The Truth About Day Trading Stocks A realistic guide to day trading today's stock market In terms of the potential for heavy financial losses, day trading is a high-risk profession. No one should contemplate day trading without giving thought to the ways he can lose, and all the ways to lessen or avoid them. Yet many people enter the game with unrealistic expectations, unaware of what it takes to succeed. Seminars and software alone do not make a successful day trader, cautions author Josh DiPietro. Instead, a trader must learn hard lessons of self-discipline, consistency, and staying in the game for the long haul to have a real chance of success. In The Truth About Day Trading Stocks, DiPietro offers the amateur day trader a brutally honest look at the pitfalls of day trading—and how to hopefully avoid them. Written in an engaging and sometimes humorous tone, The Truth About Day Trading Stocks draws on the author's own experiences as a day trader to offer a clear-cut departure from typical "golden goose" strategies promising instant wealth. Instead, he attempts to slow down the dangerous fervor of the average amateur and demonstrate the ways you can become a professional and not lose your shirt in the process. The Truth About Day Trading Stocks shows how trading decisions are bent and shaped by emotions, and why it is critical to know yourself, understand risk, and remember that increasing your skill level is a gradual, ongoing process—there's always more to learn! After dispensing with popular illusions, DiPietro proceeds to offer realistic, practical trading advice—comparing pay-per-trade with pay-per-share brokers, determining which works best and when, offering suggestions on how to avoid the prospect of perfect trades turning ugly, and more. At the end of the book, he also includes a section called "Rules to

Here's a Secret Other Authors Won't Tell You... Day Trading is Hard and Most Day Trading "Educators" Don't Actually Day Trade! You heard that right! They don't make their money from stocks, but from the chatroom, video, and subscription services they sell you! Before we get started, let me first go over what I don't include in this book... I have no "day trading" chatroom which charges your credit card each month for a service you'll never use. I have no monthly website subscription service for "more advanced strategies" that are needed to get started, but not included in the book. I have no Lamborghini I rented to put behind me in a video, or fake money on a table in front of me. What I do have is a book that will teach you how the day trading industry actually works, my own wisdom from being in the stock market for almost a decade, and strategies you can use to actually start day trading. Here's What You'll Learn In This Book: Part 1: The Industry - In the first part of the book, I peel back the curtain and go over the actual day trading industry with you. I show you how so called "pro" traders are able to fake charts, statistics, and trades to make it appear like they actually make money day trading, when they really don't. I then go over the tactics they use to scam traders, and even a website which exposes all the fake educators. Part 2: How to Day Trade - In this section, I go over the basics of day trading. This

includes what software and broker to use, finding mentors who you can refer to for help, and what the typical day in the life of a day trader looks like. Part 3: Trading Setup - Next, I show you the optimal set up to use for day trading. This includes indicators to utilize, how to scan for stocks, and the best chart type to use. I then go over preferable stocks to trade, especially for those with smaller account sizes, and how to limit your risks so you don't end up like so many traders before you who have lost all their money day trading. Part 4: Day Trading Strategies - This is the heart of the book, and where I spend the most time. In this section, I give you 8 different strategies you can immediately start using to day trade. I include detailed explanations, charts, and examples so you know exactly how to implement the strategies I go over. Part 5: Additional Advice - In the last part of the book, I go over my final bit of advice in regards to day trading. This includes when to take profits and losses, using a practice account, and more bits of wisdom I have learned over the years. I must admit to you, day trading is not easy and there is no guarantee of actually making it. However I feel this book gives you the best chance of actually getting started, as well providing a big picture of the day trading industry. If you've been on the fence about day trading, now is your chance to finally learn what it's all about! As a FREE bonus, only for book buyers, you'll receive my special report titled Crush

Day trading is not gambling or an online poker game. To be successful at day trading you need the right tools and you need to be motivated, to work hard, and to persevere. At the beginning of my trading career, a pharmaceutical company announced some positive results for one of its drugs and its stock jumped from \$1 to over \$55 in just two days. Two days! I was a beginner at the time. I was the amateur. I purchased 1,000 shares at \$4 and sold them at over \$10. On my very first beginner trade, I made \$6,000 in a matter of minutes. It was pure luck. I honestly had no idea what I was doing. Within a few weeks I had lost that entire \$6,000 by making mistakes in other trades. I was lucky. My first stupid trade was my lucky one. Other people are not so

lucky. For many, their first mistake is their last trade because in just a few minutes, in one simple trade, they lose all of the money they had worked so hard for. With their account at zero, they walk away from day trading. As a new day trader you should never lose sight of the fact that you are competing with professional traders on Wall Street and other experienced traders around the world who are very serious, highly equipped with advanced education and tools, and most importantly, committed to making money. Day trading is not gambling. It is not a hobby. You must approach day trading very, very seriously. As such, I wake up early, go for a run, take a shower, get dressed, eat breakfast, and fire up my trading station before the markets open in New York. I am awake. I am alert. I am motivated when I sit down and start working on the list of stocks I will watch that day. This morning routine has tremendously helped my mental preparation for coming into the market. Whatever your routine is, starting the morning in a similar fashion will pay invaluable dividends. Rolling out of bed and throwing water on your face 15 minutes before the opening bell just does not give you sufficient time to be prepared for the market's opening. Sitting at your computer in your pajamas or underwear does not put you in the right mindset to attack the market. I know. I've experienced all of these scenarios. In *How to Day Trade for a Living*, I will show you how you too can take control over your life and have success in day trading on the stock market. I love teaching. It's my passion. In this book, I use simple and easy to understand words to explain the strategies and concepts you need to know to

because of a failure to either choose the right stocks, manage risk, and find proper entries or follow the rules of a proven strategy. In this book, I will teach you trading techniques that I personally use to profit from the market. Before diving into the trading strategies, we will first build your foundation for success as a trader by discussing the two most important skills you can possess.
