

## Study Guides For Pharmacotherapy Board Certification

Updates for 2020! We've made edits and updates to the following sections: Asthma, Atrial Fibrillation, Beers Criteria, Chronic Kidney Disease, Crohn's, COPD, Diabetes, Migraines, Hyperlipidemia, Parkinson's, Sexual Dysfunction, Ulcerative Colitis, and Vaccines. In addition, we've created a section on the rapidly growing topic of Pharmacogenomics. If you are a pharmacist seeking to become board certified in geriatrics by passing the exam, this is a must-have study guide. We've edited our VERY popular BCPS Bullets book and created a review for the geriatric pharmacy exam based on the Board of Pharmaceutical Specialties content outline. With recent PASS rates around 40%, you have to have the right tools to pass this exam and this book will help immensely. In addition to the exam being very difficult, you are likely a busy professional with very minimal free time. I've always had a hard time staying focused while studying from large review article type study guides and have squandered hours reading while retaining very little. This book is intended to be a crash course/cheat sheet overview of the most highly testable material. I wanted to remember the really important stuff because I know it is impossible to know every minute detail. BCGP Bullets, the Condensed BCGP Study Guide will help prepare you for the exam as well as help you maximize your study time. We have covered over 100+ disease states with critical clinical pearls, like drugs of choice, drug interactions, disease state education, and geriatric-specific nuggets for certain medications. Biostatistics basics, important geriatric terminology, social, financial, and emotional considerations are also included in this book. Items like elder abuse, advanced directives, and power of attorney show up in the content outline and we have also outlined the basics of this terminology. I can assure you that there is no doubt this book will help in your preparation for becoming a BCGP certified pharmacist! The Board Certified Geriatric Pharmacist (BCGP) is a designation from the Board of Pharmacy Specialties. The contents within this study guide are not affiliated or endorsed by the Board of Pharmacy Specialties.

Get your highest score possible on the MPJE® with detailed state-specific guidance! Complete coverage of 20 states, plus federal regulations! Pharmacy Law is the perfect way to prepare for the MPJE Exam. It delivers a rigorous review of pharmacy-related statutes, rules, and regulations that impact pharmacy practice in twenty states as well as a summary of federal regulations that pertain to pharmacy law. Federal coverage includes summaries of must-know legislation such as the Federal Controlled Substances Act, the Federal Food, Drug & Cosmetics Act, and other relevant federal guidelines. State-specific chapters discuss important topics such as renewal of pharmacists' licenses, qualifications, prescription transfers, inventory requirements, record-keeping, and prescriptive authority. Each chapter concludes with practice scenarios and questions with appropriate explanations. The Review You Need to Excel in These States: Alabama, Arizona, Arkansas, California, Colorado, Florida, Georgia, Illinois, Indiana, Kentucky, Louisiana, Maryland, North Carolina, New Jersey, Ohio, Oregon, Pennsylvania, South Carolina, Texas & Wisconsin. Watch for future supplements with additional states.

Incorporate genomics into every applicable area of your clinical practice with this complete how-to guide Precision Medicine: A Guide to Genomics in Clinical Practice is a comprehensive, yet succinct overview of the practice of genomic medicine. It is written for general healthcare practitioners, specialists, and trainees with the goal of providing detailed guidance on how to incorporate genomic medicine into daily practice. Features that make this book valuable to every practice: •Intentionally avoids excessive technical content and consistently emphasizes real-life patient care and decision support •Follows the course of a human life, beginning before conception through pregnancy, childhood, and adulthood, discussing the current and future applications of genomics and precision medicine at each stage •Organization allows healthcare providers to quickly and easily find the information relevant to their practice. •The authors highlight common pitfalls – technical and ethical – that might complicate the delivery of quality genomic healthcare •Enhanced by eleven valuable appendices that cover important topics ranging from the basics of genetics to ethical issues to regulation and reimbursement If you are searching for a clinically relevant, non-technical resource that will teach you how genomic medicine can and should be practiced in your specific field of interest, Precision Medicine: A Guide to Genomics in Clinical Practice belongs on your desk.

