

The Humanistic Tradition 6th Edition

"Dodge Fernald writes an interesting, easy-to-read book for students. Each perspective covers the historical underpinnings of psychology, ending with current models and viewpoints as well as comments and critiques of the perspective. That's important and will help the next generation of scholars in psychology to appreciate alternative views. Nice book!" Joseph R. Ferrari, Ph.D, Vincent de Paul Distinguished Professor, DePaul University Addressing six perspectives, this textbook offers the framework for a conceptual understanding of modern psychology. Psychology: Six Perspectives shows students a measure of unity and continuity within this fragmented field by briefly and coherently discussing six primary perspectives that have arisen: biological, psychoanalytical, behavioral, humanistic, cognitive, and evolutionary. Author L. Dodge Fernald provides coherence by presenting these perspectives in successive historical order, offering students a broad, retrospective account of psychology. Key Features Portrays the fundamental dimensions of this multifaceted field: The similarities and differences among basic concepts, theories, research, and practice of each perspective are examined. Employs both a scientific mode of communication as well as a narrative thread: The real-life narrative of a lonely, stout-hearted social worker unfolds gently throughout the text, illustrating in turn each of the perspectives. Stimulates critical thinking and class discussion: Opportunities for critical evaluation and everyday application provide students with a context for extending their understanding of and investigation into psychology. Intended Audience This core textbook or supplementary text is designed for undergraduate courses in general psychology, ranging from special sections of introductory psychology to the capstone course or senior seminar, including the history and systems of psychology.

The Human Journey offers a truly concise yet satisfyingly full history of the world from ancient times to the present. The book's scope, as the title implies, is the whole story of humanity, in planetary context. Its themes include not only the great questions of the humanities—nature versus nurture, the history and meaning of human variation, the sources of wealth and causes of revolution—but also the major transformations in human history: agriculture, cities, iron, writing, universal religions, global trade, industrialization, popular government, justice, and equality. In each conceptually rich chapter, leading historian Kevin Reilly concentrates on a single important period and theme, sustaining a focused narrative and analytical perspective. Chapter 2, for example, discusses the significance of bronze-age urbanization and the advent of the Iron Age. Chapter 3 examines the meaning and significance of the age of "classical" civilizations. Chapter 4 explains the spread of universal religions and new technologies in the postclassical age of Eurasian integration. But these examples also reveal a range of approaches to world history. The first chapter is an example of current "Big History," the second of history as technological transformations, the third of comparative history, the fourth the history of connections that dominates, and thus narrows, so many texts. Free of either a confined, limiting focus or a mandatory laundry list of topics, this book begins with our most important questions and searches all of our past for answers. Well-grounded in the latest scholarship, this is not a fill-in-the-blanks text, but world history in a grand humanistic tradition.

The Humanistic Tradition, Book 6: Modernism, Postmodernism, and the Global Perspective McGraw-Hill Education The explosion of creativity that marked the European Renaissance provoked an unprecedented age of exploration and of cross-cultural encounter. From the depths of the Black Plague to the heights of Shakespeare's sonnets, book three of The Humanistic Tradition provides an exciting portrait of this period. Now a classic, this is the fundamental text for those seeking a "Spiritual Understanding of Nature on the Basis of Goethe's Method of Training Observation and Thought." Working out of a detailed history of science, Lehrs reveals to the reader not only how science has been inescapably led to the illusions it holds today, but more importantly, how the reader may correct in himself these misconceptions brought into his world view through modern education.

Interdisciplinary in approach and topical in focus, the sixth edition of The Humanistic Tradition continues to bring to life humankind's creative legacy. With more than 800 illustrations and some 150 literary sources in accessible translations, this widely acclaimed humanities survey takes a global perspective that is at once selective and engaging, and helps students better understand the relationship between world cultures. Available in multiple formats, The Humanistic Tradition examines the political, economic, and social contexts out of which history's most memorable achievements emerged.

Wars have a destructive impact on society. The violence in the first case is domicile, in the second urbicide, in the third genocide, and in the fourth, the book introduces a neologism, sociocide, the killing of society. Through the lens of this neologism, Keith Doubt provides persuasive evidence of the social, political, and human consequences of today's wars in countries such as Bosnia and Iraq. Sociocide: Reflections on Today's Wars rigorously formulates, develops, and applies the notion of sociocide as a Weberian ideal type to contemporary wars. Drawing upon sociology, anthropology, philosophy, and literature, Doubt analyzes war crimes, scapegoating, and torture and concludes by examining capitalism in the face of the coronavirus pandemic as a sociocidal force. Embedded in the humanistic tradition and informed by empirical science, this book provides a clear conceptual account of today's wars, one that is objective and moral, critical and humanistic.

