heavily mediated by various acts of translation that enable protest movements to connect across the globe. Focusing on the Egyptian experience since 2011, this volume brings together a unique group of activists who are able to reflect on the complexities, challenges and limitations of one or more forms of translation and its impact on their ability to interact with a variety of domestic and global audiences. Drawing on a wide range of genres and modalities, from documentary film and subtitling to oral narratives, webcomics and street art, the 18 essays reveal the dynamics and complexities of translation in protest movements across the world. Each unique contribution demonstrates some aspect of the interdependence of these movements and their inevitable reliance on translation to create networks of solidarity. The volume is framed by a substantial introduction by Mona Baker and includes an interview with Egyptian activist and film-maker, Philip Rizk. With contributions by scholars and artists, professionals and activists directly involved in the Egyptian revolution and other movements, Translating Dissent will be of interest to students of translation, intercultural studies and sociology, as well as the reader interested in the study of social and political movements. Translation and Conflict was the first book to demonstrate that translators and interpreters participate in circulating as well as resisting the narratives that create the intellectual and moral environment for violent conflict and social tensions. Drawing on narrative theory and with numerous examples from historical and current contexts of conflict, Mona Baker provides an original

and coherent model of analysis that pays equal attention to the circulation of narratives in translation and to questions of dominance and resistance. With a new preface by Sue-Ann Harding, *Translation and Conflict* is more than ever the essential text for any student or researcher interested in the study of translation and social movements.

Published at a time of unprecedented growth of interest in translation, the *Dictionary of Translation Studies* aims to present the insights of a number of different approaches to translation in an unbiased, non-partisan way. Technology has revolutionized the field of translation, bringing drastic changes to the way translation is studied and done. To an average user, technology is simply about clicking buttons and storing data. What we need to do is to look beyond a system's interface to see what is at work and what should be done to make it work more efficiently. This book is both macroscopic and microscopic in approach: macroscopic as it adopts a holistic orientation when outlining the development of translation technology in the last forty years, organizing concepts in a coherent and logical way with a theoretical framework, and predicting what is to come in the years ahead; microscopic as it examines in detail the five stages of technology-oriented translation procedure and the strengths and weaknesses of the free and paid systems available to users. *The Future of Translation Technology* studies, among other issues: The Development of Translation Technology Major Concepts in Computer-aided Translation Functions in Computer-aided Translation Systems A Theoretical Framework for Computer-Aided Translation Studies *The Future of Translation Technology* This book is an essential read for scholars and researchers of translational studies and computational linguistics, and a guide to system users and professionals.

Professor Bassnett tackles the crucial problems of translation and offers a history of translation theory, beginning with the ancient Romans and encompassing key 20th-century structuralist work. The work includes the original text of *The Seafarer*.

Divided in four parts, this reference work consists of 32 state-of-the-art chapters from leading international scholars. The first part focuses on established and emerging audiovisual translation modalities, explores the changing contexts in which they have been and continue to be used, and examines how cultural and technological changes are directing their future trajectories. The second part delves into the interface between audiovisual translation and a range of theoretical models that have proved particularly productive in steering research in audiovisual translation studies. The third part surveys a selection of methodological approaches supporting traditional and innovative ways of interrogating audiovisual translation data. The final part addresses an array of themes pertaining to the place of audiovisual translation in society. This *Handbook* gives audiovisual translation studies the platform it needs to raise its profile within the Humanities research landscape and is key reading for all those engaged in the study and research of Audiovisual Translation within Translation studies.

For readers in the English-speaking world, almost all Holocaust writing is translated writing. Translation is indispensable for our understanding of the Holocaust because there is a need to tell others what happened in a way that makes events and experiences accessible – if not, perhaps, comprehensible – to other communities. Yet what this means is only beginning to be explored by Translation Studies scholars. This book aims to bring together the insights of Translation Studies and Holocaust Studies in order to show what a critical understanding of translation in practice and context can contribute to our knowledge of the legacy of the Holocaust. The role translation plays is not just as a facilitator of a semi-transparent transfer of information. Holocaust writing involves questions about language, truth and ethics, and a theoretically informed understanding of translation adds to these questions by drawing attention to processes of mediation and reception in cultural and historical context. It is important to examine how writing by Holocaust victims, which is closely tied to a specific language and reflects on the relationship between language, experience and thought, can (or cannot) be translated. This volume brings the disciplines of Holocaust and Translation Studies into an encounter with each other in order to explore the effects of translation on Holocaust writing. The individual pieces by Holocaust scholars explore general, theoretical questions and individual case studies, and are accompanied by commentaries by translation scholars.

The Routledge Handbook of Translation Studies and Linguistics explores the interrelationships between Translation Studies and Linguistics in six sections of state-of-the-art chapters, written by leading specialists from around the world. The first part, on the nature of language, translation and interpreting, begins by addressing the relationships between translation studies and linguistics as major topics of study in themselves before focusing, in individual chapters, on the relationships between translation on the one hand and semantics, semiotics and the sound system of language on the other. Part II is concerned with the nature of meaning and the ways in which meaning can be shared or semi-shared in texts pairs that are related to each other as first-written texts and their translations, while Part III focuses on relationships between translation and interpreting and the written and spoken word. In part IV, the users of language, and language in use in situations involving more than one language are covered, and in Part V technological tools that can assist language users are brought onto the scene. Finally, Part VI presents chapters on the links between areas of applied linguistics and translation and interpreting. With an introduction by the editor and an extensive bibliography, this handbook is an indispensable resource for advanced students of translation studies, interpreting studies and applied linguistics.