Simply put, this BCGP review from Meded101 will help you pass your exam and become a Board Certified Geriatric Pharmacist. I've worked my entire career in geriatrics and wanted to share some of that clinical knowledge with you as well as provide you an incredibly valuable study guide. Studying for a pharmacist board certification exam can be overwhelming. It's likely been a few years since you've taken an exam and the last thing you want to do is fail! The next to last thing you want to do is to try to find 3-6 months to study for the exam. As a father with two small children, I realize how valuable time is. What was frustrating to me about preparing for the Board Certified Geriatric Pharmacist (BCGP) exam, formerly the Certified Geriatric Pharmacist (CGP) exam as well as the BCPS exam was that the study material was not to the point. I felt like I needed to read thousands of pages to be adequately prepared. Recognizing that challenge of time management as a busy professional, I wanted to create the ultimate review for the BCGP exam that won't take you months to get through. I wanted to give you the most important bullet points you need to know to best prepare for the exam. I utilized the BCGP outline to create this study guide. It breaks down nearly 80 of the most important geriatric disease states. In this breakdown I include information about the signs and symptoms, complications, risk factors, and of course the main drugs of therapy for each disease. I also break down the most important clinical pearls from the drugs of choice for each disease state. Within the medications to know breakdown for each disease state, you will find clinical pearls, important adverse effects, drug-disease and drug-drug interaction information, and essential compelling indications. While this review specifically follows the content outline for the BCGP (CGP) exam, pharmacists seeking Board Certification in Pharmacotherapy (BCPS) or those seeking Board Certification in Ambulatory Care (BCACP) may also benefit from the clinical information within this study guide. The Board Certified Geriatric Pharmacist, Board Certified Pharmacotherapy Specialist, and Board Certified Ambulatory Care Pharmacist are designations from the Board of Pharmacy Specialties (BPS). The contents contained within this study guide are not affiliated or endorsed by BPS.

Psychiatrists and residents are faced with the important -- but what may feel overwhelming -- task of refreshing their knowledge of the whole of psychiatric practice, typically while remaining engaged in full-time clinical activity. Psychiatrists will find the logical structure, substantive questions, and thorough explanations provided by the Study Guide for the Psychiatry Board Examination to be as reassuring as they are educational. Although readers are advised to consult a range of resources in preparation for the examination, this guide is indispensable. It is the first and only guide to reflect the revisions contained in DSM-5®, and it will ably assume a primary role in the study and review process. The guide is designed for maximum usefulness, with

specific features and attributes to support knowledge recall and successful examination performance. \* The authors are from a cross-section of accomplished students, fellows, and junior and senior faculty, all of whom have faced or will face the board examination and who understand its importance to the profession.\* Topics were determined by the American Board of Psychiatry and Neurology Certification Examination in Psychiatry 2015 Content Blueprint.\* The approximately 400 questions were formulated from information extracted from widely available American Psychiatric Publishing textbooks and accurately reflect the accepted psychiatric knowledge base.\* Each multiple choice question is followed by an explanation of why the correct answer is correct and the others are incorrect, and every question and explanation is referenced, directing the reader to the primary material for more in-depth learning and study.\* The volume was designed as a study guide for both the initial psychiatry board examination and the recertification examination. The process of working through the study guide will allow the reader to identify areas of strength and weakness, initiate further study, and test and retest knowledge, ultimately preparing for the examination's rigors. Only the Study Guide for the Psychiatry Board Examination offers support for the new, DSM-5® -- compatible examination, and that alone renders it essential.

I've had feedback from students that they just want me to read them drug names and mnemonics so they can put in their earbuds before they go to bed before their board exams. I've got three five year olds, I don't have time to do the heavy lifting you all do as narrators. In Memorizing Pharmacology: A Relaxed Approach, which will sell over 6,500 audiobook copies in its first year, I only had the narrator complete 200 drug names in a seven hour book. There is a list of 350 later in the book, but I thought, who in the world would want to listen to 350 drug names in a row? So I omitted it. There was an answer to that rhetorical question, health professional students studying for a board exam that are exhausted from family, work, and school want to listen to it. This print, book, however, provides a journal for you to continue to add knowledge you pick up as you complete your pharmacology class, clinicals, or even an interesting commercial or YouTube video.

Delivers a clear, concise review of fundamental concepts backed by more than 1,000 review questions and answers.

Clinical Neuropsychology Study Guide and Board Review, Second Edition provides an easy to study volume with sample questions and recommended readings that are specifically designed to help individuals prepare for the ABCN written examination. This book can also be used as a teaching tool for graduate students and trainees at various levels. The format is geared toward exam preparation. Information is provided in a concise, outlined manner, with liberal use of bullets, boxes, illustrations, and tables. The guide also includes hundreds of mock exam questions and many recommended readings.