Scenes from the Drama of European Literature was first published in 1984. Minnesota Archive Editions uses digital technology to make long-unavailable books once again accessible, and are published unaltered from the original University of Minnesota Press editions. In his foreword to this reprint of Erich Auerbach's major essays, Paolo Valesio pays tribute to the author with an old saying that he feels is still the best metaphor for the genesis of a literary critic: the critic is born of the marriage of Mercury and Philology. The German-born Auerbach was a scholar who specialized in Romance philology, a tradition rooted in German historicism—the conviction that works of art must be judged as products of variable places and times, not from the eye of eternity, nor by a single unchanging aesthetic standard. The mercurial element in Auerbach's work is significant, for in a life of motion—of exile from Hitler's Germany—he came to believe that literary history was evolutionary, ever-changing—a view reflected in the title of his book, which suggests life and literature are historical drama. Auerbach is best known for his magisterial study *Mimesis: The Representation of Reality in Western Literature*, written during the war, in Istanbul, when he was far from his own culture and from the books that he normally relied on. In 1957, just before his death, he arranged for the publication in English of his six most important essays, in a volume called *Scenes from the Drama of European Literature*. As in *Mimesis*, Auerbach's fresh insights bring to the disparate subjects of the essays a coherence that reflects the unity of Western, humanistic tradition, even while they hint at the deepening pessimism of his later years. In the first essay, "Figura," Auerbach develops his concept of the figural interpretation of reality; applied here to Dante's *Divine Comedy*, it also served as groundwork for his treatment of realism in *Mimesis*. A second essay on Dante's examines the poet's depiction of St. Francis of Assisi. The next three essays deal with the paradoxical nature of Pascal's political thought; the merging of *la cour* and *la ville*—the king's entourage and the bourgeoisie—chiefly in relation to the seventeenth-century French theater; and Vico's formulation concepts by the German Romantics. In the final essay Auerbach confers upon Baudelaire's *Fleurs du Mal* the designation "aesthetic dignity" because, not in spite of, the hideous reality of the poems. "A major collection of important essays on European literature, almost all classics, and almost all required reading for their various centuries—thus the book is indispensable for the medieval period, the seventeenth and nineteenth centuries; in addition, the 'Figura' and the Vico essays are very significant theoretical statements. The book is lucid and far more accessible for undergraduates than, say, current high theory. Nor has Auerbach's own work aged . . . All of his varied strengths are evidence in this collection, which is a better way into his work than *Mimesis*." —Fredric Jameson, University of California, Santa Cruz.

The importance of science and technology and future of education and research are just some of the subjects discussed here.

How do you tailor education to the learning needs of adults? Do they learn differently from children? How does their life experience inform their learning processes? These were the questions at the heart of Malcolm Knowles' pioneering theory of andragogy which transformed education theory in the 1970s. The resulting principles of a self-directed, experiential, problem-centred approach to learning have been hugely influential and are still the basis of the learning practices we use today. Understanding these principles is the cornerstone of increasing motivation and enabling adult learners to achieve. The 9th edition of *The Adult Learner* has been revised to include: Updates to the book to reflect the very latest advancements in the field. The addition of two new chapters on diversity and inclusion in adult learning, and andragogy and the online adult learner. An updated supporting website. This website for the 9th edition of *The Adult Learner* will provide basic instructor aids. For each chapter, there will be a PowerPoint presentation, learning exercises, and added study questions. Revisions throughout to make it more readable and relevant to your practices. If you are a researcher, practitioner, or student in education, an adult learning practitioner, training manager, or involved in human resource development, this is the definitive book in adult learning you should not be without.

Life Takes Place argues that, even in our mobile, hypermodern world, human life is impossible without place. Seamon asks the question: why does life take place? He draws on examples of specific places and place experiences to understand place more broadly. Advocating for a holistic way of understanding that he calls "synergistic relationality," Seamon defines places as spatial fields that gather, activate, sustain, identify, and interconnect things, human beings, experiences, meanings, and events. Throughout his phenomenological explication, Seamon recognizes that places are multivalent in their constitution and sophisticated in their dynamics. Drawing on British philosopher J. G. Bennett's method of progressive approximation, he considers place and place experience in terms of their holistic, dialectical, and processual dimensions. Recognizing that places always change over time, Seamon examines their processual dimension by identifying six generative processes that he labels interaction, identity, release, realization, intensification, and creation. Drawing on practical examples from architecture, planning, and urban design, he argues that an understanding of these six place processes might contribute to a more rigorous place making that produces robust places and propels vibrant environmental experiences. This book is a significant contribution to the growing research literature in "place and place making studies."
