Give Me Liberty! is the #1 book in the U.S. history survey course because it works in the classroom. A single-author text by a leader in the field, Give Me Liberty! delivers an authoritative, accessible, concise, and integrated American history. Updated with powerful new scholarship on borderlands and the West, the Fifth Edition brings new interactive History Skills Tutorials and Norton InQuizitive for History, the award-winning adaptive quizzing tool. The best-selling Seagull Edition is also available in full color for the first time.

Drawing on the South African case, this book looks at shifts in higher education around the world in the last two decades. In South Africa, calls for transformation have been heard in the university since the last days of apartheid. Similar claims for quality higher education to be made available to all have been made across the African continent. In spite of this, inequalities remain and many would argue that these have been exacerbated during the Covid pandemic. Understanding Higher Education responds to these calls by arguing for a social account of teaching and learning by contesting dominant understandings of students as 'decontextualised learners' premised on the idea that the university is a meritocracy. This book tackles the issue of teaching and learning by looking both within and beyond the classroom. It looks at how higher education policies emerged from the notion of the knowledge economy in the newly democratic South Africa, and how national qualification frameworks and other processes brought the country more closely into conversation with the global order. The effects of this on staffing and curriculum structures are considered alongside a proposition for alternative ways of understanding the role of

higher education in society.

Unit Workbook for Fundamentals of Psychology

Drawing on previously unused primary sources, this book paints an intimate and vivid portrait of Palestinian society on the eve of modernity. Through the voices of merchants, peasants, and Ottoman officials, Beshara Doumani offers a major revision of standard interpretations of Ottoman history by investigating the ways in which urban-rural dynamics in a provincial setting appropriated and gave meaning to the larger forces of Ottoman rule and European economic expansion. He traces the relationship between culture, politics, and economic change by looking at how merchant families constructed trade networks and cultivated political power, and by showing how peasants defined their identity and formulated their notions of justice and political authority. Original and accessible, this study challenges nationalist constructions of history and provides a context for understanding the Palestinian-Israeli conflict. It is also the first comprehensive work on the Nablus region, Palestine's trade, manufacturing, and agricultural heartland, and a bastion of local autonomy. Doumani rediscovers Palestine by writing the inhabitants of this ancient land into history.

This book contains eight papers from a detailed study of technical college provision in KwaZulu-Natal, South Africa, that raised the following four issues relevant to the transformation of technical colleges across South Africa: (1) the teaching and learning environment at technical colleges is suboptimal; (2) social relations at the technical colleges are tense, with few institutions having successfully come to terms with the rapid deracialization of student enrollments in recent years; (3) the labor market surrounding technical colleges appears totally dysfunctional, with few students obtaining employment after technical college training; and (4) the separate development policies of the past necessitate

institutional restructuring. The following papers are included: "A Study of Technical Colleges in KwaZulu-Natal: A Methodological Introduction" (Andre Kraak, Graham Hall); "Problems Facing Further Education and Training" (Andre Kraak); "Planning Imperative: New Policy Framework in FET [Further Education and Training]" (Andre Kraak); "Socio-Economic and Educational Profile of KwaZulu-Natal" (Nisaar Mahomed); "Quantitative Overview of the Technical Colleges of KwaZulu-Natal" (Graham Hall); "Learning, Teaching and Management Environment: Evidence from Qualitative Studies" (Andre Kraak); "Autonomy and Responsiveness: Evidence from the Qualitative Case Studies" (Andre Kraak); and "Critical Overview: The Need for Labour Market and Institutional Reform" (Andre Kraak). The bibliography contains 52 references. (MN)

This monograph explores the scope for greater private sector participation in the provision of criminal justice services through outsourcing schemes. This includes an analysis of the concept of outsourcing, its risks and benefits, and a discussion of the South African government's outsourcing policy.

Improving Manufacturing Performance in South Africa
One third of the world's soils have already been degraded. The burden on the land continues to grow under the combined pressures of demography, urbanization, artificialization and mining, and there are increased demands on agricultural land: changing dietary preferences, land speculation, as well as new demands for agroenergy, fiber, green chemistry, and more. Resulting issues such as soil crusting, water and wind erosion, soil salinization and soil acidity therefore constitute a major threat. The authors of this book present the main processes and factors of soil degradation, different ways to prevent it and methods of rehabilitation. The book also deals with the origin and

processes of metallic and organic soil pollution as well as methods of phytoremediation and restoration. It is one of the few books to explore the issue of soil artificialization and urban soil management and to highlight how agricultural and urban waste can be used to amend and fertilize cultivated soils.