Updates for 2019! We've updated and added some content in the following disease states: Acid/Base Disorders, Bipolar Disorder, Breast Cancer, CHF, Chronic Kidney Disease, Clostridium Difficile, Crohn's, DVT/PE, Depression, Diabetes, Gout, Migraines, Hyperlipidemia, Hypertension, PUD, Meningitis, Osteoporosis, Parkinson's, PAD, Rheumatoid Arthritis, Sepsis, Sexual Dysfunction, Shingles, STD's, Vaccines. If you talk to anyone who's taken the BCPS exam, you'll quickly understand that the BCPS exam will likely be the most challenging exam you'll ever take. You need all the resources you can get to make sure you are prepared! In addition to the exam being very difficult, you are likely a busy professional with very minimal free time. I've always had a hard time staying focused while studying from large review article type study guides and have squandered hours reading while retaining very little. This book is intended to be a crash course/cheat sheet overview of the most highly testable material. I wanted to remember the really important stuff, because I know it is impossible to know every minute detail. BCPS Bullets, the Condensed BCPS Study Guide will help prepare you for the exam as well as help you maximize your study time. We covered over 100+ disease states straight from the BCPS content outline provided by BPS, and included important pearls for each condition including assessments, risk factors, most commonly used drugs of choice, must know adverse effects, miscellaneous clinical pearls, notorious drug interactions, warnings and precautions, and of course, relevant labs. I wanted to cover each disease state in 1-2 pages to try to ensure you are reviewing the most relevant content. We did go over 2 pages on some disease states, but we did our best to keep the information concise and critical for you to know in your preparation to becoming a Board Certified Pharmacotherapy Specialist. The book is over 300+ pages, but it is in bullet point format and very easy to digest multiple disease states at a sitting. There is also some white around the margins to take additional notes or highlight essential information to remember. As many of you are aware from the content outline, the BCPS exam is not all clinical. In addition to the disease states on the BCPS content outline, we've also included sections on biostatistics as well as important regulatory issues. I can assure you that there is no doubt this book will help in your preparation to becoming a BCPS pharmacist! The Board Certified Pharmacotherapy Specialist (BCPS) is a designation from the Board of Pharmacy Specialties. The contents within this study guide are not affiliated or endorsed by the Board of Pharmacy Specialties.

A complete one-stop review of the clinically important aspects of histology and cell biology--user-friendly, concise, and packed with learning aids! The ideal review for course exams and the USMLE! This popular title in the LANGE series is specifically designed to help you make the most of your study time--whether you're studying histology and cell biology for the first time or reviewing for course exams or the USMLE. With this focused review you will be able to pinpoint your weak areas, and then improve your comprehension with learning aids especially designed to help you understand and retain even the most difficult material. You will find complete easy-to-follow coverage of all the need-to-know material: fundamental concepts, the four basic tissue types, and organs and organ systems--presented in a consistent, time-saving design. At the conclusion of the book, you will find a Diagnostic Final Exam that has been updated with longer, case-related stems that mimic the USMLE Step 1 examination. Each chapter is devoted to one specific topic and includes learning aids such as: Objectives that point out significant facts and concepts that you must know about each topic Max Yield(tm) study questions that direct you to key facts needed to master material most often covered on exams A synopsis presented in outline form that reviews all the basic histology and related cell biology covered on exams Multiple-choice questions written in a style most commonly used in medical school NEW to this Edition: Thoroughly revised Q&A Completely updated text and practice questions to reflect current knowledge Information added to each chapter regarding relevant pathology/clinical issues; possibly as a separate colored box Visit [www.LangeTextbooks.com](http://www.LangeTextbooks.com) to access valuable resources and study aids. Thorough coverage you won't find anywhere else! **FUNDAMENTAL CONCEPTS:** Methods of Study, The Plasma Membrane & Cytoplasm, The Nucleus & Cell Cycle, **THE FOUR BASIC TISSUE TYPES:** Epithelial Tissue, Connective Tissue, Adipose Tissue, Cartilage, Bone, Integrative Multiple-Choice Questions: Connective Tissues Nerve Tissue, Muscle Tissue, Integrative Multiple-Choice Questions: Basic Tissue Types, **ORGANS & ORGAN SYSTEMS:** Circulatory System, Peripheral Blood, Hematopoiesis, Lymphoid System, Digestive Tract, Glands Associated with the Digestive Tract, Integrative Multiple-Choice Questions: Digestive System, Respiratory System, Skin, Urinary System, Pituitary & Hypothalamus, Adrenals, Islets of Langerhans, Thyroid, Parathyroids, & Pineal Body, Male Reproductive System, Female Reproductive System, Integrative Multiple-Choice Questions: Endocrine System, Sense Organs, Diagnostic Final Examination