Despite landmark works in translation studies such as George Steiner's *After Babel* and Eugene Nida's *The Theory and Practice of Translation*, most of what passes as con-temporary "theory" on the subject has been content to remain largely within the realm of the anecdotal. Not so Douglas Robinson's ambitious book, which, despite its author's protests to the contrary, makes a bid to displace (the deconstructive term is apposite here) a gamut of earlier cogitations on the subject, reaching all the way back to Cicero, Augustine, and Jerome. Robinson himself sums up the aim of his project in this way: "I want to displace the entire rhetoric and ideology of mainstream translation theory, which ... is medieval and ecclesiastical in origin, authoritarian in intent, and denaturing and mystificatory in effect." -- from <http://www.jstor.org> (Sep. 12, 2014).

This book presents the first translation into English of the full text of the *Kaogong ji*. This classic work, described by the great scholar of the history of Chinese science and technology Joseph Needham as "the most important document for the study of ancient Chinese technology", dates from the fifth century BC and forms part of the *Zhouli* (*The Rites of the Zhou Dynasty*), one of the great Confucian classics. The text itself describes the techniques of working and the technologies used by over twenty different kinds of craftsmen and artificers, such as metal workers, chariot makers, weapon makers, music instrument makers, potters and master builders. This edition, besides providing the full text in English, also provides a substantial introduction and other supporting explanatory material, over one hundred illustrations of ancient Chinese artefacts, and the original Chinese text itself.

Pragmatics, often defined as the study of language use and language users, sets out to explain what people wish to achieve and how they go about achieving it in using language. Such a study is clearly of direct relevance to an understanding of translation and translators. The thirteen chapters in this volume show how translation - skill, art, process and product - is affected by pragmatic factors such as the acts performed by people when they use language, how writers try to be polite, relevant and cooperative, the distinctions they make between what their readers may already know and what is likely to be new to them, what is presupposed and what is openly affirmed, time and space, how they refer to things and make their discourse coherent, how issues may be hedged or attempts made to produce in readers of the translation effects equivalent to those stimulated in readers of the original. Particular attention is paid to legal, political, humorous, poetic and other literary texts.

The *Routledge Companion to Translation Studies* brings together clear, detailed essays from leading international scholars on major areas in Translation Studies today. All the contributors are known experts in their chosen areas and this gives the volume the air of authority required when dealing with a subject that is being increasingly studied in higher education institutions all over the world" - Christopher Taylor, University of Trieste, Italy

What does it mean to read one nation's literature in another language? The considerable popularity of Russian literature in the English-speaking world rests almost entirely upon translations. In *The Translator and the Text*, Rachel May analyzes Russian literature in English translation, seeing it less as a substitute for the original works than as a subset of English literature, with its own cultural, stylistic, and narrative traditions.

They cover contexts from Brussels to Singapore and Melbourne to Cairo and topics from translation as resistance to translanguaging and urban design. This volume explores the role of translation at critical junctures of a city's historical transformation as well as in the mundane intercultural moments of urban life, and uncovers the trope of the translational city in writing. This Handbook is critical reading for researchers, scholars and advanced students in translation studies, linguistics and urban studies.

Dialogue interpreting includes what is variously referred to in English as Community, Public Service, Liaison, Ad Hoc or Bilateral Interpreting - the defining characteristic being interpreter-mediated communication in spontaneous face-to-face interaction. Included under this heading are all kinds of professional encounters: police, immigration and welfare services interviews, doctor-patient interviews, business negotiations, political interviews, lawyer-client and courtroom interpreting and so on. Whereas research into conference interpreting is now well established, the investigation of dialogue interpreting as a professional activity is still in its infancy, despite some highly promising publications in recent years. This special issue of *The Translator*, guest-edited by one of the leading scholars in translation studies, provides a forum for bringing together separate strands within this developing field and should create an impetus for further research. Viewing the interpreter as a gatekeeper, coordinator and negotiator of meanings within a three-way interaction, the descriptive studies included in this volume focus on issues such as role-conflict, in-group loyalties, participation status, relevance and the negotiation of face, thus linking the observation of interpreting practice to pragmatic constraints such as power, distance and face-threat and to semiotic constraints such as genres and discourses as socio-textual practices of

particular cultural communities.

As a sequel to *An Encyclopedia of Translation: ChineseEnglish EnglishChinese*, which was published in 1995, this volume, *An Encyclopedia of Practical Translation and Interpreting*, focuses on practical translation and interpreting, the two emerging areas of increasing importance in recent decades. Some chapters in this volume are illustrated with examples in translation between Chinese and English. Scholars and experts from China, France, Hong Kong, Spain, Taiwan, the United Kingdom, and the United States share with us their experiences in translation or interpreting practice. This encyclopedia should be of great interest to both specialists and general readers.

Translation-related activities from and into Arabic have significantly increased in the last few years, in both scope and scale. The launch of a number of national translation projects, policies and awards in a number of Arab countries, together with the increasing translation from Arabic in a wide range of subject areas outside the Arab World – especially in the aftermath of the Arab Spring – have complicated and diversified the dynamics of the translation industry involving Arabic. The *Routledge Handbook of Arabic Translation* seeks to explicate Arabic translation practice, pedagogy and scholarship, with the aim of producing a state-of-the-art reference book that maps out these areas and meets the pedagogical and research needs of advanced undergraduate and postgraduate students, as well as active researchers.