The Technical and Vocational Education and Training (TVET) college environment is marked by increasingly stark juxtapositions between what needs to be achieved in the post-school education sector and the increasing difficulty of current conditions. The 'triple challenge' of poverty, inequality and unemployment weighs heavily on the social, political and economic fabric of the country and expectations are high that the TVET colleges can make a pivotal contribution to counter these challenges. Despite laudable increases in TVET enrolment, the education system needs to work harder to accommodate the weight of demand for post school further education and training (FET) band qualifications from young people not in education, employment or training. At the same time, it is vital to secure adequate quality in TVET programmes which depend so much on the competence and commitment of college lecturers. This collection offers a set of research papers that provide new analytic and empirical material on: • The political economy of TVET types in different countries which, by comparison, illuminate the South African case; • A periodisation of government

interventions in the TVET sector over the last three decades; • The unsettled state and status of TVET lecturers in relation to their job requirements and conditions of service; • The halting evolution of collegial relationships between college lecturers towards higher collegiality; • Employer expectations of college graduates and how colleges are responding; and • An analysis of the outcomes of a college improvement intervention in Limpopo and the Eastern Cape. This book will offer valuable information and insights for decision-makers as well as analysts of institutional change concerning links between education and economic growth, with particular regard to TVET graduates' employment rates.

This manual (most of whose modules were originally published 2001-2002) aims at strengthening various aspects of irrigation development, mainly emphasizing the engineering, agronomic and economic aspects of smallholder irrigation, in view of the limited practical references available in this area. It also introduces the irrigation practitioner to the social, health and environmental aspects, providing a bridge between the various disciplines involved in irrigation development.--Publisher's description.

This book explores a century of business development of The South African Life Assurance Company, from a specific local focus to a national conglomerate expanding into global insurance

markets. Established as a strategic vehicle to address Afrikaner economic marginalization and abject poverty at the beginning of the twentieth century, Sanlam has displayed both path dependence and a dynamic adaptability to complex changing contexts to become a global player. The strategic convergence of economic empowerment through the mobilization of savings into insurance products, as well as Afrikaner nationalism, assisted this growth. Sanlam has played an atypical role in the economic empowerment of an ethnic entity through extensive investments into the industrializing South African economy. This strategic diversion created operational limitations that were only resolved early in the twenty-first century. As globalization, financial deregulation, and weakened Afrikaner political and social hegemony manifested, strategic change management relied on the path dependence of empowerment strategies to address new markets with similar needs to those of the early stakeholder market of 1918. The former mutual life office demutualized operations to become a diversified financial services group of companies operating across almost the entire African continent, as well as in India, Malaysia, and the UK. This volume presents a business history of strategic management of an insurance enterprise, and its transformation from a defined cultural context into an international empowerment strategy through

innovation on all levels of business operation and organization. This book is an Open Access publication, available online under a CC BY-NC-ND 4.0 license.

In business, recruiting the right leaders at the right time is the competitive advantage. Leadership Recruiting is the first authoritative guide to doing so, every step of the way, for rapidly growing small companies to Global 100 conglomerates. What once was unmanaged, or managed by instinct, can now be driven by 25 years of research with many of the world's leading organizations. All executives can benefit, as candidates for new positions, as managers responsible for hiring senior executives, or as executive recruiters charged with managing the hiring process. Authors Simon Mullins and David Lord, CEO and Founder, respectively, of the Executive Search Information Exchange (ESIX.org), deliver what works before and after a decision to find the right person to address a management need. Leadership Recruiting takes the hiring organization's view, independent of the interests of executive search and consulting firms but with a full appreciation of how and when to engage consultants and how to build an in-house capability, so central to any company's future. It's a business-school course in 182 pages, indispensable for hiring managers and HR executives. In fact, any aspiring business leader can learn here the inside scoop on how this

sometimes-mysterious, all-important activity works - or at least should work! Leadership Recruiting will soon be seen on the Zoom(TM) meeting bookshelf backdrops of top HR officers and Directors of Executive Recruiting worldwide. For more, see ESIX.org

Written in an informative and jargon-free style, this book is guided by principles of good practice and covers the relevant theory to deal with the essential aspects of designing a course. Important areas covered include: learning levels and outcomes aligning learning and teaching strategies assessment methods course management C&IT resources. In this concise guide, the authors look to the future in terms of integration of computing and technology in course design and consider the promotion of student learning, the diversity of the student body and the need to create inclusive learning environments.

In our rapidly urbanizing global society, solid waste management will be a key challenge facing all the world's cities. This title provides a fresh perspective and data on one of the biggest issues in urban development.

Steven Silbiger has distilled the material of the ten most popular business schools in order to teach readers the language of business. At the rate of one easy-to-understand chapter a day, this book will enable readers to absorb the material, speak the

language, and, most importantly, acquire the confidence and expertise needed to get ahead in the competitive business world.

In what ways does access to undergraduate education have a transformative impact on people and societies? What conditions are required for this impact to occur? What are the pathways from an undergraduate education to the public good, including inclusive economic development? These questions have particular resonance in the South African higher education context, which is attempting to tackle the challenges of widening access and improving completion rates in a system in which the segregations of the apartheid years are still apparent. Higher education is recognised in core legislation as having a distinctive and crucial role in building post-apartheid society. Undergraduate education is seen as central to addressing skills shortages in South Africa. It is also seen to yield significant social returns, including a consistent positive impact on societal institutions and the development of a range of capabilities that have public, as well as private, benefits. This book offers comprehensive contemporary evidence that allows for a fresh engagement with these pressing issues. *How Immigrants Contribute to Developing Countries' Economies* is the result of a project carried out by the OECD Development Centre and the International Labour Organization, with support from the