Concise, portable, and packed with essential information, Manual of Clinical Oncology is an indispensable resource for understanding basic science, clinical findings, and available technology as they relate to

the diagnosis and management patients with cancer. The practical format provides high-yield content useful for participating in rounds and making diagnostic and therapeutic decisions at the bedside. Edited by Dr. Bartosz Chmielowski and Dr. Mary Territo, both from UCLA School of Medicine, this eighth edition carries on the tradition of excellence set forth by longtime editor Dr. Dennis Casciato. Incorporates recent major achievements in immunotherapies, biologics, and targeted therapies. Features new chapters on the biology of cancer, immunotherapy, and cancer survivorship. Contains numerous diagnostic and treatment algorithms, as well as content on complications, for assistance with clinical decision making. Includes helpful appendices such as a glossary of cytogenetic nomenclature and combination chemotherapy regimens. Your book purchase includes a complimentary download of the enhanced eBook for iOS, Android, PC & Mac. Take advantage of these practical features that will improve your eBook experience: The ability to download the eBook on multiple devices at one time — providing a seamless reading experience online or offline Powerful search tools and smart navigation cross-links that allow you to search within this book, or across your entire library of VitalSource eBooks Multiple viewing options that enable you to scale images and text to any size without losing page clarity as well as responsive design The ability to highlight text and add notes with one click

Fewer patients die in the hospital when pharmacists participate on hospital medical emergency teams (Bond 2007). This book is for hospital pharmacists who want to learn and refine the clinical skills necessary to be a valuable member of the hospital code blue / medical emergency team. Each chapter contains actionable, concise training on the role of the pharmacist during specific adult inpatient medical emergencies including: Code Blue Rapid Response Shock Sepsis Anaphylaxis Endotracheal Intubation Stridor Methemoglobinemia Massive Pulmonary Embolism Status Epilepticus Acute Agitation Severe Alcohol Withdrawal Opioid Overdose Hypertensive Emergency Severe Hyperthermia Hypoglycemia Hyponatremia from SIADH Hyperkalemia

Covers the most frequently asked and tested points on the pediatric board exam. Each chapter offers a quick review of specific diseases and conditions clinicians need to know during the patient encounter. Easy-to-use and comprehensive, clinicians will find this guide to be the ideal final resource needed before taking the pediatric board exam.

Building upon the highly successful 1st edition, this book is a comprehensive review designed to prepare pediatric residents, fellows, and pediatricians for the General Pediatrics Certifying Examination, and for the American Board of Pediatrics Maintenance of Certification. Pediatric Board Study Guide: A Last Minute Review, 2nd edition, covers all aspects of pediatric medicine; each chapter has been updated according to the most recent content specifications provided by the ABP. The 2nd edition provides more illustrations, diagrams, radiology images, and clinical case scenarios to further assist readers in reviewing pediatric subspecialties. New chapter topics include nutrition, sports medicine, patient safety, quality improvement, ethics, and pharmacology. Finally, the book closes with a "Last Minute Review" of high-yield cases arranged in the same sequence as the chapters, providing readers with a concise study guide of critical cases and conditions. Pediatric residents and fellows preparing for the board examination, pediatricians, and pediatric subspecialists preparing for certification maintenance will find Pediatric Board Study Guide: A Last Minute Review, 2nd edition easy to use and comprehensive, making it the ideal resource and study tool.

You'll never find an easier, more efficient, and more focused way to ace the pharmacology and pharmacology-related questions on the USMLE and course examinations than the USMLE Road Map. Designed to provide maximum learning in minimum time, this USMLE Road Map offers a concise, creative, and well-illustrated new approach to mastering pharmacology. Book jacket.

Publisher's Note: Products purchased from Third Party sellers are not guaranteed by the publisher for quality, authenticity, or access to any online entitlements included with the product. The #1 guide to behavioral issues in medicine delivering thorough, practical discussion of the full scope of the physician-patient relationship "This is an extraordinarily thorough, useful book. It manages to summarize numerous topics, many of which are not a part of a traditional medical curriculum, in concise, relevant chapters."--Doody's Review Service - 5 stars, reviewing an earlier edition The goal of Behavioral Medicine is to help practitioners and students understand the interplay between psychological, physical, social and cultural issues of patients. Within its pages readers will find real-world coverage of behavioral and interactional issues that occur between provider and patient in everyday clinical practice. Readers will learn how to deliver bad news, how to conduct an effective patient interview, how to care for patients at the end of life, how to clinically manage common mental and behavioral issues in medical patients, the principles of medical professionalism, motivating behavior change, and much more. As the leading text on the subject, this trusted classic delivers the most definitive, practical overview of the behavioral, clinical, and social contexts of the physician-patient relationship. The book is case based to reinforce learning through real-world examples, focusing on issues that commonly arise in everyday medical practice and training. One of the significant elements of Behavioral Medicine is the recognition that the wellbeing of physicians and other health professionals is critically important to caring for patients.

A handbook that you will refer to throughout your entire pharmacy education! Pharmacy Student Survival Guide is a one-of-a-kind roadmap for excelling in pharmacy practice courses. A unique combination calculations, kinetics, drug information, medical terminology, and laboratory data book all in one, the Guide helps you organize case information, improve problem-solving skills, learn terminology, and impress faculty during rounds. Pharmacy Student Survival Guide is presented in three sections that span the entire pharmacy curriculum: Systems and Expectations covering etiquette, ethics, communication, monitoring patients, and the function of a medical team Patient Care Tool Box covering medical terminology, pharmacokinetics, laboratory data, and physical assessment Topics in Pharmacy Practice addressing the practice of community and institutional pharmacy, the pharmacists as drug information specialist, managed care, public health, and global pharmacy Valuable for both introductory and advanced practice courses, Pharmacy Student Survival Guide is the one book every pharmacy student must own.

Written by world-class experts in clinical cancer therapeutics, Physicians' Cancer Chemotherapy Drug Manual 2020 provides a complete, easy-to-use catalog of over 100 drugs and commonly used drug regimens--both on- and off-label--for the treatment of all the major cancers.

Alcohol use disorder (AUD) is a major public health problem in the United States. The estimated 12-month and lifetime prevalence values for AUD are 13.9% and 29.1%, respectively, with approximately half of individuals with lifetime AUD having a severe disorder. AUD and its sequelae also account for significant excess mortality and cost the United States more than \$200 billion annually. Despite its high prevalence and numerous negative consequences, AUD remains undertreated. In fact, fewer than 1 in 10 individuals in the United States with a 12-month diagnosis of AUD receive any treatment. Nevertheless, effective and evidence-based interventions are available, and treatment is associated with reductions in the risk of relapse and AUD-associated mortality. The American Psychiatric Association Practice Guideline for the Pharmacological Treatment of Patients With Alcohol Use Disorder seeks to reduce these substantial psychosocial and public health consequences of AUD for millions of affected individuals. The guideline focuses specifically on evidence-based pharmacological treatments for AUD in outpatient settings and includes additional information on assessment and treatment planning, which are an integral part of using pharmacotherapy to treat AUD. In addition to reviewing the available evidence on the use of AUD pharmacotherapy, the guideline offers clear, concise, and actionable recommendation statements, each of which is given a rating that reflects the level of

confidence that potential benefits of an intervention outweigh potential harms. The guideline provides guidance on implementing these recommendations into clinical practice, with the goal of improving quality of care and treatment outcomes of AUD.

Tap into easy-to-follow, step-by-step guidance on the evaluation and initial management of specific orthopedic and athletic injuries with the companion to Examination of Orthopedic and Athletic Injuries, 4th edition. From evaluative procedures for palpation and range of motion through neurologic, ligamentous, and special tests, everything you need now in the lab, and later in the field or in the clinic, is here. It's a terrific preparation tool for the BOC examination, too.

Everything you need to pass the NAPLEX® – comprehensive study material and two practice exams – in one student-reviewed package Written by an instructor who has taught thousand of students, this all-in-one study guide was developed and reviewed by pharmacists, faculty, students, and recent graduates – so you know it contains only the most relevant, up-to-date content. You'll find valuable foundational material and chapter-ending case application questions that cover every key topic included on the NAPLEX. Two downloadable practice tests with a total of 370 questions allowing you to pinpoint your weaknesses. Includes: Coverage that is organized around the NABP competencies and designed to sharpen problem-solving skills, put must-know information at your fingertips, and improve exam-taking ability More than 1400 case application questions, each with a detailed explanation of both correct and incorrect answer choices Takeaway Points at the end of every chapter that summarize key concepts Two complete downloadable practice tests, each with 185 questions

Cancer Pharmacology: An Illustrated Manual of Anticancer Drugs provides a one-stop guide to the essential basic and clinical science of all the effective, life-prolonging drug therapies in oncology. From traditional cytotoxic agents to targeted genomic, epigenomic, hormonal, and immunotherapeutic agents, this book covers the staggering advances in cancer pharmacology that are propelling new standards of care for common and uncommon malignancies. Beautifully illustrated throughout, each chapter contains visually engaging figures detailing the tumor microenvironment, chemical structures of agents, pharmacodynamics, pharmacokinetics, pharmacogenomic, and molecular properties of the various agents, and their mechanisms of action. As the first illustrated book of its kind, this highly visual text uses a uniform approach to each cancer drug class and agent presented in the book, and covers alkylating agents, antimetabolites, antimetotics, epigenetic modulators, hormonal agents, targeted therapies, monoclonal antibodies, immunotherapeutic agents, and much more. Flow diagrams, clinical tables, and bulleted text further explain important information pertaining to each cancer drug class including their indications, mechanisms of action, potential adverse reactions, dosing and dose adjustments, and safety monitoring. Organized in an easy-to-digest format and replete with detailed images, clinical pearls, and end of chapter Q&As, this evidence-based reference presents all major classes, agents, targets, and approaches to cancer pharmacotherapy. Whether you are a trainee, a clinical scientist, or a clinician in practice, the book is an ideal reference. It presents challenging information in an instructional way, illustrates key concepts for ease of retention, and poses tough questions so readers can problem solve potential scenarios and test their pharmacologic acumen. Written by leading experts in oncopharmacology, this first-of-its kind manual is a “must have” for anyone involved in the basic, translational, or clinical aspects of oncology and hematology including clinicians, pharmacists, nurses, and trainees. KEY FEATURES: Includes visual depictions of chemical structures, pharmacokinetics, pharmacodynamics, and pharmacogenomics associated with each class of agents Describes how chemotherapy, targeted therapy, immunotherapy, and hormonal therapy work and why they are expected to work adjuvantly, neoadjuvantly, and in combination with other modalities Over 100 highly stylized images and numerous comprehensive tables Covers challenges related to drug development, drug approval, and regulatory issues in relation to anticancer treatments All chapters conclude with clinical pearls and detailed clinical Q&As with descriptive rationales Purchase includes access to the ebook for use on most mobile devices or computers

Select the most appropriate drug in any clinical situation--quickly and easily Developed for use at the point of care, Pharmacotherapy Bedside Guide helps you decide which pharmacotherapy to employ in specific clinical situations. Comprised exclusively of quick-hit tables and algorithms, this carryanywhere companion tells you what treatment the evidence suggests for each illness or disorder. It also details essential drug information, such as benefits, risks, adverse reactions, dosage, interactions with other drugs, and responses. Conveniently organized by specialty and disorder rather than drug, Pharmacotherapy Bedside Guide will prove invaluable when treating patients.

Bcps BulletsCreatespace Independent Publishing Platform

The 2020-2021 Psychiatric Pharmacotherapy Review book contains comprehensive chapters addressing the most common psychiatric and neurologic conditions tested for in the Board Certified Psychiatric Pharmacist (BCPP) exam. Each chapter is formatted as an outline that include objectives, thorough content, comprehensive reference listings, and self-assessment questions with answer justifications. The chapters include: Introduction to Psychiatric Pharmacy, Anxiety and Anxiety Related Disorders, Biostatistics & Research Design in Psychiatry, Bipolar Disorder, Depression, Neurocognitive Disorders, Neurodevelopmental, Neurologic Disorders, Personality and Eating Disorders, Regulatory Issues in Pharmacy Practice, Schizophrenia Spectrum and Other Psychotic Disorders, Sleep-Wake Disorders, Substance Related Disorders. Additionally, the book includes an extensive set of 14 medication tables that provide quick reference clinical information.

Written and edited by leading cancer experts at Memorial Sloan Kettering Cancer Center, Pocket Oncology, Second Edition, is a practical, high-yield reference for trainees and practitioners of medical oncology and hematology. This easy-to-use, loose-leaf resource contains up-to-date information essential to caring for patients with cancer, from cancer biology, prevention, screening, treatment and supportive care to new advances in immuno-oncology and precision medicine.

Hematology Board Review: Blueprint Study Guide and Q&A is a concise, outline-based study guide covering all topics that appear on the Hematology Certification Exam. The book includes all topics listed in the American Board of Internal Medicine (ABIM) blueprint as essential material for the exam and highlights topic areas that are often found on the test. For hematology and oncology fellows as well as practicing clinicians needing a refresher before taking MOC, this handy study guide provides succinct overviews of all blood disorders, syndromes and diseases with practice questions on the go. Each disorder or disease-based chapter provides the same structure for ease of use beginning with the epidemiology, and followed by the etiology and risk factors, signs and symptoms, diagnostic criteria, indications for treatment, prognostic factors, treatment recommendations, and special considerations. The authors provide the most accurate and up-to-date information, including well-established treatment regimens for a variety of blood disorders, including iron disorders, bone marrow failure syndromes, platelet and megakaryocytic disorders, hemostasis, thrombosis, and hematologic malignancies. Later chapters review other major subspecialty areas found on the exam including transfusion medicine and hematopoietic cell transplantation. With 200 board-style questions and answers with detailed rationales,

Hematology Board Review is the go-to, quick review for any trainee preparing for initial certification and for hematologists or oncologists preparing for recertification. Key Features: Includes 200 board-style questions and answers with rationales Provides key point summaries of each topic area for quick study and easy recall Thorough coverage of hematologic malignancies, blood disorders, transfusion medicine, hematopoietic cell transplantation, and standard treatment regimens Tables providing key data and information related to staging, treatment options, and disease classifications

A complete roadmap to success on the Board of Certification Athletic Trainer Certification Examination. This popular study guide delivers everything students need to sit for the exam with confidence.

Whether you are interpreting the medical literature to optimize patient care, improve health outcomes, or generate hypothesis for research, an understanding of biostatistics is essential for success. Despite exposure to biostatistics in undergraduate and professional education, pharmacists tend to be less confident in their knowledge of biostatistics and their ability to interpret the medical literature than in their clinical skills. This book was developed to bolster the pharmacist's knowledge and confidence for using biostatistical tools for interpreting the literature. With material drawn from ACCP's renowned Pharmacotherapy Self-Assessment Program (PSAP) and the live pharmacotherapy preparatory course Updates in Therapeutics, editor Robert DiCenzo, Pharm.D., FCCP, BCPS, has designed this review to support pharmacists' preparation for the Pharmacotherapy and Ambulatory Care Board of Pharmacy Specialties (BPS) examinations.

Written by world-class experts in clinical cancer therapeutics, Physicians' Cancer Chemotherapy Drug Manual 2021 provides a complete, easy-to-use catalog of over 100 drugs and commonly used drug regimens—both on- and off-label—for the treatment of all the major cancers.

A new companion study guide to the most respected text in pharmacy education Goodman & Gilman's Workbook for Pharmacologic Therapeutics delivers concise, high-yield summaries of the world-renowned coverage of the actions and uses of therapeutic agents in relation to physiology and pathophysiology found in Goodman & Gilman's The Pharmacological Basis of Therapeutics. In order to maximize the learning and teaching experience, this unique review is packed with pedagogical aids such as learning objectives, summaries of key points, self-assessment Q&A, case vignettes, and a complete test bank in the final chapter. Perfect as a self-study guide or as a required classroom review, Goodman & Gilman's Workbook for Pharmacologic Therapeutics contains features and content that will appeal to both students and professors.

The bestselling USMLE study tool -- packed with everything you need to ace the exam on your first try 4 STAR DOODY'S REVIEW! "This is one of the better board review books in pharmacology and it closely follows the most widely used textbook for teaching pharmacology . . . This eighth edition is needed to keep pace with this rapidly growing discipline." -- Doody's Review Service From the authors of the leading pharmacology textbook comes the newest edition of the best pharmacology review in the field. Ideal for medical pharmacology course review and USMLE Step 1 preparation, this skill-building guide comes with more than 1000 USMLE-type questions with answers -- nearly 3 times as many as any other pharmacology review! Features: A concise yet thorough review of basic and clinical pharmacology, covering every must-know concept Organized to reflect course syllabi, focusing on the clinical use and pharmacology of drug categories rather than individual drugs Two USMLE-style Practice Exams with 120 questions each In each chapter, "Skill Keepers" sharpen your recall of key principles from earlier chapters A series of 15-20 USMLE-style questions in each chapter Key terms with definitions Strategies for improving test performance A detailed index and appendices allow you to look up drugs and side effects in an instant All chapters fully updated with the latest drug information Numerous figures and tables, such as those designed to delineate the differences between similar drugs

Perfect for board review or quick reference in clinical practice, Comprehensive Review of Infectious Diseases is a balanced, high-yield resource covering the full range of infectious disease topics. Whether you're preparing for examinations or are looking for a concise resource to support your practice, this unique review contains precisely the information you need – from common infectious diseases concepts and conditions to hundreds of up-to-date review questions and answers for self-assessment and exam preparation. Covers the most frequently encountered concepts and conditions in infectious diseases. Covers challenging areas frequently covered on the boards: clinically-relevant microbiology and ID pharmacology, HIV and antiretroviral therapy, infections in immunocompromised hosts, dermatologic manifestations of ID, infection mimics, infection control and prevention, and more. Includes new and emerging topics such as neglected tropical diseases, bioterrorism, and emerging and re-emerging infections. Provides more than 550 case-based, board-style multiple-choice questions and answers for test prep and self-assessment. Facilitates quick review and maximum retention of information by including hundreds of high-quality illustrations, tables, high-yield boxes, and bulleted lists. Contains practical tips for taking the boards, buzzwords and memory aids for board questions, and clinical and board pearls. Edited and written by rising stars in the field of infectious diseases – authors who have recently taken the boards and excelled, and who understand the challenges posed by this complex field of study and practice.

Cancer Pharmacology and Pharmacotherapy Review is the first book devoted entirely to providing the 'must-know' facts on each cancer agent—including their pharmacokinetics, FDA-approved indications, toxicity, interactions, and other important information that is commonly found on board examinations and essential for any clinician or practitioner to review. The authors, an oncologist and two pharmacists, have developed a handy question-and-answer format to present the material in digestible bursts. As the pharmacology section continues to represent a major portion of the medical oncology exam and a key component on oncology MOC exams, this portable study guide will help prepare anyone looking to fine-tune their knowledge on cancer drugs before the test. Not to mention, with recent advancements in the field of cancer treatment, it has become more cumbersome to recall and maintain essential knowledge of every cancer therapeutic—making this book not only an exam resource but also a handy quick reference for oncologists and pharmacists alike. KEY FEATURES Conveniently organized and arranged by drug class and subtypes for easier recall and classification Includes proper dosage adjustments to account for liver and kidney dysfunction Features tables throughout that provide quick reference regarding FDA-approved medications Simplified diagrams and illustrations facilitate the pharmacokinetic processes

For those preparing for certification or recertification in hematology or oncology, Hoffman and Abeloff's Hematology-Oncology Review is a single-volume source of authoritative, up-to-date exam preparation. This unique question and answer review helps you succeed on today's board exams with more than 1,000 board-style questions, answers, and rationales; comprehensive coverage of essential exam topics, and online practice tests. Includes 1,000+ board-style questions with answers and rationales explaining both correct and incorrect answers. Covers a broad range of topics compiled by experts in hematology and oncology, including cancer biology and genomics, immunotherapy, hematologic malignancies, solid tumor malignancies, non-malignant hematology, and supportive care. Uniquely designed as both a standalone review and a study companion to Abeloff's Clinical Oncology and Hematology: Basic Principles and Practice.

After years of studying and hard work, you're almost a licensed pharmacist! The final step is passing the North American Pharmacy Licensure Examination, or the NAPLEX®. For the last decade, PharmPrep: ASHP's NAPLEX® Review, has been a trusted resource with new graduates preparing for the NAPLEX examination, both as an online product and a print

companion. Using real patient cases accompanied by questions that address all NAPLEX® competency statements, the new fully updated PharmPrep: ASHP's NAPLEX® Review, 4th edition, gives you the flexibility to review information by specific disease state and provides 78 sample cases, as well as calculations and law review sections. As drug therapy becomes more complex, PharmPrep has continued to update and revise cases so they reflect contemporary clinical practice. PharmPrep is an equally important reference for the experienced practitioner as a tool for pharmacists to continue to develop professionally, or for out of practice professionals looking to refresh their skills. Only PharmPrep has case-based questions and detailed explanations that don't just tell you what answers are right or wrong, but why. It is the most affordable, trusted resource available to prepare for the NAPLEX® exam. As a book or in a convenient online/book package, PharmPrep goes where you go—on the subway, in the break room, to the coffeehouse. Or, just cozy up to the PharmPrep book from the comforts of home. Wherever you go, it's the best resource to get you passed and ready to practice. To learn more about PharmPrep Online, visit [www.pharmpreponline.com](http://www.pharmpreponline.com) and sign up for a free trial today. Don't have an ASHP account? Simply register at [www.ashp.org](http://www.ashp.org).

Print version of the book includes free access to the app (web, iOS, and Android), which offers interactive Q&A review plus the entire text of the print book! Please note the app is included with print purchase only. Oncology Board Review: Blueprint Study Guide and Q&A is a concise, outline-based study guide covering the topics that appear on the Medical Oncology Certification Exam. This second edition has been thoroughly revised to include new treatment regimens, clinical guidelines, and other updates impacting the field and reflected on the test. The book includes all topics listed in the American Board of Internal Medicine (ABIM) blueprint as essential material for the Medical Oncology Certification Exam. The coverage spans all hematologic malignancies and solid tumors, beginning with the epidemiology, and followed by the etiology and risk factors of the disease, staging, signs and symptoms, diagnostic criteria, indications for treatment, prognostic factors, treatment recommendations, and special considerations. Later chapters review other major subspecialty areas found on the exam including cancer genetics and tumor biology, supportive and palliative care, bone marrow transplantation, and biostatistics. Each chapter includes key points summarized in digestible bullets for easy recall and self-assessment. And, now containing over 230 board style questions with answers and detailed rationales, Oncology Board Review, Second Edition is the go-to, quick review for any trainee preparing for initial certification and for oncologists preparing for recertification. New to this Edition: Includes over 230 board style questions and answers with rationales. New chapter on Bone Marrow Transplantation. Thoroughly updated and revised chapters with all new treatment recommendations and FDA approvals for solid tumors and hematologic malignancies included. The APhA Complete Review for Pharmacy fully revises the previous edition. This indispensable study guide contains the information most relevant to the NAPLEX summarized in abbreviated bullet format.
